### Manajemen Risiko Terintegrasi

Sehubungan dengan diterbitkannya Peraturan Otoritas Jasa Keuangan No. 17/POJK.03/2014 tanggal 18 November 2014 dan Surat Edaran Otoritas Jasa Keuangan No. 14/SEOJK.03/2015 tentang Penerapan Manajemen Risiko Terintegrasi Bagi Konglomerasi Keuangan, Bank telah menerapkan Manajemen Risiko Terintegrasi untuk Konglomerasi Keuangan Grup Panin. Hal ini juga merupakan salah satu inisiatif strategik Satuan Kerja Manajemen Risiko dan menjadi fokus perhatian khusus dari manajemen Bank. Hal tersebut dianggap penting karena eksposur risiko yang timbul pada Panin Grup dapat mempengaruhi kelangsungan usaha Bank baik secara langsung maupun tidak langsung.

Proses integrasi manajemen risiko dilakukan dengan tetap memperhatikan perbedaan karakteristik usaha pada masing-masing Panin Grup. Implementasi proses integrasi manajemen risiko antara lain melalui proses pendampingan dan penyelarasan praktik manajemen risiko dalam hal tata kelola risiko, kebijakan dan prosedur manajemen risiko, pelaporan manajemen risiko, dan peningkatan budaya sadar risiko. Secara terintegrasi, Bank mengelola 10 (sepuluh) jenis risiko, yaitu: risiko kredit, risiko pasar, risiko likuiditas, risiko operasional, risiko strategik, risiko reputasi, risiko hukum, risiko kepatuhan, risiko asuransi dan risiko transaksi intragrup.

Manajemen Risiko terintegrasi berujung pada penetapan besaran *risk appetite* atau batas toleransi yang bisa diambil oleh Bank dalam menetapkan portfolio sesuai dengan *price risk* yang telah dipertimbangkan dengan matang dan dicerminkan pada besaran modal yang dikelola untuk menghadapi risiko, sekaligus mendukung pengembangan usaha. Mengingat pentingnya pengelolaan risiko dalam bisnis perbankan, Bank berupaya menerapkan kerangka kerja pengelolaan risiko yang adaptif, mudah dimengerti dan dijalankan oleh seluruh jajaran. Untuk mendukung efektivitas pengelolaan risiko Bank juga berupaya menumbuhkan kembangkan budaya risiko pada seluruh jajarannya, sehingga timbul kesadaran bahwa pengelolaan risiko pada hakikatnya adalah tanggung jawab seluruh jajaran.

SKMRT has conducted meetings with each LJK in January 2020 using data sourced from the Risk Profile Report. The meeting discussed and assessed the aggregate risk from various LJK Members of Panin's Financial Conglomerate.

### Integrated Risk Management

In connection with the issuance of the Financial Services Authority's Regulation No. 17/POJK.03/2014 dated 18 November 2014 and Circular of the Financial Services Authority No. 14/SEOJK.03/2015 concerning the Implementation of Integrated Risk Management for Financial Conglomerates, the Company has implemented Integrated Risk Management for the Panin Group Financial Conglomerate. This is also one of the strategic initiatives of the Risk Management Work Unit and is the focus of special attention of the Bank's management. This is considered important because risk exposures that arise in Panin Group can affect the business continuity of the Bank both directly and indirectly.

The integration of risk management is carried out with due regard to differences in business characteristics in each member of Panin Group. The risk management integration process is performed through the process of mentoring and aligning risk management practices, in terms of risk governance, risk management policies and procedures, risk management reporting, and enhancing risk awareness culture. The Bank integratedly manages 10 (ten) kinds of risks, namely: credit risk, market risk, liquidity risk, operational risk, strategic risk, reputation risk, legal risk, compliance risk, insurance risk and intragroup transaction risk.

Integrated Risk Management leads to the determination of risk appetite, or tolerance limits that can be taken by the Bank in setting portfolios in accordance with price risk that has been carefully considered and reflected in the amount of capital it manages to face risks, while supporting business development. Considering the importance of risk management in the banking business, the Bank seeks to implement a risk management framework that is adaptive, easily understood and carried out by all levels. To support the effectiveness of risk management, the Bank also strives to develop a risk culture in all levels, so that awareness arises that risk management is essentially the responsibility of all levels.

Proses pemantauan atas penerapan manajemen risiko dilakukan oleh Satuan Kerja Manajemen Risiko masing-masing Entitas untuk dilaporkan kepada Satuan Kerja Manajemen Risiko di Entitas Utama. Proses pemantauan serta evaluasi atas eksposur risiko anggota Konglomerasi Keuangan Panin Grup, akan dilaporkan juga melalui Komite Manajemen Risiko Terintegrasi (KMRT). KMRT beranggotakan perwakilan dari masing-masing entitas anggota dalam Konglomerasi Keuangan. Pada proses pemantauan dan evaluasi ini, Komite menyampaikan fokus utama atas eksposur risiko anggota Konglomerasi Keuangan untuk perbaikan proses manajemen risiko di masa datang.

Konglomerasi Keuangan Panin merumuskan strategi Manajemen Risiko Terintegrasi sesuai strategi bisnis secara keseluruhan dengan memperhatikan tingkat risiko yang akan diambil (*risk appetite*) dan toleransi risiko (*risk tolerance*). Dalam menentukan *risk appetite*, Direksi memastikan bahwa *risk appetite* yang diambil telah sesuai dengan strategi bisnis, profil risiko, dan rencana permodalan Konglomerasi Keuangan Panin. *Risk appetite* yang telah ditentukan oleh Direksi selalu dipantau dan jika terdapat profil risiko aktual melewati *risk appetite* yang telah ditetapkan, Direksi harus mengambil tindakan-tindakan yang dianggap perlu untuk membawa profil risiko agar berada dalam *risk appetite* Konglomerasi Keuangan Panin.

Toleransi risiko merupakan tingkat dan jenis risiko yang secara maksimum ditetapkan oleh Konglomerasi Keuangan sebagai penjabaran dari tingkat risiko yang akan diambil (*risk appetite*) setelah mempertimbangkan strategi bisnis, profil risiko, dan rencana permodalan secara terintegrasi serta kemampuan Konglomerasi Keuangan Panin dalam mengambil Risiko (*risk bearing capacity*). Toleransi risiko ditetapkan per jenis risiko dan risiko Konglomerasi Keuangan Panin secara keseluruhan sebagaimana halnya *risk appetite*, melalui pendekatan sebagai berikut:

1. Melakukan pengukuran posisi berbagai parameter jenis risiko dalam portfolio Konglomerasi Keuangan Panin saat ini (*"as is" position*) dan posisi proyeksi yang akan dicapai (*"to be" position*) di masa depan (satu tahun ke depan), untuk Risiko Nilai Tukar, Suku Bunga, Likuiditas, Kredit, Operasional, dan Risiko Lainnya, serta Sistem Pemeringkatan Kredit internal dengan metode *"quick dan dirty"* untuk Risiko Kredit.
2. Setelah eksposur risiko bagi Konglomerasi Keuangan Panin diukur dan dikuantifikasi dengan model pengukuran dan formula tertentu, hasil akhir pengukuran dan penghitungan tersebut harus dikaji kembali.
3. Bila Direksi menyetujui besarnya risiko yang diambil dan direncanakan saat ini harus diaplikasikan atau diproyeksikan untuk tahun mendatang, maka Konglomerasi Keuangan Panin dapat menggunakan "jumlah kerugian potensial", dan kerugian aktual yang diderita menentukan kerugian maksimum yang dapat diterima Konglomerasi Keuangan Panin.
4. Bila hasil dari pengukuran dan penghitungan eksposur risiko yang menggunakan model dan formula tertentu dirasa terlalu rendah atau terlalu tinggi, besarnya toleransi risiko yang akan diambil oleh Konglomerasi Keuangan Panin dapat dinaikkan atau dikurangi dengan mengurangi eksposur yang relevan pada risiko

4. Fulfill the principle of *arm's length* in the overall intra-group transaction agreement
5. Impact of intra-group transactions on financial performance of LJK.
6. Materiality of intra-group transactions that can affect the condition of the FSI and the condition of the Financial Conglomerate.

Panin's Financial Conglomerate formulates an Integrated Risk Management strategy in accordance with the overall business strategy by taking into account the risk appetite and risk tolerance. In determining risk appetite, the Board of Directors ensures that the risk taken is in accordance with the business strategy, risk profile and capital plan of the Panin Financial Conglomerate. The risk appetite determined by the Board of Directors is always monitored and in the event that there is an actual risk profile beyond the set risk appetite, the Board of Directors must take necessary actions to bring back the risk profile to be within the Panin Financial Conglomerate's risk appetite.

Risk tolerance is the level and type of risk that is maximally determined by the Financial Conglomerate as a translation of the level of risk to be taken (*risk appetite*) after considering business strategies, risk profiles, and integrated capital plans and Panin's Financial Conglomerate's ability to take risks (*risk bearing capacity*). Risk tolerance is determined by the type of risk and the overall Panin Financial Conglomerate risk as well as risk appetite, through the following approaches:

1. Measuring the position of various parameters of risk types in the current Panin Financial Conglomerate portfolio (*"as is" position*) and projected positions to be achieved (*"to be" position*) in the future (one year in the future), for Exchange Rate Risk, Interest Rates Interest, Liquidity, Credit, Operations, and Other Risks, as well as an internal Credit Rating System with the *"quick and dirty"* method for Credit Risk.
2. After the risk exposure for the Panin Financial Conglomerate is measured and quantified with a specific measurement model and formula, the final results of the measurement and calculation must be reviewed.
3. If the Board of Directors approves the amount of risk taken and planned, has to be applied or projected for the coming year, then the Panin Financial Conglomerate can use *"the amount of potential loss"*, and the actual loss occurred determines the maximum loss that can be received by the Panin Financial Conglomerate.
4. If the results of the measurement and calculation of risk exposures using certain models and formulas are considered too low or too high, the magnitude of the risk tolerance to be taken by the Panin Financial Conglomerate can be increased or reduced by reducing the relevant exposure to the risk of the Panin Financial Conglomerate.

Konglomerasi Keuangan Panin. Hasil penghitungan dan pengukuran dapat disesuaikan menurut pendapatan atau ekuitas Konglomerasi Keuangan Panin.

The results of calculations and measurements can be adjusted according to Panin's Financial Conglomerate income or equity.

- Evaluation of the credit administration process.
- Evaluation of the accuracy of the adoption of internal risk rating or the utilization of other monitoring tools.
- Effectiveness of the implementation of business units and Bank officers who monitor individual credit quality.

Subsequently, the Bank also implements an early detection system for non-performing or potentially non-performing loans and makes efforts to address them at early stage or at the earliest at its most possible extent in order to minimize the impact of non-performing loans on the overall portfolio.

### Tagihan yang Jatuh Tempo dan Tagihan yang Mengalami Penurunan Nilai/*Impairment*

Tagihan yang jatuh tempo merupakan seluruh tagihan yang telah jatuh tempo lebih dari 90 hari, baik atas pembayaran pokok dan/atau pembayaran bunga. Sedangkan tagihan yang mengalami penurunan nilai/*impairment* adalah aset keuangan yang memiliki nilai signifikan secara individual dan terdapat bukti obyektif bahwa penurunan nilai individual terjadi setelah pengakuan awal aset keuangan tersebut.

### Pendekatan yang Digunakan untuk Pembentukan CKPN

Cadangan Kerugian Penurunan Nilai adalah penyisihan yang dibentuk apabila nilai tercatat aset keuangan setelah penurunan nilai kurang dari nilai tercatat awal. Istilah CKPN dalam penerapan PSAK 50/55 disesuaikan menjadi *impairment*.

Evaluasi penurunan nilai dikelompokkan dalam dua jenis, yakni secara individual dan kolektif. Pendekatan perhitungan individual *impairment* merupakan selisih antara nilai tunai atas estimasi *cash flow* yang didiskonto berdasarkan suku bunga efektif (*Effective Interest Rate* – EIR) dengan *amortized cost* pada saat terjadi *impairment*.

Sementara itu, pendekatan perhitungan *collective impairment* secara statistik menggunakan parameter *Probability of Default* (PD), yaitu tingkat kemungkinan kegagalan debitur memenuhi kewajiban, yang diukur berdasarkan pendekatan *Migration Analysis* dan *Roll Rates*. Kemudian, *Loss Given Default* (LGD), yaitu tingkat kerugian yang diakibatkan dari kegagalan debitur memenuhi kewajibannya. Untuk mendapatkan persentase LGD yang wajar, maka diperlukan analisis data historis.

### Penerapan Pengukuran Risiko Kredit dengan Pendekatan Standar

Dalam melakukan perhitungan Aktiva Tertimbang Menurut Risiko (ATMR) risiko kredit, Bank mengacu kepada Surat Edaran OJK No. 42/SEOJK.03/2016 tentang Pedoman Perhitungan Aset Tertimbang Menurut Risiko untuk Risiko Kredit dengan Menggunakan Pendekatan Standar, Surat Edaran OJK No. 48/SEOJK.03/2017 dan Surat Edaran OJK No. 11/SEOJK.03/2018.

Perhitungan ATMR untuk Risiko Kredit dengan menggunakan Pendekatan Standar Basel II mengacu pada hasil peringkat yang diterbitkan oleh lembaga pemeringkat yang diakui OJK sebagaimana diatur dalam Surat Edaran OJK No. 37/SEOJK.03/2016 tentang Lembaga Pemeringkat dan Peringkat yang diakui OJK.

Tujuan penggunaan peringkat dalam perhitungan ATMR risiko kredit hanya ditujukan untuk jenis tagihan kepada pemerintah negara lain, entitas sektor publik, bank pembangunan multilateral dan lembaga internasional tertentu, bank dan korporasi.

### Payables Due and Impairment

Payables that are due represent the payables maturing or due for more than 90 days, both for principal and/or interest payments. Whereas claims that have been impaired represent the financial assets with significant value at individual level and with objective evidence that an individual impairment occurs after the initial recognition of such financial assets.

### Establishment of Reserves for Impairment Losses

Allowance for impairment losses represents the provision that is established if the carrying value of financial assets after impairment is less than the initial carrying amount. The term of CKPN in adopting PSAK 50/55 has been adjusted as impairment.

The evaluation of impairment is categorized into two types, which are individually and collectively. The approach to calculating individual impairment is by finding the difference between the cash value of the estimated discounted cash flow based on the effective interest rate (EIR) under the amortized cost during such impairment.

Meanwhile, the statistical calculation of collective impairment approach adopts the Probability of Default (PD), which is the probability of the debtor's failure to meet liabilities, as measured by the Migration Analysis and Roll Rates approach. Further, Loss Given Default (LGD) is the level of loss resulting from the failure of the debtor to meet his/her liabilities. To achieve a reasonable percentage of LGD, historical data analysis is required.

### Implementation of Credit Risk Assessment under Standard Approach

In calculating Credit Risk Weighted Assets (RWA) for credit risk, the Bank refers to OJK Circular Letter No.42/SEOJK.03/2016 concerning Guidelines for Calculation of Risk Weighted Assets for Credit Risk by Adopting the Standard Approach, OJK Circular Letter No.48/SEOJK.03/2017 and OJK Circular Letter No.11/SEOJK.03/2018.

RWA calculation for Credit Risk using Basel II Standard Approach refers to the ranking results issued by rating agencies recognized by the OJK as stipulated in OJK Circular Letter No. 37/SEOJK.03/2016 concerning Rating Agencies and Ratings recognized by OJK.

The purpose of adopting ratings in the calculation of RWA credit risk is only intended for payables to other governments, public sector entities, multilateral development banks and certain international institutions, banks and corporations.

*Counterparty Credit Risk* timbul dari jenis transaksi derivatif *Over the Counter* (OTC) dan transaksi repo/reverse repo baik atas posisi *trading book* maupun *banking book*. Perhitungan Risiko Kredit dalam rangka perhitungan KPMM untuk eksposur yang menimbulkan risiko kredit akibat kegagalan pihak lawan (*counterparty credit risk*) adalah dengan menggunakan Pendekatan Standar.

Adapun penentuan *credit limit* terkait *counterparty credit risk* disesuaikan dengan kebutuhan counterparty dan tingkat risiko yang akan diambil (*risk appetite*) Bank serta ketentuan yang ada antara lain Peraturan Bank Indonesia No. 8/13/PBI/2006 tentang Batas Maksimum Pemberian Kredit.

### Mitigasi Risiko Kredit

Agunan solid dalam bentuk uang tunai atau tanah dan bangunan merupakan jenis agunan utama yang diterima untuk mitigasi risiko kredit. Jenis agunan tersebut memiliki nilai likuiditas relatif tinggi dan/atau keberadaannya tetap atau tidak berpindah-pindah tempat sehingga dapat dicairkan pada saat pinjaman debitur/grup debitur masuk dalam kategori bermasalah secara efektif.

Penilai independen akan melakukan penilaian agunan. Namun, jika di lokasi agunan tersebut tidak terdapat penilai independen, maka akan dilakukan oleh staf penilai internal yang tidak terlibat dalam proses pemberian kredit. Dalam rangka mengontrol fisik agunan yang dijaminan oleh debitur ke PaninBank, maka Bank melakukan peninjauan agunan secara berkala.

Pihak-pihak utama pemberi jaminan/garansi dianalisis pada saat pengolahan kredit. Keputusan kelayakan pemberian kredit tersebut menimbang *Four Eyes Principle*, yang mana keputusan kredit ditentukan oleh dua pihak independen yaitu sisi pengembangan bisnis dan sisi analisis risiko kredit.

Fokus penggunaan teknik mitigasi kredit ialah pada agunan yang termasuk dalam jenis agunan utama. Untuk memitigasi risiko kredit yang mungkin terjadi, Bank melakukan diversifikasi terhadap portofolio kredit PaninBank, baik secara kategori kredit maupun industri/sektor ekonomi.

### Risiko Pasar

Risiko pasar adalah risiko pada posisi neraca dan rekening administratif, termasuk transaksi derivatif akibat perubahan secara keseluruhan dari kondisi pasar. Perubahan harga *option* juga masuk ke dalam risiko pasar.

### Upaya Pengelolaan Risiko

Pengelolaan risiko pasar dilakukan oleh unit kerja yang independen dengan menerapkan prinsip segregation of duties yaitu pemisahan fungsi dan tanggung jawab yang terdiri dari front office, middle office, dan back office. Organisasi Manajemen Risiko Pasar terdiri dari dua bagian, yaitu Manajemen Risiko Pasar – Trading Book dan Manajemen Risiko Pasar – Banking Book.

Counterparty Credit Risk arises from Over the Counter (OTC) derivative transactions and repo/reverse repo transactions for both trading book and banking book positions. Credit Risk Calculation for the purpose of calculating KPMM for exposures posing credit risk due to counterparty credit risk is using the Standard Approach.

The decision of credit limits related to counterparty credit risk is adjusted to the needs of counterparties and the risk appetite of the Bank as well as prevailing regulations including Bank Indonesia Regulation No. 8/13/PBI/2006 concerning the Legal Lending Limit.

### Credit Risk Mitigation

Solid collateral in the form of cash or land and buildings represents the main type of collateral accepted to mitigate credit risk. Such type of collateral has a relatively high liquidity value and/or fixed or stable position so that such collateral can be disbursed when the debtor/group debtor loans effectively fall into the category of non-performing loans.

Independent appraisers will perform the collateral valuation. However, should there be no independent appraiser at the location of such collateral, then the internal appraisal staff who is not involved in the loan granting process will perform the valuation. In order to physically control the collateral guaranteed by the debtor to PaninBank, the Bank conducts periodic collateral reviews.

The main parties providing the collaterals are analyzed during the credit processing. The credit feasibility decision considers the Four Eyes Principle, whereby credit decisions are determined by two independent parties, namely the business development and the credit risk analysis.

The focus of credit mitigation techniques is on the collateral categorized as the main collateral type. To mitigate potential credit risks, the Bank diversifies its loan portfolio, both in the credit category and industry/economic sectors.

### Market Risk

Market risk is the risk on the balance sheet and administrative accounts, including derivative transactions due to overall changes in market conditions. Changes in option prices are also categorized under market risk.

### Risk Management Efforts

Market risk management is conducted by an independent business unit by adopting the principle of segregation of duties, namely the separation of functions and responsibilities consisting of the front office, middle office and back office. Market Risk Management Organization consists of two parts, namely Market Risk Management - Trading Book and Market Risk Management - Banking Book.

Kerangka kerja dan tata kelola manajemen risiko pasar di PaninBank menganut prinsip Pendekatan Pertahanan Tiga Lapis (*three lines of defense*) yang terdiri dari:

1. Dewan Komisaris yang menjalankan fungsi pengawasan risiko pasar (*risk oversight*) melalui Komite Pemantau Risiko, Komite Tata Kelola Terintegrasi, dan Komite Audit.
2. Direksi yang menjalankan fungsi kebijakan risiko melalui Executive Committee terkait manajemen risiko pasar yaitu Assets & Liabilities Committee dan Risk Management Committee.
3. Satuan Kerja Manajemen Risiko bersama unit bisnis dan unit kerja kepatuhan yang melakukan fungsi identifikasi risiko, pengukuran risiko, pemantauan risiko, dan pengendalian risiko.

Risiko pasar *trading book* merupakan sebuah risiko yang muncul dari potensi kerugian akibat aktivitas *trading book*, antara lain perubahan suku bunga dan nilai tukar (termasuk *derivative instrument*). Sedangkan Risiko pasar *banking book* merupakan risiko yang muncul karena terjadi perubahan suku bunga dan nilai tukar atas aktivitas *banking book* yang dapat berpengaruh pada profitabilitas PaninBank (*earning perspective*) dan nilai ekonomis modal PaninBank (*economic value perspective*).

Pengelolaan risiko pasar banking book PaninBank dilakukan dengan mengoptimalkan struktur neraca agar mendapatkan imbal hasil yang maksimal sesuai dengan tingkat risiko yang dapat diterima. Selain itu juga dengan menetapkan limit yang mengacu pada ketentuan internal dan ketentuan perundang-undangan yang berlaku yang dimonitor tiap minggu dan bulan oleh unit kerja terkait.

### Organisasi Manajemen Risiko Pasar

Dewan Komisaris dan Direksi bertanggung jawab untuk memastikan bahwa penerapan manajemen risiko terhadap nilai tukar dan suku bunga telah sesuai dengan tujuan strategis, skala, karakteristik bisnis dan profil risiko nilai tukar dan suku bunga Bank, termasuk memastikan integrasi penerapan manajemen risiko nilai tukar dan suku bunga dengan risiko-risiko lainnya yang dapat berdampak pada posisi risiko Bank.

Pengelolaan risiko akibat dari pergerakan yang berlawanan dari faktor pasar yaitu suku bunga dan nilai tukar (termasuk *derivative instrument*) merupakan cakupan Manajemen Risiko Pasar. Dalam rangka penerapan manajemen risiko pasar yang efektif, Bank menyusun tugas dan tanggung jawab yang disesuaikan dengan tujuan dan kebijakan usaha, kompleksitas serta kemampuan Bank. Manajemen risiko pasar dilakukan dengan menerapkan pemisahan fungsi dan tanggung jawab secara independen atas transaksi perdagangan *treasury* yang terdiri dari *front office* (*treasury*), *middle office* dan *back office* (*settlement and control unit*).

Market risk management framework and governance at PaninBank adhere to the principle of the Three Lines of Defense Approach which consists of the following:

1. The Board of Commissioners conducts the risk oversight function through the Risk Monitoring Committee, the Integrated Governance Committee and the Audit Committee.
2. The Board of Directors performs the risk policy function through the Executive Committee related to market risk management including the Assets & Liabilities Committee and Risk Management Committee.
3. The Risk Management Business Unit with Compliance business unit performs the functions of risk identification, risk measurement, risk monitoring and risk control.

Trading book market risk represents the risk arising from potential losses due to trading book activities, including changes in interest rates and forex rates (including derivative instruments). While banking book market risk represents the risk that arises due to changes in interest rates and forex rates on banking book activities potentially affecting PaninBank's earning perspective and PaninBank's economic value perspective.

PaninBank's banking book market risk management is performed by optimizing the balance sheet in order to generate maximum returns in accordance with an acceptable level of risk. In addition, the Bank also sets the limits that refer to internal policies and prevailing legal requirements that are monitored on a weekly and monthly basis by the relevant business units.

### Market Risk Management Organization

The Board of Commissioners and Directors are responsible for ensuring that the adoption of risk management on the forex rates and interest rates is in accordance with the strategic objectives, scale, business characteristics and risk profile of the forex rates and interest rates of the Bank, including ensuring the integration of the implementation of forex rate and interest rate risk management with other risks that may affect the Bank's risk position.

Risk management resulting from adverse movements of market factors, namely interest rates and forex rates (including derivative instruments) is within the scope of Market Risk Management. In order to implement effective market risk management, the Bank prepares tasks and responsibilities that are tailored to the Bank's objectives and business policies, complexity and ability. Market risk management is conducted by implementing independent segregation of functions and responsibilities on treasury trading transactions comprising front office (*treasury*), middle office and back office (*settlement and control unit*).

### Manajemen Portofolio *Trading* dan *Banking Book*

Pelaksanaan pengelolaan risiko pasar atas aktivitas *trading treasury* secara lebih efektif dan efisien serta mendukung bisnis PaninBank di tahun 2019, maka Bank melakukan pemantauan terhadap limit-limit *treasury* serta melakukan kaji ulang secara berkala. Limit-limit *trading treasury* yang telah ditetapkan oleh manajemen antara lain *exposure limit*, *stop loss limit*, *cut loss limit*, *VaR limit* dan *PV01 limit*.

Dalam menunjang bisnis Bank, Bank juga telah memiliki sistem yaitu *Guava System* yang terintegrasi antara *front office*, *middle office* dan *back office* sehingga semakin optimal dalam pengukuran dan pemantauan limit *treasury* secara rutin dan berkala melalui sistem tersebut.

### Pengukuran Risiko Pasar

Dalam rangka memastikan kemampuan bank untuk mengantisipasi risiko suku bunga dan nilai tukar maka Bank diwajibkan untuk memenuhi Kewajiban Penyediaan Modal Minimum (KPMM) yang ditentukan oleh regulator, maka bank secara berkala melakukan perhitungan Aset Tertimbang Menurut Risiko (ATMR) dengan menggunakan pendekatan standar. Bank memperhitungkan risiko pasar dari dua eksposur yang terkait suku bunga dan eksposur valuta asing (nilai tukar).

Proses pemantauan dan pengukuran risiko pasar dilakukan secara rutin dan berkala baik harian, mingguan maupun bulanan. Dalam pengukuran risiko pasar, Bank telah menghitung *Value at Risk* dengan menggunakan metode *Exponential Weight Moving Average (EWMA)*, *historical* dan *montecarlo*. Selain itu Bank memantau potensi kerugian eksposur pada aktivitas *trading* dengan melakukan *Mark to Market* secara harian oleh unit independen yaitu Biro Manajemen Risiko.

### Interest Rate Risk in Banking Book (IRRBB)

Mengacu pada Surat Edaran Otoritas Jasa Keuangan Nomor 12/SEOJK.03/2018 tentang Penerapan Manajemen Risiko dan Pengukuran Risiko Pendekatan Standar untuk Risiko Suku Bunga dalam Banking Book (*Interest Rate Risk in Banking Book*) Bagi Bank Umum, Bank melakukan manajemen risiko untuk *Interest Rate Risk in Banking Book* (IRRBB). Manajemen risiko itu diterapkan oleh Bank pada tingkat entitas maupun pada tingkat konsolidasi dengan memperhatikan tujuan, kebijakan, ukuran dan kompleksitas bisnis Bank.

Penerapan manajemen IRRBB Bank bertujuan untuk mengukur, memantau, dan mengendalikan risiko pergerakan suku bunga yang berdampak terhadap nilai ekonomis (*Economic Value of Equity/EVE*) maupun pendapatan bunga bersih (*Net Interest Income/NII*). Pengukuran eksposur IRRBB, baik pada saat ini maupun masa depan meliputi aset, liabilitas, dan transaksi rekening administratif yang sensitif terhadap perubahan suku bunga.

### Trading and Banking Book Portfolio Management

To conduct more effective and efficient market risk management for treasury trading activities and to support PaninBank's business in 2019, the Bank will monitor treasury limits and conduct periodic reviews. Treasury trading limits set by management include exposure limit, stop loss limit, cut loss limit, VaR limit and PV01 limit.

In supporting the Bank's business, the Bank also maintains a system, namely the *Guava System* which is integrated between the front office, middle office and back office so as to measure and monitor treasury limits regularly and periodically through the system in a more optimal manner.

### Market Risk Assessment

In order to ensure the Bank's ability to anticipate interest rate and exchange rate risks, Banks are required to fulfill the Minimum Capital Adequacy Requirement (KPMM) determined by the regulator; accordingly, the Bank periodically calculates its Risk Weighted Assets (ATMR) using a standardized approach. The Bank calculates market risks from two exposures related to interest rates and foreign exchange exposures (exchange rates).

The process of monitoring and measuring market risk is conducted regularly and periodically on a daily, weekly and monthly basis. In measuring market risk, the Bank has calculated *Value at Risk* using the *Exponential Weight Moving Average (EWMA)*, *historical* and *montecarlo* methods. In addition, the Bank monitors potential loss of exposure to trading activities by conducting *Mark to Market* on a daily basis by an independent unit, which is with the Risk Management Bureau.

### Interest Rate Risk in Banking Book (IRRBB)

By referring to the Financial Services Authority Circular Letter No. 12/SEOJK.03/2018 concerning Implementation of Risk Management and Risk Measurement Standard Approach for Interest Rate Risk in Banking Book (*Interest Rate Risk in Banking Book*) for Commercial Banks, the Bank conducts risk management for Interest Rate Risk in Banking Book (IRRBB). Risk management is implemented by the Bank at the entity level and at the consolidation level by taking into account the objectives, policies, size and complexity of the Bank's business.

The implementation of the Bank's IRRBB management aims to measure, monitor, and control the risk of interest rate movements that have an impact on economic value (*Economic Value of Equity/EVE*) and net interest income (NII). Measurement of current and future IRRBB exposures includes assets, liabilities and administrative account transactions that are sensitive to changes in interest rates.

Strategi Bank terkait IRRBB adalah mengambil posisi *long/positive gap* antara *Rate Sensitive Assets* (RSA) dengan *Rate Sensitive Liabilities* (RSL) dengan profil perubahan suku bunga jangka pendek. Hal tersebut memungkinkan Bank untuk mengambil langkah yang cepat untuk mengantisipasi perubahan suku bunga baik pada saat suku bunga naik maupun turun. Selain itu Bank menyusun strategi IRRBB sejalan dengan strategi bisnis dengan *memperhatikan risk appetite* dan *risk tolerance*.

Dalam hal pengendalian IRRBB, manajemen Bank akan mengambil langkah-langkah pencegahan terhadap kemungkinan terjadinya kerugian IRRBB yang lebih besar, pengendalian terhadap laba rugi serta kepatuhan terhadap ketentuan. Satuan Kerja Manajemen Risiko terkait IRRBB adalah Departement *Market & Liquidity Risk Management* di bawah Direktorat Risk Management & Compliance yang melakukan pemantauan termasuk pelaporan IRRBB.

ALCO adalah komite yang bertanggung jawab untuk pengelolaan IRRBB termasuk menetapkan kebijakan & limit. Strategi IRRBB sejalan dengan strategi bisnis dan konsisten dengan *risk appetite* dan *risk tolerance bank* secara keseluruhan (*bankwide*). Perhitungan IRRBB dilakukan secara triwulanan sesuai dengan pelaporan Profil Risiko Bank. *Sensitivitas* Bank terhadap IRRBB diukur menggunakan  $\Delta EVE/Modal$  Tier 1,  $\Delta NII/NII$  proyeksi dan *Repricing Profile Gap* dengan berbagai skenario *shock* perubahan suku bunga.

### Risiko Operasional

Potensi kerugian yang diakibatkan oleh ketidakcukupan dan/atau tidak berfungsinya proses internal, kesalahan manusia, kegagalan sistem atau kejadian eksternal yang mempengaruhi kegiatan usaha, baik secara finansial maupun non finansial disebut dengan Risiko Operasional.

### Upaya Pengelolaan Risiko

Risiko operasional dapat memicu timbulnya risiko-risiko lain seperti Risiko Reputasi, Risiko Strategik, Risiko Hukum, Risiko Pasar, Risiko Kredit, Risiko Kepatuhan dan Risiko Likuiditas. Apabila Bank dapat mengelola Risiko Operasional secara efektif dan konsisten maka potensi timbulnya risiko-risiko lain dapat diminimalisir.

Risiko Operasional secara PaninBank dalam menjalankan organisasi. Unit Kerja Pemilik Risiko sebagai *risk and control owner* memiliki tanggung jawab utama untuk memastikan proses manajemen risiko yang baik sehingga dapat meminimalisir potensi risiko.

Dalam penerapan manajemen risiko operasional, PaninBank menggunakan tools/perangkat manajemen risiko operasional meliputi:

1. *Risk and Control Self Assessment* (RCSA), sebuah register atas risiko dan kontrol utama, dengan hasil *assessment* atas risiko inheren dan *residual risk*.

The Bank's strategy related to IRRBB is to take a long/positive gap position between Rate Sensitive Assets (RSA) and Rate Sensitive Liabilities (RSL) with a profile of changes in short-term interest rates. This allows the Bank to take quick measures to anticipate changes in interest rates both during the rise or the decline of interest rates. In addition, the Bank develops an IRRBB strategy in line with the business strategy by taking into account risk appetite and risk tolerance.

In terms of IRRBB control, the Bank's management will take preventive measures against the possibility of greater IRRBB losses, control of profit and loss and compliance with regulations. The Risk Management Unit related to IRRBB is the Market & Liquidity Risk Management Department under the Directorate of Risk Management & Compliance which conducts monitoring including IRRBB reporting.

ALCO is the committee responsible for managing IRRBB including setting its policies & limits. The IRRBB strategy is in line with the business strategy and is consistent with the bank's overall risk appetite and risk tolerance. IRRBB calculations are conducted on a quarterly basis in accordance with the Bank's Risk Profile reporting. The sensitivity of the Bank to IRRBB is measured using  $\Delta EVE/Capital$  Tier 1,  $\Delta NII/NII$  projections and *Repricing Profile Gap* with various scenarios of shocking changes in interest rates.

### Operational Risk

Potential losses due to inadequate and/or malfunctioning of internal processes, human error, system failures or external events that affect business activities, both financially and non-financially, are referred to as Operational Risk.

### Risk Management Efforts

Operational risk can trigger other risks such as Reputation Risk, Strategic Risk, Legal Risk, Market Risk, Credit Risk, Compliance Risk and Liquidity Risk. If the Bank can manage Operational Risk effectively and consistently, other potentially arising risks can be minimized.

In managing the organization, the Unit Risk Owner as a risk and control owner has the main responsibility to ensure a good risk management process so as to minimize the potential risk.

In implementing operational risk management, PaninBank adopts operational risk management tools including:

1. Risk and Control Self Assessment (RCSA), a register of major risks and controls, with the results of an assessment of inherent and residual risk.

2. *Loss Event Database (LED)*, Sebuah database insiden risiko operasional dengan tujuan sebagai *lesson learned*, pemantauan tindak lanjut remediasi maupun perbaikan kedepannya, serta sebagai masukan atas perhitungan modal risiko operasional.
3. *Key Risk Indicator (KRI)*, indikator yang disusun sebagai bagian dari upaya memantau risiko-risiko yang ada secara risk based dengan tujuan agar tindak lanjut dapat segera diambil sebelum sebuah risiko benar-benar terjadi.
4. Pengelolaan *Near Miss* agar *risk owner* dan pihak terkait lebih *aware* atas insiden/kejadian kesalahan operasional supaya tidak terulang dan menimbulkan kerugian di masa datang

### Tata Kelola dan Organisasi Manajemen Risiko Operasional

Tata kelola Manajemen Risiko Operasional PaninBank mengedepankan prinsip-prinsip akuntabilitas (pembagian tugas dan tanggung jawab yang jelas), transparansi (keterbukaan informasi), kerangka kerja pengendalian risiko operasional yang memadai dan fleksibilitas dalam mendorong pertumbuhan bisnis yang sehat dengan kerangka kerja pengendalian risiko operasional yang *prudent*.

Agar penerapan manajemen risiko operasional berjalan efektif, PaninBank memastikan adanya pembagian tugas dan tanggung jawab yang jelas dalam pengelolaan risiko operasional, antara lain:

- a. Pengawasan penerapan manajemen risiko operasional ditingkat Dewan Komisaris dilakukan oleh Komite Pemantau Risiko (KPR), yang berfungsi untuk memantau dan memastikan bahwa penerapan manajemen risiko operasional berjalan dan baik sesuai ketetapan Direksi serta memberikan masukan kepada Dewan Komisaris terkait penerapan manajemen risiko operasional Bank
- b. Pengawasan manajemen risiko operasional ditingkat Direksi dilakukan oleh Komite Manajemen Risiko (KMR), Komite Pengarah Teknologi Informasi (KPTI) dan Komite Penerbitan Produk atau Aktivitas Baru, yang berfungsi untuk memberikan rekomendasi kepada Direktur utama terkait Kebijakan Manajemen Risiko Operasional dan Risk IT, Perbaikan/penyempurnaan manajemen risiko operasional dan Risk IT dan keputusan bisnis yang menyimpan dari prosedur normal serta pengembangan teknologi informasi.
- c. Satuan Kerja Manajemen Risiko yang independen dari *risk owner/risk taking unit* yang bertugas memantau dan mengkoordinasikan penerapan manajemen risiko operasional pada seluruh aktivitas operasional dan bisnis Bank secara efektif sesuai ketentuan Direksi.
- d. Koordinator Jenis Risiko yang terdiri dari divisi/ biro/group yang berfungsi untuk memberikan solusi atas permasalahan yang dihadapi *risk owner* dalam menerapkan manajemen risiko operasional

2. *Loss Event Database (LED)*, a database of operational risk incidents for the purpose of lessons learned, monitoring remediation follow-up and future improvements, as well as input for calculating operational risk capital.
3. *Key Risk Indicator (KRI)*, in which indicators are compiled as part of efforts to monitor existing risks on a risk-based basis aiming at making immediate follow-up before a risk actually arises.
4. *Near Miss management* so as to make risk owners and related parties more aware of operational errors/incidents to prevent them from recurring and incurring losses in the future

### Operational Risk Management Governance and Organization

PaninBank's Operational Risk Management governance promotes principles of accountability (clear segregation of tasks and responsibilities), transparency (information disclosure), an adequate operational risk control framework and flexibility in promoting healthy business growth with a prudent operational risk control framework.

So as to effectively implement operational risk management, PaninBank ensures clear segregation of duties and responsibilities in managing operational risk, including:

- a. Supervision of the implementation of operational risk management at the Board of Commissioners level is conducted by the Risk Monitoring Committee (KPR), whose function is to monitor and ensure that operational risk management has been well performed and in accordance with the Directors' recommendations and to provide input to the Board of Commissioners regarding the implementation of the Bank's operational risk management
- b. Operational risk management oversight at the Board of Directors level is conducted by the Risk Management Committee (KMR), the Information Technology Steering Committee (KPTI) and the New Product or Activity Publishing Committee, which serves to provide recommendations to the President Director regarding Operational Risk Management Policy and IT Risk, Repair/improvement on operational risk management and IT risk and business decisions deviating from normal procedures and the development of information technology.
- c. The Risk Management Unit is independent from the risk owner/risk taking unit whose task is to monitor and coordinate the implementation of operational risk management in all operational activities and the Bank's business effectively in accordance with the Directors' requirements.
- d. Risk Type Coordinator which consists of divisions/bureaus/groups whose function is to provide solutions to problems encountered by risk owners in implementing operational risk management

- e. Koordinator Risiko adalah pejabat/staf senior yang ditunjuk oleh kepala satuan kerja divisi/biro/group sebagai perpanjangan tangan dari Biro Manajemen Risiko dalam menerapkan manajemen risiko operasional dalam satuan kerjanya masing-masing.
- f. Satuan Kerja Bank (divisi/biro/group/cabang) baik sebagai Koordinator Jenis Risiko (KJR) maupun sebagai *risk owner/risk taking* unit yang bertanggung jawab mengelola risiko operasional yang terekspos dalam unit kerjanya, termasuk membuat rencana tindak lanjut perbaikan terhadap pengendalian risiko operasional yang masih kurang optimal/lemah.
- g. Satuan Kerja Audit Intern, bertugas untuk melakukan kaji ulang dalam pengelolaan risiko operasional dilakukan oleh *risk owner/risk taking* unit secara Independen.

### Proses Manajemen Risiko Operasional

Risiko operasional melekat dalam semua aktivitas fungsional perbankan sehari-hari, sehingga semua satuan kerja divisi/biro/group/cabang sebagai *risk taking unit/risk owner* bertanggung jawab mengelola risiko operasional yang terekspos dalam unit kerjanya sesuai kerangka kerja yang telah ditetapkan Direksi, di bawah koordinasi Satuan Kerja Manajemen Risiko.

*Risk owner* dengan dukungan Biro Manajemen risiko dan satuan kerja terkait lainnya melakukan proses manajemen risiko operasional secara berkesinambungan yang meliputi identifikasi, mengukur, memantau, mengendalikan dan batasan isu risiko operasional yang melekat pada aktivitas unit kerjanya.

PaninBank telah mengoperasikan sistem aplikasi *Operational Risk Assessor* (OPRA) berbasis website dan Aplikasi *Risk Base Bank Rating* (RBBR) berbasis *website* untuk mendukung proses manajemen risiko operasional, yaitu: proses identifikasi, pengukuran, pemantauan dan pengendalian serta MIS risiko operasional secara otomatis. Aplikasi OPRA saat ini sudah dioperasikan di semua Kantor PaninBank yang terdiri dari 21 divisi/biro/group di kantor pusat dan 551 kantor cabang (Kantor Cabang Utama (KCU), Kantor Cabang Pembantu (KCP), Kantor Kas (KK)).

### Metode Identifikasi Risiko

Metode identifikasi risiko operasional PaninBank diawali dari proses *mapping* risiko operasional dengan 7 (tujuh) aktivitas fungsional Bank (perkreditan, *treasury* & investasi, operasional & jasa, pembiayaan perdagangan & bank garansi, pendanaan & instrument utang, TSI & SIM atau pengelolaan SDM) dan semua satuan kerja divisi/biro/group/cabang untuk menentukan satuan kerja Bank yang terekspos risiko operasional yang akan berfungsi sebagai *risk taking unit/risk owner*.

- e. Risk Coordinator is a senior official/staff appointed by the head of the division/bureau/group unit as an extension of the Risk Management Bureau in implementing operational risk management in their respective business units.
- f. Bank Units (divisions/bureaus/groups/branches) both as a Risk Type Coordinator (KJR) and as a risk owner/risk taking unit responsible for managing operational risk exposures in their units, including preparing follow-up plans for improvement of operational risk control which is still less than optimal/weak.
- g. The Internal Audit Unit is assigned with the task of conducting an independent review of operational risk management by the risk owner/risk taking unit.

### Operational Risk Management Process

Operational risk is inherent in all day-to-day functional banking activities, consequently all divisions/bureaus/groups/branch units as risk taking units/risk owners are responsible for managing operational risk exposures in their units based on the framework required by the Directors, under coordination of the Risk Management Unit.

The risk owner, with the support of the Risk Management Bureau and other relevant units, conducts an ongoing operational risk management process that includes identifying, measuring, monitoring, controlling and limiting operational risk issues inherent in the business unit's activities.

PaninBank has operated a website-based Operational Risk Assessor (OPRA) application system and a website-based Risk Based Bank Rating (RBBR) application to support operational risk management processes, including: the process of identifying, measuring, monitoring and controlling as well as automatic operational risk MIS. The OPRA application is currently operating in all PaninBank Offices consisting of 21 divisions/bureaus/groups at the head office and 551 branch offices (Main Branch Offices (KCU), Sub-Branch Offices (KCP), Cash Offices (KK)).

### Risk Identification Method

PaninBank's operational risk identification method begins with the process of mapping operational risks with 7 (seven) Bank functional activities (credit, treasury & investment, operations & services, trade finance & bank guarantees, debt financing & instruments, TSI & SIM or HR management) and all divisions/bureaus/groups/branch units to determine the unit that is exposed to operational risk which will function as a risk taking unit/risk owner.

*Unit kerja/risk owner* dengan dukungan Biro Manajemen Risiko bertanggung jawab untuk melakukan identifikasi terhadap parameter, indikator dan isu risiko operasional yang melekat pada aktivitas fungsional di unit kerjanya dan berpotensi menimbulkan kerugian bagi Bank, termasuk yang melekat pada produk/aktivitas baru dan sistem informasi teknologi Bank.

Sumber data identifikasi risiko operasional dapat berasal dari ketentuan regulator, Kebijakan dan Prosedur Bank, *job description* dan sumber-sumber risiko lainnya termasuk data kecurangan (*fraud*) dan eksternal lainnya. Parameter/indikator/isu risiko yang telah diidentifikasi selanjutnya disusun dalam *risk register* risiko operasional.

### Penilaian Risiko Operasional

*Risk owner* dengan dukungan Biro Manajemen Risiko bertanggung jawab melakukan penilaian atau pengukuran risiko yang melekat (*inherent risk*) dan risiko sisa (*residual risk*) terhadap semua parameter risiko/indikator risiko/Isu risiko operasional dalam daftar/*risk register*. Cakupan penilaian risiko operasional meliputi:

- Jenis dampak risiko (*financial/non-financial*) dan tingkat dampaknya (*risk impact*),
- Jenis frekuensi kejadian risiko (rutin/non rutin) dan tingkat frekuensi kejadian risiko (*risk likelihood*) menggunakan skala kuantifikasi dampak dan skala kuantifikasi frekuensi.
- Tingkat risiko inheren komposit (*inherent risk composite*) yang terbagi ke dalam 5 (lima level), yaitu: *low risk*, *low to moderate risk*, *moderate risk*, *moderate to high risk* atau *high risk* menggunakan *risk map*.

Parameter/indikator/isu risiko operasional yang telah diukur, dikelompokkan berdasarkan tingkat risiko inheren kompositnya untuk proses mitigasi dan pengendalian sesuai *operational risk appetite/risk tolerance* yang ditetapkan Direksi.

### Mitigasi dan Pengendalian Risiko

Penetapan mitigasi risiko operasional, terkait dengan risiko tersebut dapat diterima (*risk accepted*), harus dihindari (*risk avoid*) atau harus dikendalikan (*risk residue atau risk transfer*) merupakan wewenang Direksi melalui penetapan *risk appetite/risk tolerance*.

Parameter/indikator/isu-isu risiko operasional immaterial atau dengan tingkat risiko inheren komposit berada pada kisaran *low risk-moderate to risk*/di bawah *risk appetite/risk tolerance* Bank dapat diterima Bank (*absorb/accepted*), sebaliknya yang material/tingkat risiko inheren kompositnya berada pada kisaran *moderate to high risk-high risk*/di atas *risk appetite/risk tolerance* Bank harus dikendalikan (*risk residue/risk transfer*) sejak dini.

The business unit/risk owner with the support of the Risk Management Bureau is responsible for identifying parameters, indicators and operational risk issues inherent in functional activities in its business unit and potentially harmful to the Bank, including those inherent in new products/activities and information technology systems.

Sources of operational risk identification data may arise from regulatory requirements, Bank Policies and Procedures, job descriptions and other sources of risk including fraud and other external data. Risk parameters/indicators/issues that have been identified are then arranged in an operational risk register.

### Operational Risk Assessment

Risk owner with the support of the Risk Management Bureau is responsible for assessing or measuring inherent risk and residual risk of all risk parameters/risk indicators/operational risk issues in the risk register. The scope of operational risk assessment includes:

- Type of risk impact (financial/non-financial) and the level of impact (risk impact),
- Types of frequency of risk events (routine/non-routine) and the level of frequency of risk events (risk likelihood) using the impact quantification scale and frequency quantification scale.
- The level of inherent risk composite is divided into 5 (five levels), namely: *low risk*, *low to moderate risk*, *moderate risk*, *moderate to high risk* or *high risk* using a risk map.

Operational risk parameters/indicators/issues that have been measured are categorized based on the level of inherent risk composite for the mitigation and control process in accordance with operational risk appetite/risk tolerance determined by the Directors.

### Risk Mitigation and Control

Decision regarding operational risk mitigation related to such risk such as the risk accepted, risk avoid or risk residue or risk transfer represents the authority of the Board of Directors through the decision of risk appetite/risk tolerance.

Parameters/indicators/issues of immaterial operational risk or those with the level of inherent risk composite are within the range of *low risk-moderate to risk*/below the Bank's risk appetite/risk tolerance (absorb/accepted), while those with the material risk level/level of inherent composite risk within the range of *moderate to high risk-high risk*/above risk appetite/risk tolerance of the Bank must be controlled at early stage (risk residue/risk transfer).

Untuk mengendalikan risiko operasional yang terekspos pada unit kerja Bank/*risk owner*, manajemen telah menetapkan kontrol risiko, baik berupa *hard control* maupun *soft control*. Berdasarkan sifat dan fungsinya kontrol risiko dibedakan menjadi 4 kategori, yaitu:

- Directive* (peraturan perbankan, kebijakan dan prosedur Bank)
- Preventive* (pencegahan)
- Corrective* (perbaikan/koreksi)
- Detective* (identifikasi/investigasi)

Isu risiko operasional yang telah dilengkapi dengan atribut-atribut risiko (*risk cause, loss event type, line of bisnis, product, dll*), diinput ke dalam database Aplikasi OPRA untuk proses pemantauan dan pelaporan risiko operasional. Jumlah database isu risiko operasional Bank yang harus dikendalikan oleh *risk owner* sebanyak 1.970 *risk issue*, terdiri dari 1.450 *risk issue* kantor pusat dan 520 *risk issue* kantor cabang serta jumlah kontrol risiko yang telah diregister 765 kontrol.

Pejabat atau karyawan Bank terkait (*risk owner*) bertanggungjawab untuk memastikan bahwa kontrol risiko yang telah ditetapkan oleh manajemen tersedia dalam kondisi baik dan dilaksanakan secara efektif dan efisien agar isu risiko operasional yang berpotensi menimbulkan kerugian bank dapat dihindari/tidak terjadi.

### Pemantauan Risiko Operasional

Pemantauan risiko operasional dimaksudkan untuk memastikan bahwa pejabat atau karyawan terkait (*risk owner*) telah melakukan pengendalian risiko operasional dengan baik dan tingkat risiko sisa (*residual risk*) berada pada kisaran yang dapat diterima Bank (*low risk-moderate risk*).

Proses pemantuan risiko operasional, Bank menggunakan system aplikasi *Operational Assessor (OPRA)* berbasis website, dengan cakupan pemantauan dan pelaporan sebagai berikut:

#### a. Risk & Control Self-Assessment (RCSA) regular dan risk IT

Pemantauan dengan RCSA dilakukan setiap enam bulanan (semesteran) untuk memprediksi tingkat risiko operasional enam bulan ke depan berdasarkan efektifitas kontrol dan data historis enam bulan terakhir.

RCSA merupakan proses evaluasi dan penilaian terhadap ketersediaan, kondisi dan pelaksanaan kontrol risiko (efektifitas kontrol) dalam menurunkan tingkat risiko inheren (*inherent risk*) menjadi tingkat risiko sisa (*residual risk*) yang dapat diterima Bank.

Jika kontrol risiko tidak tersedia/kondisi kontrol tidak baik/pelaksanaan kontrol tidak sesuai Buku Pedoman Operasi atau *best banking practice*, maka kontrol dinilai lemah *weak*/tidak efektif sehingga tingkat *residual risk*

To control operational risks exposed to the Bank's unit/*risk owner*, management has established risk controls, both in the form of hard controls and soft controls. Based on the nature and function of risk control, they can be divided into 4 categories, namely:

- Directive* (banking regulations, bank policies and procedures)
- Preventive*
- Corrective* (repair/correction)
- Detective* (identification/investigation)

Operational risk issues that have been equipped with risk attributes (*risk causes, loss event types, line of business, products, etc.*) are keyed-in into the OPRA Application database for the process of monitoring and reporting operational risks. The number of Bank operational risk issue database that must be controlled by risk owners includes 1,970 risk issues, consisting of 1,450 head office risk issues and 520 branch office risk issues as well as the number of risk controls that have been registered with 765 controls.

The Bank's official or employee (*risk owner*) is responsible for ensuring that risk control determined by management is available in good condition and is conducted effectively and efficiently so as to avoid any issues of operational risk that potentially incurs losses on the Bank.

### Operational Risk Oversight

Operational risk monitoring is intended to ensure that the officials or employees concerned (*risk owners*) have properly controlled operational risks and the level of residual risk is within the acceptable range of the Bank (*low risk-moderate risk*).

As for the operational risk monitoring process, the Bank utilizes a website-based Operational Assessor (OPRA) application system, with the following monitoring and reporting scopes:

#### a. Regular Risk & Control Self-Assessment (RCSA) and IT risk

Monitoring with RCSA is conducted every six months (every semester) to make projection on the level of operational risk in the next six months based on the effectiveness of controls and historical data of the last six months.

RCSA is a process of assessing and evaluating the availability, condition and implementation of risk controls (effectiveness of controls) in decreasing the level of inherent risk to the level of residual risk that is acceptable to the Bank.

If the risk control is not available/the control is not in good condition/the control implementation is not in accordance with the Operations Manual or best banking practice, then the control is considered weak/ineffective

isu risiko operasional tinggi (*moderate to high risk-high risk*). Untuk itu, *risk owner* harus membuat rencana tindak perbaikan (*action plan*) terhadap kontrol risiko yang lemah (*weak*) tersebut.

Dengan dukungan Aplikasi OPRA *web base processes Risk&Control Self Assessment* (RCSA) dapat menampilkan peta risiko/profil risiko operasional setiap satuan kerja Bank (divisi/biro/group/cabang) dan secara Bank *wide* secara otomatis.

b. Manajemen Insiden Risiko Operasional

Selain RCSA, Bank juga melakukan pemantauan terhadap insiden kejadian risiko operasional untuk mengkaji efektifitas penerapan manajemen operasional yang telah dilakukan Bank. Manajemen Insiden Risiko Operasional dilakukan melalui pencatatan atas insiden/kejadian kesalahan terkait risiko operasional baik yang menimbulkan kerugian *financial* (*loss event data*) maupun yang hampir menimbulkan kerugian finansial (*near miss*). Jika frekuensi kejadian/nominal insiden risiko operasional tinggi, artinya penerapan manajemen risiko operasional masih perlu ditingkatkan.

**Penjelasan tentang Three Lines of Defense**

Peningkatan kepedulian *stakeholder* terhadap Manajemen Risiko Operasional Bank dan tata kelola yang baik, mendorong pembentukan fungsi-fungsi seperti auditor internal, manajemen risiko, dan kepatuhan (*compliance officer*) dengan tugas dan wewenang yang terkadang tumpang tindih.

Oleh karena itu, diperlukan model koordinasi tiga lapis pertahanan (*three lines of defense*) agar berfungsi dan dapat mengelola risiko operasional Bank secara efisien dan efektif. Berikut ketiga lapisan tersebut:

- a. Lapis pertama adalah satuan kerja bisnis dan operasional (divisi/biro/group/cabang) PaninBank sebagai *risk owner* yang bertanggung jawab untuk menerapkan pengendalian internal dan pengelolaan risiko dalam pekerjaan sehari-hari. Mereka pun bertugas untuk melakukan tindakan korektif dalam mengatasi kelemahan pada proses dan pengendalian.
- b. Lapis kedua adalah Biro Manajemen Risiko dan Biro Kepatuhan yang berfungsi membantu membangun dan memantau pengendalian lapis pertama. Meskipun tidak sepenuhnya independen, fungsi-fungsi ini memastikan lapis pertama dirancang, diterapkan, dan dioperasikan dengan memadai.
- c. Lapis ketiga adalah Biro Pengawasan Pemeriksaan (Audit Internal) yang memberikan pemastian (*assurance*) independen terhadap tata kelola, manajemen risiko, dan pengendalian internal. Mereka bertugas juga untuk memastikan lapis pertama dan kedua berhasil mencapai sasaran manajemen risiko dan pengendalian yang telah ditetapkan.

resulting to a high residual risk level of operational risk issues (*moderate to high risk-high risk*). For this reason, the risk owner must develop an action plan for the weak risk control.

With the support of the OPRA Application web-based processes, Risk & Control Self Assessment (RCSA) can display risk maps/operational risk profiles of each Bank unit (division/bureau/group/branch) and Bank wide on an automated basis.

b. Operational Risk Incident Management

In addition to RCSA, the Bank also monitors the incidents of operational risk events to review the effectiveness of the implementation of operational management that has been conducted by the Bank. Management of Operational Risk Incidents is performed by recording incidents/errors that are related to operational risks that trigger financial loss (*loss event data*) or that nearly trigger financial loss (*near miss*). If the frequency of events/nominal operational risk incidents is high, it means that the implementation of operational risk management still needs improvements.

**Discussion on Three Lines of Defense**

Increasing stakeholder awareness of the Bank's Operational Risk Management and good governance has encouraged the establishment of functions such as internal auditors, risk management, and compliance officers with duties and authorities that are sometimes overlapping.

Accordingly, a three-line defense coordination model is required in order to function and be able to manage the Bank's operational risks efficiently and effectively. The three layers are as follows:

- a. The first layer is PaninBank's business and operational unit (division/bureau/group/branch) as a risk owner who is responsible for implementing internal control and risk management on a day-to-day basis. They are also assigned to take corrective action in managing weaknesses in the process and control.
- b. The second layer is the Risk Management Bureau and the Compliance Bureau whose function is to assist in building and monitoring the first layer of control. Though not completely independent, these functions ensure the first layer is properly designed, implemented and operated.
- c. The third layer is the Inspection Oversight Bureau (Internal Audit) which provides independent assurance of governance, risk management and internal control. They are also tasked to ensure that the first and second layers successfully achieve the established risk management and control goals.

Direksi harus memastikan bahwa ketiga lapis pertahanan ini berjalan dengan baik. Selain tiga lapis tersebut masih terdapat lapis tambahan, yaitu auditor eksternal dan regulator yang juga memegang peranan dalam keseluruhan tata kelola Bank.

### Penerapan Basel dalam Risiko Operasional

Risiko operasional menurut Basel adalah risiko yang diakibatkan oleh kegagalan/tidak memadainya proses internal, manusia, sistem dan akibat kejadian eksternal termasuk hukum dan regulasi. Penerapan Manajemen Risiko Operasional menurut Basel II menggunakan pendekatan 3 pilar, yaitu:

1. Pilar I mencakup persyaratan modal minimum (*capital requirement*) untuk risiko operasional
2. Pilar II adalah *supervisory review*. Ini adalah penetapan persyaratan modal yang dihitung menurut pilar I.
3. Pilar III yakni *disclosure* atau disiplin pasar, yang menjelaskan mengenai pengungkapan penerapan dan hasil penerapan manajemen risiko operasional kepada publik (transparansi).

Sejak diterbitkannya Basel II, penyediaan modal minimum Bank yang awalnya hanya mencakup risiko kredit dan pasar, diperluas menjadi termasuk risiko operasional. Untuk perhitungan modal minimum risiko operasional, Basel II menyediakan tiga pendekatan, yaitu:

1. *Basic Indicator Approach* (pendekatan indikator dasar)
2. *Standardized Approach* (pendekatan standar)
3. *Advance Measurement Approach* (internal model)

Sesuai Surat Edaran Bank Indonesia No. 11/3/DPNP mengenai Perhitungan Aset Tertimbang Menurut Risiko (ATMR) untuk Risiko operasional dengan menggunakan Pendekatan Indikator Dasar (PID), semua Bank Konvensional di Indonesia wajib menghitung ATMR risiko operasional, minimal menggunakan Pendekatan Indikator Dasar (PID), termasuk dengan PaninBank.

### Risiko Likuiditas

Risiko likuiditas adalah risiko akibat ketidakmampuan Bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuiditas berkualitas tinggi yang dapat digunakan tanpa mengganggu aktivitas dari kondisi keuangan PaninBank.

### Upaya Pengelolaan Risiko

Dalam rangka mengelola Risiko Likuiditas secara terukur dan komprehensif, PaninBank menerapkan strategi antara lain:

1. Menetapkan limit-limit yang mengacu pada ketentuan internal dan ketentuan perundang-undangan yang berlaku.
2. Melakukan *stress testing* risiko likuiditas secara berkala untuk mengetahui dampak perubahan faktor pasar maupun faktor internal pada kondisi ekstrim terhadap kondisi likuiditas.

Board of Directors must ensure that all three layers of defense have been well operated. In addition to these three layers, there are still additional layers, namely external auditors and regulators who also play a role in the overall governance of the Bank.

### Basel Implementation in Operational Risk

Operational risk according to Basel is the risk posed by the failure/inadequacy of internal processes, people, systems and effects of external matters including laws and regulations. Implementation of Operational Risk Management according to Basel II adopts a 3 pillar approach, namely:

1. Pillar I covers the minimum capital requirements for operational risk
2. Pillar II, which is a supervisory review, determines the capital requirements calculated according to pillar I.
3. Pillar III, which is disclosure or market discipline, provides the disclosure of the implementation and results of the implementation of operational risk management to the public (transparency).

Since the issuance of Basel II, the Bank's minimum capital supply, which initially only covered credit and market risks, has expanded to include operational risk. For the calculation of the minimum capital for operational risk, Basel II provides three approaches, namely:

1. Basic Indicator Approach
2. Standardized Approach
3. Advance Measurement Approach (internal model)

In accordance with Bank Indonesia Circular Letter No.11/3/DPNP concerning Calculation of Risk Weighted Assets (RWA) for operational risks using the Basic Indicator Approach (PID), all Conventional Banks in Indonesia are required to calculate RWA for operational risk, minimally using the Basic Indicator Approach (PID), including PaninBank.

### Liquidity Risk

Liquidity risk represents the risk due to the inability of the Bank to meet its maturing liabilities from cash flow funding sources and/or high quality liquidity assets that can be utilized without disrupting the activities of PaninBank's financial condition.

### Risk Management Efforts

In order to manage liquidity risks in a measured and comprehensive manner, PaninBank implements strategies including:

1. Setting the limits that refer to internal conditions and prevailing legal provisions.
2. Conducting stress testing of liquidity risk on a regular basis to determine the impact of changes in market factors and internal factors in extreme conditions on liquidity.

3. Memonitor indikator-indikator eksternal serta informasi pasar terkini. Hal ini bertujuan untuk meningkatkan kewaspadaan terhadap kondisi ekonomi yang kurang stabil, baik karena kondisi krisis global maupun karena berbagai isu di dalam negeri.

### Organisasi Manajemen Risiko Likuiditas

Dewan Komisaris dan Direksi bertanggung jawab untuk memastikan bahwa penerapan Manajemen Risiko Likuiditas telah sesuai dengan tujuan strategis, skala, karakteristik bisnis dan profil risiko likuiditas Bank, termasuk memastikan integrasi penerapan manajemen risiko likuiditas dengan risiko-risiko lainnya yang dapat berdampak pada posisi likuiditas Bank.

Bank melakukan identifikasi risiko likuiditas, baik eksposur risiko saat ini maupun yang akan timbul di masa yang akan datang. Identifikasi risiko likuiditas merupakan proses yang berkelanjutan dan dilakukan secara berkala. Likuiditas Bank dipengaruhi oleh struktur pendanaan, likuiditas aset, kewajiban pada *counterparty*, dan komitmen kredit kepada debitur.

Risiko likuiditas Bank diukur melalui beberapa indikator antara lain rasio Giro Wajib Minimum (*primary reserve*), cadangan likuiditas (*secondary reserve*) dan *Loan to Funding Ratio* (LFR) serta *Liquidity Coverage Ratio* (LCR). Bank telah memenuhi LCR dengan rasio di atas minimum yang ditentukan oleh regulator, serta *Net Stable Funding Ratio* (NSFR) yang bank telah memperhitungkan dan memenuhi rasio di atas minimum ketentuan regulator.

### Kebijakan di Bidang Risiko Likuiditas

Bank memiliki relasi yang baik dengan *counterparty* sehingga apabila mengalami posisi *short* Bank dapat dengan mudah memanfaatkan pinjaman jangka pendek dari interbank. Kaji ulang terhadap *liquidity gap limit* telah dilakukan secara berkala dengan memperhatikan kebutuhan dan rencana bisnis Bank.

Bank mengelola risiko likuiditas dengan menetapkan limit-limit yang mengacu pada ketentuan regulator maupun internal Bank. Pengelolaan likuiditas Bank sudah dilakukan dengan baik dengan mengukur kondisi likuiditas Bank di masa mendatang dengan memproyeksikan melalui metodologi *liquidity gap* yang merupakan maturity mismatch antara komponen-komponen aset dan liabilitas termasuk *off balance sheet* yang disusun ke dalam periode waktu (*time bucket*) berdasarkan *contractual maturity* ataupun *behavioral maturity*.

Bank juga melakukan pemantauan likuiditas melalui *buffer* likuiditas secara mingguan dalam menjaga ketersediaan aset likuid berupa *interbank placement*, *Term Deposit* BI dan surat-surat berharga likuid seperti SBI, SBN, dengan

3. Monitoring external indicators and the latest market information. This aims to increase awareness of unstable economic conditions, both due to global crisis conditions and various domestic issues.

### Liquidity Risk Management Organization

The Board of Commissioners and the Board of Directors are responsible for ensuring that the implementation of Liquidity Risk Management is in accordance with the Bank's strategic objectives, scale, business characteristics and liquidity risk profile, including ensuring the integration of liquidity risk management with other risks that may have an impact on the Bank's liquidity position.

The Bank identifies its liquidity risks, both current and future risk exposures. Liquidity risk identification is an ongoing process and is conducted on a regular basis. The Bank's liquidity is influenced by the funding structure, asset liquidity, liabilities to counterparties, and credit commitments to debtors.

The Bank's liquidity risk is measured through several indicators including the minimum reserve requirement ratio (*primary reserve*), liquidity reserve (*secondary reserve*) and *Loan to Funding Ratio* (LFR) and *Liquidity Coverage Ratio* (LCR). The Bank has met the LCR requirement with a ratio above the minimum amount required by the regulator, as well as a *Net Stable Funding Ratio* (NSFR) which the Bank has calculated and met as well pertaining to the ratio above the minimum regulatory requirements.

### Policy in Liquidity Risk

The Bank maintains a good relationship with counterparties; accordingly, in the event that the Bank experiences a short position, the Bank can easily benefit from interbank short-term loans. A review of the liquidity gap limit has been conducted on a regular basis by taking into account the Bank's needs and business plans.

The Bank manages its liquidity risk by setting limits that refer to regulatory and internal provisions of the Bank. The Bank's liquidity management has been well performed by measuring the condition of the Bank's liquidity in the future by projecting through the liquidity gap methodology, which is a maturity mismatch between components of assets and liabilities, including off balance sheets arranged into time buckets based on contractual maturity or behavioral maturity.

The Bank also monitors liquidity through liquidity buffers on a weekly basis to maintain the availability of liquid assets in the form of interbank placement, BI Term Deposit and liquid securities such as SBI, SBN, with an amount sufficient to

jumlah yang memadai guna melindungi Bank dari potensi risiko likuiditas. Bank juga melakukan *stress testing* terhadap risiko likuiditas secara berkala dan telah memiliki Rencana Pendanaan Darurat (*Contingency Funding Plan*).

### Strategi Pendanaan

Strategi pendanaan mencakup strategi diversifikasi sumber dan jangka waktu pendanaan yang dikaitkan dengan karakteristik dan rencana bisnis Bank. Dalam hal ini Bank mengidentifikasi dan memantau faktor utama yang mempengaruhi kemampuan Bank untuk memperoleh dana, termasuk mengidentifikasi dan memantau alternatif pendanaan yang dapat memperkuat kapasitasnya untuk bertahan pada kondisi krisis.

### Mitigasi Risiko Likuiditas

Dalam upaya mitigasi risiko likuiditas, Bank menetapkan panduan untuk mengukur dan memitigasi risiko likuiditas, termasuk batasan *secondary reserves*, batasan *interbank overnight borrowing*, *liquidity coverage ratios* dan *net stable funding ratio*. Bank juga mengidentifikasi dan mengembangkan Indikator Peringatan Dini (*Early Warning Indicators*) serta menerapkan Rencana Pendanaan Darurat (*Contingency Funding Plan*) dalam beberapa tingkatan untuk memitigasi risiko.

### Pengukuran dan Pengendalian Risiko Likuiditas

Pengukuran risiko likuiditas dilakukan secara berkala dan komprehensif dengan memantau proyeksi arus kas, laporan profil maturitas, rasio likuiditas dan skenario *stress test*. *Stress test* dilakukan berdasarkan skenario *stress* secara spesifik pada bank (*bank specific stress scenario*) dan *scenario stress* pada pasar (*general market stress scenario*).

Pemantauan risiko likuiditas dilakukan dengan tujuan agar jika terjadi peningkatan potensi risiko likuiditas dapat segera dimitigasi atau dilakukan penyesuaian secara tepat waktu terhadap strategi manajemen risiko likuiditas.

### Kondisi Likuiditas Bank berdasarkan perhitungan NSFR

Pada tahun 2019, OJK mengimplementasikan ketentuan Rasio Pendanaan Stabil Bersih (*Net Stable Funding Ratio/ NSFR*). Berdasarkan perhitungan NSFR pada tahun 2019, baik secara individu maupun konsolidasi, rasio NSFR Bank berada di atas syarat minimum yang ditetapkan.

### Risiko Hukum

Risiko hukum adalah risiko akibat tuntutan hukum dan/atau kelemahan aspek yuridis. Risiko Hukum timbul antara lain karena ketiadaan peraturan perundang-undangan yang mendukung atau kelemahan perikatan seperti tidak dipenuhinya syarat sahnya kontrak atau pengikatan agunan yang tidak sempurna.

protect the Bank from potential liquidity risk. The Bank also conducts stress testing on liquidity risk on a regular basis and maintains a Contingency Funding Plan.

### Financing Strategy

The funding strategy includes a strategy of diversification of sources and funding periods associated with the characteristics and business plans of the Bank. In this case the Bank identifies and monitors the main factors that influence the Bank's ability to obtain funds, including identifying and monitoring alternative funding that can strengthen its capacity to withstand crisis conditions.

### Liquidity Risk Mitigation

In an effort to mitigate liquidity risk, the Bank has set guidelines to measure and mitigate liquidity risk, including secondary reserve limits, interbank overnight borrowing limits, liquidity coverage ratio and net stable funding ratio. The Bank also identifies and develops Early Warning Indicators and implements Contingency Funding Plans at several levels to mitigate risk.

### Liquidity Risk Assessment and Control

Liquidity risk measurement is conducted on a regular and comprehensive basis by monitoring cash flow projections, maturity profile reports, liquidity ratios and stress test scenarios. Stress tests are performed based on bank specific stress scenarios and general market stress scenarios.

Liquidity risk monitoring is conducted with the aim that should there be an increase in potential liquidity risk, such risk can be mitigated on an immediate basis or be timely adjusted to the liquidity risk management strategy.

### Bank Liquidity Condition based on NSFR Calculation

In 2019, OJK implemented the requirement of Net Stable Funding Ratio (NSFR). Based on NSFR calculations in 2019, both at Bank only and on a consolidated level, the Bank's NSFR ratio is above the minimum requirement.

### Legal Risk

Legal risk is the risk due to lawsuits and/or legal weaknesses. Legal risks shall arise, among others, due to the absence of supporting legislation or weaknesses in the agreement such as non-fulfillment of contract legal requirements or imperfect collateral binding.

### Upaya Pengelolaan Risiko

Mekanisme pengelolaan Risiko Hukum meliputi proses identifikasi pengukuran, pengendalian dan pemantauan mengacu kepada ketentuan yang berlaku mengenai manajemen risiko. Setiap unit kerja pemilik dan atau pelaksana produk maupun penyelenggara aktivitas, wajib mengidentifikasi dan mengelola risiko secara maksimal termasuk namun tidak terbatas pada risiko hukum yang pada dasarnya melekat pada setiap produk atau aktivitas yang dibuat atau dilaksanakan oleh PaninBank. Dengan demikian tidak akan berdampak luas dan menjadi pemicu timbulnya risiko-risiko lain termasuk tetapi tidak terbatas pada risiko reputasi.

### Pengawasan Aktif Dewan Komisaris dan Direksi

Direksi dan Dewan Komisaris PaninBank telah memahami risiko hukum yang dihadapi Bank dan senantiasa memberikan arahan yang jelas, pengawasan dan mitigasi secara aktif serta berupaya mengembangkan budaya Manajemen Risiko hukum secara menyeluruh dan berkelanjutan.

Pengawasan aktif Dewan Komisaris dalam manajemen risiko hukum, dilakukan dengan membentuk Komite Pemantau Risiko (KPR) yang dipimpin oleh Komisaris Independen dengan empat orang anggota yang terdiri dari dua orang Komisaris dua orang *officer* senior. KPR melakukan pertemuan dua kali dalam setahun untuk mengevaluasi penerapan Manajemen Risiko Hukum Bank dan memastikan berjalan sesuai kerangka kerja yang ditetapkan Direksi dan memberikan masukan kepada Dewan Komisaris.

Pengawasan aktif Direksi dalam manajemen risiko hukum dilakukan dengan membentuk Komite Manajemen Risiko (KMR) yang anggotanya, terdiri dari anggota tetap diisi oleh mayoritas Direksi PaninBank yang berjumlah sembilan orang dan anggota tidak tetap diisi oleh pejabat eksekutif terkait setara kepada divisi/biro/group. KMR melakukan pertemuan minimal dua kali dalam setahun untuk memberikan masukan kepada Direktur Utama terkait penerapan Manajemen Risiko Hukum.

### Kebijakan terkait Kecukupan Kebijakan, Prosedur dan Penetapan Limit

Untuk menerapkan Manajemen Risiko Hukum yang efektif, PaninBank telah memiliki kebijakan, prosedur dan penetapan limit manajemen risiko hukum yang menjadi pedoman kerangka kerja dalam pengelolaan risiko hukum Bank. Kerangka kerja manajemen risiko hukum Bank telah dilengkapi dengan limit risiko hukum yang ditetapkan berdasarkan strategi dan tujuan bisnis Bank serta kemampuan Bank dalam mengambil risiko (*risk bearing capacity*).

Kebijakan, Prosedur dan Limit risiko Hukum Bank telah dikomunikasikan kepada seluruh satuan kerja, manajer, dan staf yang relevan agar dipahami secara jelas dan diimplementasikan dalam operasional dan bisnis Bank sehari-hari.

### Risk Management Efforts

Legal Risk management mechanism includes the process of identifying measurements, control and monitoring by referring to the applicable provisions regarding risk management. Each unit of the product owner and/or executor or activity organizer must optimally identify and manage risks including but not limited to legal risks that are inherent in each product or activity prepared or implemented by PaninBank. Accordingly, such risk will not widely create impact and trigger other risks, including but not limited to reputational risk.

### Active Oversight of Board of Commissioners and Directors

PaninBank's Board of Directors and Commissioners understand the legal risks encountered by the Bank and at all times provide clear guidelines, active supervision and mitigation and seek to develop a legal and comprehensive legal Risk Management culture.

The active supervision of the Board of Commissioners in legal risk management is conducted by establishing a Risk Oversight Committee (KPR) headed by an Independent Commissioner with four members consisting of two Commissioners and two senior officers. KPR holds meetings twice a year to evaluate the implementation of the Bank's Legal Risk Management, ensures its operation has been made in accordance with the framework set by the Directors and provides input to the Board of Commissioners.

Board of Directors' active supervision in legal risk management is conducted by establishing a Risk Management Committee (KMR) whose members consist of permanent members from the majority of PaninBank Directors totaling nine individuals and non-permanent members from relevant executives equivalent to divisions/bureaus/groups. KMR holds meetings at least twice a year to provide input to the President Director regarding the implementation of Legal Risk Management.

### Policies related to Adequacy of Policies, Procedures and Decision of Threshold

To implement effective Legal Risk Management, PaninBank maintains established policies, procedures and legal risk management limits that serve as a framework for the management of the Bank's legal risk. The Bank's legal risk management framework has been equipped with legal risk limits established based on the Bank's business strategy and objectives as well as the Bank's risk bearing capacity.

The Bank's Policies, Procedures and Legal Risk Limits have been communicated to all relevant work units, managers and staff so that they are clearly understood and implemented in the Bank's daily operations and business.

## Mekanisme Pengelolaan dan Pengendalian Risiko Hukum

Untuk memitigasi Risiko Hukum, Bank membentuk Satuan Kerja hukum yang terdiri dari *Credit Recovery & Restructuring* yang membawahi Tugas Khusus Kantor Pusat (STKP), Departemen *Legal Affair*, Biro Hukum dan SAM Cabang.

Semua aktivitas operasional dan bisnis Bank yang terekspos risiko hukum seperti penerbitan produk/aktivitas baru, perikatan kredit, kontrak/kerja sama harus di-review dan memperoleh legal opini dari satuan kerja hukum untuk memastikan kesesuaian dan kecukupan yuridis/pengikatan perjanjian antara Bank dengan para pihak sebagai prinsip kehati-hatian dalam rangka melindungi kepentingan Bank.

Satuan kerja hukum bersama unit kerja terkait senantiasa melakukan pemantauan terhadap potensi terjadinya tuntutan hukum/litigasi, memberikan pendampingan hukum kepada pejabat/petugas Bank yang terlibat dalam permasalahan hukum dan penyelesaian perkara hukum, baik melalui pengadilan maupun di luar pengadilan.

Output dari pengelolaan risiko hukum adalah profil risiko hukum Bank berada pada kisaran *low risk*, dengan tingkat risiko inheren "*Low Risk*" dan tingkat Kualitas Penerapan Manajemen Risiko (KPMR) yaitu "*Satisfactory*".

### Risiko Strategik

Sesuai POJK Nomor 5 Tahun 2016 tentang Rencana Bisnis, Direksi PaninBank telah menetapkan rencana bisnis Bank sebagai gambaran rencana usaha Bank jangka pendek (satu tahun) dan jangka menengah (tiga tahun). Dalam penetapan rencana bisnis tersebut, Bank terekspos risiko strategik, yaitu risiko akibat ketidaktepatan dalam pengambilan dan/atau pelaksanaan suatu keputusan strategik serta kegagalan dalam mengantisipasi perubahan lingkungan bisnis.

### Upaya Pengelolaan Risiko

PaninBank telah membentuk Komite Manajemen Risiko dan Satuan Kerja Manajemen Risiko yang bertujuan untuk menunjang pengelolaan risiko yang menyeluruh, terpadu, terukur dan terkendali. Setiap komite ini didukung oleh grup kerja (*working group*) yang anggotanya terdiri dari grup-grup yang terkait langsung dengan permasalahan risiko yang termasuk dalam cakupan komite dimaksud.

Pengelolaan risiko PaninBank diatur dalam suatu kebijakan manajemen risiko bank yang disusun dengan mengacu pada Peraturan Bank Indonesia, Peraturan OJK, ketentuan Basel dan *international best practices*. Kebijakan ini ditinjau secara rutin untuk mengantisipasi perubahan kondisi bisnis, regulasi, dan kondisi internal PaninBank.

Dalam melakukan pengelolaan risiko strategis, PaninBank senantiasa melakukan *review* kinerja dan evaluasi kebijakan penyusunan target bisnis dan melakukan langkah-langkah

## Mechanism of Legal Risk Management and Control

To mitigate Legal Risk, the Bank established a Legal Unit made up of Credit Recovery & Restructuring which oversees the Special Task of the Head Office (STKP), the Legal Affairs Department, the Legal Bureau and the Branch SAM.

All operational and business activities of the Bank that are exposed to legal risks such as the issuance of new products/activities, credit agreements, contracts/cooperation must be reviewed and must obtain legal opinion from legal work units to ensure juridical suitability/adequacy/binding agreements between the Bank and the parties as a prudent principle in order to protect the interests of the Bank.

The legal unit along with the related business unit constantly monitors potential lawsuits/litigation, provides legal assistance to Bank officials/officers involved in legal issues and the resolution of legal cases, both through the court and outside the court.

The output of legal risk management is the Bank's legal risk profile ranging from low risk, inherent "*Low Risk*" and "*Satisfactory*" level of Quality of Risk Management Implementation (KPMR).

### Strategic Risk

In accordance with POJK No.5 of 2016 concerning Business Plans, PaninBank's Directors have established the Bank's business plan as an illustration of the Bank's short-term (one-year) and medium-term (three-year) business plans. In determining the business plan, the Bank is exposed to strategic risk, which is the risk due to inaccuracy in preparing and/or implementing a strategic decision and failure to anticipate changes in the business environment.

### Risk Management Efforts

PaninBank has established Risk Management Committee and Risk Management Unit that aims to support comprehensive, integrated, measured and controlled risk management. Each committee is supported by a working group whose members consist of groups that are directly related to the risk issues within the scope of the committee.

PaninBank's risk management is governed in a bank risk management policy compiled by referring to Bank Indonesia Regulations, OJK Regulations, Basel regulations and international best practices. Such policy is regularly reviewed to anticipate changes in PaninBank's business conditions, regulations and internal conditions.

In the conduct of its strategic risk management, PaninBank at all times reviews the performance and evaluates the policies for establishing business targets and also takes corrective

perbaikan dalam menyusun rencana strategi dan target bisnis dengan mempertimbangkan kondisi internal dan eksternal, apabila diperlukan. Untuk mengukur kemajuan pencapaian rencana bisnis, PaninBank telah melakukan antara lain:

1. Identifikasi, pengukuran, pemantauan risiko strategik dan penyusunan laporan profil risiko strategik secara berkala.
2. Penyusunan laporan realisasi RBB yang antara lain memuat pencapaian kinerja keuangan (realisasi vs *budget*), realisasi program kerja perusahaan/Divisi/Biro dan realisasi pengembangan/perubahan jaringan kantor.

### Organisasi Manajemen Risiko Strategik

Agar penerapan manajemen risiko strategik berjalan efektif, PaninBank memastikan adanya pembagian tugas dan tanggung jawab yang jelas dalam pengelolaan risiko Strategik, yakni sebagai berikut:

1. Pengawasan manajemen risiko strategik di tingkat Dewan Komisaris dilakukan oleh Komite Pemantau Risiko (KPR), berfungsi untuk memberikan masukan kepada dewan komisaris terkait penerapan Manajemen Risiko Strategik Bank.
2. Di tingkat Direksi tanggung jawab pengelolaan risiko dilakukan oleh Komite Manajemen Risiko (KMR), Komite Pengarah Teknologi Informasi (KPTI) dan Komite Penerbitan Produk atau Aktivitas Baru, berfungsi untuk memberikan rekomendasi kepada Direktur Utama terkait Kebijakan Manajemen Risiko Strategik, perbaikan/penyempurnaan penerapan Manajemen Risiko Strategik dan keputusan bisnis yang menyimpang dari prosedur normal (*irregulatoris*).
3. Biro Administrasi Keuangan (BAK) sebagai Koordinator Jenis Strategik dan membantu Direksi dalam mengelola risiko strategik dan memfasilitasi manajemen perubahan dalam rangka pengembangan perusahaan secara berkelanjutan.
4. Satuan Kerja Manajemen Risiko yang independen dari *risk owner/risk taking unit* yang bertugas memantau dan memastikan penerapan manajemen risiko strategik pada seluruh aktivitas operasional dan bisnis Bank berjalan efektif sesuai ketentuan Direksi.
5. Semua satuan kerja Bank (divisi/biro/group/cabang) sebagai *risk owner/risk taking unit* yang bertanggung jawab mengelola risiko risiko strategik yang terekspos dalam unit kerjanya.
6. Sedangkan untuk mengkaji ulang pengelolaan risiko strategik dilakukan oleh Satuan Kerja Audit Intern yang Independen terhadap *risk owner/risk taking unit*.

### Manajemen Risiko Strategik

Untuk memitigasi risiko strategik, rencana bisnis yang dan ditetapkan Direksi disusun secara matang dan realistis, berdasarkan prinsip kehati-hatian dan penerapan manajemen risiko dengan cakupan yang komprehensif sesuai arahan dari regulator. Melalui tahapan proses sebagai berikut:

measures in preparing strategic plans and business targets by considering internal and external conditions, as deemed necessary. To measure the progress of achieving a business plan, PaninBank has conducted among others:

1. The identification, measurement, and monitoring of strategic risk and compilation of strategic risk profile reports on a regular basis.
2. Preparation of the RBB realization report which includes the achievement of financial performance (realization vs. budget), the realization of the work program of the Bank/ Division/Bureau and the realization of the development/ change of office network.

### Strategic Risk Management Organization

In order to effectively implement strategic risk management, PaninBank ensures that there is a clear segregation of duties and responsibilities in managing strategic risk as follows:

1. Supervision of strategic risk management at the Board of Commissioners level is conducted by the Risk Monitoring Committee (KPR), which functions to provide input to the Board of Commissioners regarding the implementation of the Bank's Strategic Risk Management.
2. At the Board of Directors level, the risk management responsibility is performed by the Risk Management Committee (KMR), the Information Technology Steering Committee (KPTI) and the New Product or Activity Launch Committee, which serves to provide recommendations to the President Director regarding the Strategic Risk Management Policy, improvement/refinement of the implementation of Strategic Risk Management and irregularities in business decisions procedures.

## EVALUASI EFEKTIVITAS PENERAPAN MANAJEMEN RISIKO

Dalam rangka melaksanakan evaluasi atas efektivitas manajemen risiko, Dewan Komisaris dan Direksi secara aktif melakukan pengawasan atas pelaksanaan pengelolaan risiko melalui komite-komite di bawahnya. Agar mendapatkan data dan gambaran yang memadai mengenai langkah-langkah yang telah dijalankan dalam pengelolaan risiko, komite-komite tersebut mengadakan pertemuan secara berkala untuk membahas masalah yang terkait risiko dan memberikan rekomendasi kepada Dewan Komisaris dan Direksi.

Selain itu, evaluasi secara berkala dilakukan terhadap:

1. Kebijakan serta metodologi yang digunakan dalam penilaian berbagai jenis risiko
2. Kecukupan kebijakan, prosedur dan penetapan limit
3. Kecukupan proses identifikasi, pengukuran, pemantauan dan pengendalian risiko
4. Efektivitas sistem pengendalian internal yang menyeluruh

Secara periodik, evaluasi dan pengkinian kebijakan, prosedur dan metodologi dilakukan untuk menjaga kesesuaiannya dengan regulasi dan kondisi operasional. Evaluasi terhadap efektivitas manajemen risiko juga dilakukan melalui laporan berkala yang dikirimkan kepada Dewan Komisaris dan Direksi, antara lain Laporan Pelaksanaan Kebijakan Manajemen Risiko, Laporan Profil Risiko, *Risk Update* dan laporan terkait lainnya. Hal tersebut juga sebagai bentuk kepatuhan Bank terhadap peraturan mengenai manajemen risiko yang berlaku.

### Profil Risiko Bank

Berdasarkan hasil penilaian sendiri (self assesment) pada tahun 2019 peringkat profil risiko perseroan secara individu adalah "*Low to Moderate*". Peringkat profil risiko tersebut merupakan hasil penilaian dari peringkat risiko inheren "*Low to Moderate*" dan peringkat kualitas penerapan manajemen risiko "*Satisfactory*".

Peringkat tingkat risiko dari 8 (delapan) jenis risiko yang dinilai, yaitu Risiko Kredit, Risiko Pasar, Risiko Likuiditas, Risiko Operasional, Risiko Hukum, Risiko Reputasi, Risiko Strategik, dan Risiko Kepatuhan adalah sebagai berikut:

1. *Risiko yang memiliki peringkat "Low" adalah Pasar, Hukum, Reputasi dan Kepatuhan.*
2. *Risiko yang memiliki peringkat "Low to Moderate" adalah Kredit, Likuiditas, Operasional dan Strategik.*

Sementara itu peringkat Profil Risiko Terintegrasi pada tahun 2019 adalah "*Low*".

Peringkat Profil Risiko secara terintegrasi yang "*Low*" ini dapat tercapai karena entitas utama dan anggota Lembaga Jasa Keuangan (LJK) lainnya telah menerapkan proses manajemen risiko secara cukup efektif dan efisien pada seluruh aktivitasnya.

## EVALUATION ON THE EFFECTIVENESS OF RISK MANAGEMENT APPLICATION

In evaluating the effectiveness of risk management, the Board of Commissioners and the Board of Directors actively supervise the implementation of risk management through committees under their respective supervision. In order to obtain adequate data and an overview of the measures implemented in risk management, the committees hold regular meetings to discuss issues related to risk and provide recommendations to the Board of Commissioners and Directors.

In addition, periodic evaluations are carried out on:

1. Policies and methodologies used in the assessment of various types of risk
2. Adequacy of policies, procedures and limit setting
3. Adequacy of the process of identification, measurement, monitoring and risk control
4. Effectiveness of a comprehensive internal control system

Periodically, evaluation and updating of policies, procedures and methodologies are carried out to maintain compliance with regulations and operational conditions. An evaluation of the effectiveness of risk management is also carried out through periodic reports sent to the Board of Commissioners and Directors, including the Risk Management Policy Implementation Report, Risk Profile Report, Risk Update and other related reports. It is also a form of the Bank's compliance with applicable risk management regulations.

### Bank Risk Profile

Based on the results of self-assessment in 2019, the Company's risk profile rating individually is "*Low to Moderate*". The rating results from the inherent risk rating of "*Low to Moderate*" and the risk management implementation rating of "*Satisfactory*".

The risk rating consists of 8 (eight) types of risks assessed, namely Credit Risk, Market Risk, Liquidity Risk, Operational Risk, Legal Risk, Reputation Risk, Strategic Risk, and Compliance Risk are as follows:

The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

## **2. PENERAPAN STANDAR AKUNTANSI KEUANGAN BARU DAN REVISI (PSAK) DAN INTERPRETASI STANDAR AKUNTANSI KEUANGAN (ISAK)**

### **a. Standar, Amandemen/penyesuaian dan Interpretasi Standar yang Berlaku Efektif Pada Tahun Berjalan**

Dalam tahun berjalan, Grup telah menerapkan standar dan sejumlah amandemen/penyesuaian/interpretasi PSAK yang relevan dengan operasinya dan efektif untuk periode akuntansi yang dimulai pada atau setelah 1 Januari 2019.

#### **PSAK 22 (penyesuaian) *Kombinasi Bisnis***

Amandemen PSAK 22 mengklarifikasi bahwa ketika suatu entitas memperoleh pengendalian atas bisnis yang merupakan suatu operasi bersama, entitas tersebut menerapkan persyaratan untuk kombinasi bisnis yang dilakukan secara bertahap, termasuk pengukuran kembali kepentingan yang dimiliki sebelumnya dalam operasi bersama pada nilai wajar. Kepentingan yang dimiliki sebelumnya yang akan diukur kembali mencakup setiap aset, liabilitas, dan goodwill terkait dengan operasi bersama.

#### **PSAK 24 (amendemen) *Imbalan Kerja: Amandemen, Kurtailmen, atau Penyelesaian Program***

Amandemen ini mengklarifikasi bahwa biaya jasa lalu (atau keuntungan atau kerugian atas penyelesaian) dihitung dengan mengukur liabilitas (aset) imbalan pasti menggunakan asumsi aktuarial kini dan membandingkan imbalan yang ditawarkan dalam program dan aset program sebelum dan setelah amendemen, (atau kurtailmen atau penyelesaian program) tetapi tidak mempertimbangkan dampak batas atas aset (yang mungkin timbul ketika program imbalan pasti dalam keadaan surplus). PSAK 24 secara jelas mengatur bahwa dampak perubahan dari batas atas aset yang timbul dari perubahan program (atau kurtailmen atau penyelesaian) ditentukan dalam tahap kedua dan diakui secara normal di penghasilan komprehensif lain.

## **2. ADOPTION OF NEW AND REVISED STATEMENTS OF FINANCIAL ACCOUNTING STANDARDS (PSAK) AND INTERPRETATIONS OF PSAK (ISAK)**

### **a. Standards, Amendments/improvements and Interpretations to Standards Effective in The Current Year**

In the current year, the Group has applied a standards and a number of amendments/improvements to PSAK that are relevant to its operations and effective for accounting period beginning on or after January 1, 2019.

#### **PSAK 22 (improvement) *Business Combinations***

The amendments to PSAK 22 clarify that when an entity obtains control of a business that is a joint operation, the entity applies the requirements for a business combination achieved in stages, including remeasuring its previously held interest ("PHI") in the joint operation at fair value. The PHI to be remeasured includes any unrecognized assets, liabilities and goodwill relating to the joint operation.

#### **PSAK 24 (amendment) *Employee Benefits: Plan Amendment, Curtailment or Settlement***

The amendments clarify that the past service cost (or of the gain or loss on settlement) is calculated by measuring the defined benefit liability (asset) using updated assumptions and comparing benefits offered and plan assets before and after the plan amendment (or curtailment or settlement) but ignoring the effect of the asset ceiling (that may arise when the defined benefit plan is in a surplus position). PSAK 24 is now clear that the change in the effect of the asset ceiling that may result from the plan amendment (or curtailment or settlement) is determined in a second step and is recognized in the normal manner in other comprehensive income.

Paragraf yang berkaitan dengan pengukuran biaya jasa kini dan bunga neto atas liabilitas (aset) manfaat pasti juga telah diamandemen. Grup sekarang disyaratkan untuk menggunakan asumsi yang diperbarui dari pengukuran kembali tersebut untuk menentukan biaya jasa kini dan bunga neto untuk sisa periode pelaporan setelah perubahan program. Dalam hal bunga neto, amandemen telah menjelaskan bahwa untuk periode setelah amandemen program, bunga neto dihitung dengan mengalikan liabilitas (aset) manfaat pasti neto sebagaimana telah diukur kembali berdasarkan PSAK 24 paragraf 99 dengan tingkat diskonto yang digunakan dalam pengukuran kembali (juga memperhitungkan dampak kontribusi dan pembayaran manfaat terhadap liabilitas (aset) manfaat pasti).

#### **PSAK 26 (penyesuaian) Biaya Pinjaman**

Amendemen ini mengklarifikasi bahwa jika saldo pinjaman yang didapatkan secara spesifik masih terutang setelah aset terkait siap untuk digunakan sesuai dengan intensinya atau dijual, pinjaman itu menjadi bagian dari dana yang dipinjam secara umum ketika menghitung tingkat kapitalisasi pada pinjaman secara umum.

#### **PSAK 46 (penyesuaian) Pajak Penghasilan**

Amendemen ini mengklarifikasi bahwa suatu entitas harus mengakui konsekuensi pajak penghasilan atas dividen dalam laba rugi, penghasilan komprehensif lain atau ekuitas sesuai dengan di mana entitas awalnya mengakui transaksi yang menghasilkan laba yang dapat didistribusikan tersebut. Ini diterapkan terlepas dari apakah tarif pajak yang berbeda berlaku untuk laba yang didistribusikan dan tidak didistribusikan.

#### **PSAK 66 (penyesuaian) Pengaturan Bersama**

Amendemen PSAK 66 mengklarifikasi bahwa ketika pihak yang berpartisipasi dalam, tetapi tidak memiliki pengendalian bersama atas, suatu operasi bersama yang merupakan suatu bisnis memperoleh pengendalian bersama atas operasi bersama tersebut, entitas tidak mengukur kembali kepentingan yang dimiliki sebelumnya dalam operasi bersama.

#### **ISAK 33 Transaksi Valuta Asing dan Imbalan Dimuka**

ISAK 33 menjelaskan bagaimana menentukan 'tanggal transaksi' dengan tujuan untuk menentukan kurs yang digunakan dalam pengakuan awal aset, beban atau penghasilan terkait, bila imbalan dari pos tersebut telah dibayar atau diterima dimuka dalam valuta asing yang mengakibatkan pengakuan atas aset nonmoneter atau liabilitas nonmoneter (misalnya, deposito yang tidak dapat dikembalikan atau pendapatan yang ditangguhkan).

The paragraphs that relate to measuring the current service cost and the net interest on the net defined benefit liability (asset) have also been amended. The Group will now be required to use the updated assumptions from this remeasurement to determine current service cost and net interest for the remainder of the reporting period after the change to the plan. In the case of the net interest, the amendments make it clear that for the period post plan amendment, the net interest is calculated by multiplying the net defined benefit liability (asset) as remeasured under PSAK 24 par. 99 with the discount rate used in the remeasurement (also taking into account the effect of contributions and benefit payments on the net defined benefit liability (asset)).

#### **PSAK 26 (improvement) Borrowing Costs**

The amendments clarify that if any specific borrowing remains outstanding after the related asset is ready for its intended use or sale, that borrowing becomes part of the funds that an entity borrows generally when calculating the capitalization rate on general borrowings.

#### **PSAK 46 (improvement) Income Taxes**

The amendments clarify that an entity should recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized the transactions that generated the distributable profits. This is the case irrespective of whether different tax rates apply to distributed and undistributed profits.

#### **PSAK 66 (improvement) Joint Arrangements**

The amendments to PSAK 66 clarify that when a party that participates in, but does not have joint control of, a joint operation that is a business obtains joint control of such a joint operation, the entity does not remeasure its PHI in the joint operation.

#### **ISAK 33 Foreign Currency Transactions and Advance Consideration**

ISAK 33 addresses how to determine the 'date of transaction' for the purpose of determining the exchange rate to use on initial recognition of an asset, expense or income, when consideration for that item has been paid or received in advance in a foreign currency which resulted in the recognition of a non-monetary asset or non-monetary liability (for example, a non-refundable deposit or deferred revenue).

Interpretasi menetapkan bahwa tanggal transaksi adalah tanggal dimana entitas pertama kali mengakui aset nonmoneter atau liabilitas nonmoneter yang timbul dari pembayaran atau penerimaan imbalan dimuka. Jika terdapat beberapa pembayaran atau penerimaan dimuka, interpretasi ini mensyaratkan entitas menentukan tanggal transaksi untuk setiap pembayaran atau penerimaan imbalan dimuka.

**ISAK 34 Ketidakpastian dalam Perlakuan Pajak Penghasilan**

Interpretasi ini memberikan panduan dalam penentuan akuntansi posisi pajak ketika terdapat ketidakpastian dalam perlakuan pajak penghasilan.

Interpretasi ini mensyaratkan entitas untuk:

- menentukan apakah perlakuan pajak tidak pasti dipertimbangkan secara terpisah atau bersamaan dengan perlakuan pajak tidak pasti lainnya; dan
- menilai apakah besar kemungkinan otoritas perpajakan akan menerima perlakuan pajak tidak pasti yang digunakan oleh entitas atau yang direncanakan untuk digunakan dalam penyampaian Surat Pemberitahuan pajak penghasilannya:
  - jika besar kemungkinan otoritas perpajakan akan menerima perlakuan pajak tidak pasti, maka entitas menentukan akuntansi posisi pajak secara konsisten dengan perlakuan pajak yang digunakan atau yang direncanakan untuk digunakan dalam penyampaian Surat Pemberitahuan pajak penghasilannya.
  - Jika besar kemungkinan otoritas perpajakan tidak akan menerima perlakuan pajak tidak pasti, maka entitas merefleksikan dampak ketidakpastian tersebut dalam menentukan akuntansi posisi pajak.

Amendemen dan interpretasi di atas tidak berdampak signifikan terhadap laporan keuangan konsolidasian Grup.

The interpretation specifies that the date of transaction is the date on which the entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the interpretation requires an entity to determine the date of transaction for each payment or receipt of advance consideration.

**ISAK 34 Uncertainty over Income Tax Treatments**

The interpretation provides guidance on determining the accounting tax position when there is uncertainty over income tax treatments.

The interpretation requires an entity to:

- determine whether uncertain tax positions are assessed separately or as a group; and
- assess whether it is probable that a tax authority will accept an uncertain tax treatment used, or proposed to be used, by an entity in its income tax filings:
  - if probable, the entity should determine its accounting tax position consistently with the tax treatment used or planned to be used in its income tax filings.
  - if not probable, the entity should reflect the effect of uncertainty in determining its accounting tax position.

The amendments and interpretations listed above did not have any significant impact on the Group's consolidated financial statements.

### 3. IKHTISAR KEBIJAKAN AKUNTANSI YANG PENTING

#### a. Pernyataan Kepatuhan

Laporan keuangan konsolidasian Grup disusun sesuai dengan Standar Akuntansi Keuangan di Indonesia dan Standar Akuntansi Keuangan Syariah untuk entitas anak yang bergerak dalam bidang Perbankan Syariah, dan peraturan Bapepam-LK No. KEP 347/BL/2012 tanggal 25 Juni 2012 No. VIII.G.7 tentang Pedoman Penyajian dan Pengungkapan Laporan Emiten atau Perusahaan Publik.

#### b. Dasar Penyusunan

Dasar penyusunan laporan keuangan konsolidasian adalah biaya historis, kecuali properti dan instrumen keuangan tertentu yang diukur pada jumlah revaluasi atau nilai wajar pada setiap akhir periode pelaporan, yang dijelaskan dalam kebijakan akuntansi di bawah ini.

Biaya historis umumnya didasarkan pada nilai wajar dari imbalan yang diberikan dalam pertukaran barang dan jasa.

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam suatu transaksi teratur antara pelaku pasar pada tanggal pengukuran.

Laporan arus kas konsolidasian disusun dengan menggunakan metode langsung dengan mengelompokkan arus kas dalam aktivitas operasi, investasi dan pendanaan. Kas dan setara kas terdiri dari kas, giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain dan Sertifikat Bank Indonesia yang jatuh tempo dalam waktu tiga bulan atau kurang dari tanggal perolehannya dan yang tidak dijaminan serta tidak dibatasi penggunaannya.

Laporan keuangan entitas anak yang menjalankan usaha perbankan berdasarkan prinsip syariah disusun berdasarkan Pernyataan Standar Akuntansi Keuangan (PSAK) No. 101 (Revisi 2016) tentang "Penyajian Laporan Keuangan Syariah".

### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### a. Statement of Compliance

The consolidated financial statements of the Group have been prepared in accordance with Indonesian Financial Accounting Standards and Sharia Financial Accounting Standards for the subsidiary operates in Sharia Banking and the Bapepam-LK No. KEP 347/BL/2012 dated June 25, 2012 Regulation No. VIII.G.7 regarding the Guideline for Financial Statement Presentation and Disclosure of Issuers or Public Entities.

#### b. Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis except for certain properties financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The consolidated statements of cash flows is prepared using the direct method with classifications of cash flows into operating, investing and financing activities. Cash and cash equivalents consist of cash on hand, demand deposits with Bank Indonesia, demand deposits with other banks, placements with Bank Indonesia and other banks and Bank Indonesia Certificates (SBI) with maturities of three months or less from the date of placement and not pledged or restricted.

The financial statements of a subsidiary company engaged in sharia banking have been prepared in accordance with the Statement of Financial Accounting Standards (PSAK) No. 101 (Revised 2016) regarding "Presentation of Sharia Financial Statements".

**c. Dasar Konsolidasian**

Laporan keuangan konsolidasian menggabungkan laporan keuangan Bank dan entitas yang dikendalikan oleh Bank dan entitas anak (termasuk entitas terstruktur). Pengendalian tercapai jika Bank memiliki kekuasaan atas *investee*; eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan *investee*; dan kemampuan untuk menggunakan kekuasaannya atas *investee* untuk mempengaruhi jumlah imbal hasil investor.

Bank menilai kembali apakah Bank mengendalikan *investee* jika fakta dan keadaan mengindikasikan adanya perubahan terhadap satu atau lebih dari tiga elemen pengendalian yang disebutkan di atas.

Ketika Bank memiliki hak suara kurang dari mayoritas di *investee*, ia memiliki kekuasaan atas *investee* ketika hak suara cukup untuk memberinya kemampuan praktis untuk mengarahkan aktivitas relevan secara sepihak. Bank mempertimbangkan seluruh fakta dan keadaan yang relevan dalam menilai apakah hak suara Bank cukup untuk memberikan Bank kekuasaan, termasuk (i) ukuran kepemilikan hak suara Bank relatif terhadap ukuran dan penyebaran kepemilikan pemilik hak suara lain; (ii) hak suara potensial yang dimiliki oleh Bank, pemegang suara lain atau pihak lain; (iii) hak yang timbul dari pengaturan kontraktual lain; dan (iv) setiap fakta dan keadaan tambahan apapun mengindikasikan bahwa Bank memiliki, atau tidak memiliki, kemampuan kini untuk mengarahkan aktivitas yang relevan pada saat keputusan perlu dibuat, termasuk pola suara pemilihan dalam RUPS sebelumnya.

Konsolidasi entitas anak dimulai ketika Bank memperoleh pengendalian atas entitas anak dan akan dihentikan ketika Bank kehilangan pengendalian pada entitas anak. Secara khusus, pendapatan dan beban entitas anak diakuisisi atau dijual selama tahun berjalan termasuk dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian dari tanggal diperolehnya pengendalian Bank sampai tanggal ketika Bank berhenti mengendalikan entitas anak.

Jika diperlukan, penyesuaian dapat dilakukan terhadap laporan keuangan entitas anak agar kebijakan akuntansi sesuai dengan kebijakan akuntansi Grup.

Seluruh aset dan liabilitas dalam intra Grup, ekuitas, pendapatan, beban dan arus kas yang berkaitan dengan transaksi dalam Grup dieliminasi secara penuh pada saat konsolidasi.

**c. Basis of Consolidation**

The consolidated financial statements incorporate the financial statements of the Bank and entities (including structured entities) controlled by the Bank and its subsidiaries. Control is achieved where the Bank has the power over the investee; is exposed, or has rights, to variable returns from its involvement with the investee; and has the ability to use its power to affect its returns.

The Bank reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Bank has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Bank considers all relevant facts and circumstances in assessing whether or not the Bank's voting rights in an investee are sufficient to give it power, including (i) the size of the Bank's holding of voting rights relative to the size and dispersion of holding of the other vote holders; (ii) potential voting rights held by the Bank, other vote holders or other parties; (iii) rights arising from other contractual arrangements; and (iv) any additional facts and circumstances that indicate that the Bank has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Bank obtains control over the subsidiary and ceases when the Bank loses control of the subsidiary. Specifically, income and expense of a subsidiary acquired or disposed of during the year are included in the consolidated statements of profit or loss and other comprehensive income from the date the Bank gains control until the date when the Bank ceases to control the subsidiary.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Laba rugi dan setiap komponen penghasilan komprehensif lain diatribusikan kepada pemilik entitas induk dan untuk kepentingan non-pengendali. Bank juga mengatribusikan total penghasilan komprehensif entitas anak kepada pemilik entitas induk dan kepentingan non-pengendali meskipun hal tersebut mengakibatkan kepentingan non-pengendali memiliki saldo defisit.

Kepentingan nonpengendali di entitas anak diidentifikasi secara terpisah dari ekuitas Grup yang ada. Kepentingan pemegang saham nonpengendali yang merupakan kepentingan kepemilikan yang memberikan pemiliknya hak terhadap bagian proporsional aset bersih pada saat likuidasi pada awalnya dapat diukur sebesar nilai wajar atau bagian proporsional kepentingan nonpengendali atas nilai wajar aset bersih teridentifikasi pihak yang diakuisisi. Pilihan pengukuran dibuat untuk masing-masing akuisisi. Kepentingan non-pengendali lain awalnya diukur sebesar nilai wajar. Setelah akuisisi, jumlah tercatat kepentingan non-pengendali adalah jumlah kepentingan tersebut pada pengakuan awal ditambah bagian kepentingan nonpengendali dari perubahan selanjutnya di ekuitas.

Perubahan kepemilikan Grup pada entitas anak yang tidak mengakibatkan kehilangan pengendalian Grup atas entitas anak dicatat sebagai transaksi ekuitas. Jumlah tercatat dari kepemilikan Grup dan kepentingan non-pengendali disesuaikan untuk mencerminkan perubahan kepentingan relatifnya dalam entitas anak. Selisih antara jumlah tercatat kepentingan non-pengendali yang disesuaikan dan nilai wajar imbalan yang dibayar atau diterima diakui secara langsung dalam ekuitas dan diatribusikan kepada pemilik entitas induk.

Ketika Grup kehilangan pengendalian pada entitas anak, keuntungan atau kerugian diakui dalam laba rugi dihitung sebagai perbedaan antara (i) agregat nilai wajar pembayaran yang diterima dan nilai wajar sisa kepemilikan (*retained interest*) dan (ii) jumlah tercatat sebelumnya dari aset (termasuk *goodwill*), dan liabilitas dari entitas anak dan setiap kepentingan non-pengendali. Seluruh jumlah yang diakui sebelumnya dalam penghasilan komprehensif lain yang terkait dengan entitas anak yang dicatat seolah-olah Grup telah melepaskan secara langsung aset atau liabilitas terkait entitas anak (yaitu direklasifikasi ke laba rugi atau ditransfer ke kategori lain dari ekuitas sebagaimana ditentukan/diizinkan oleh standar akuntansi yang berlaku). Nilai wajar setiap sisa investasi pada entitas anak terdahulu pada tanggal hilangnya pengendalian dianggap sebagai nilai wajar pada saat pengakuan awal untuk akuntansi berikutnya dalam PSAK 55, Instrumen Keuangan: *Pengakuan dan Pengukuran atau, ketika berlaku, biaya perolehan pada saat pengakuan awal dari investasi pada entitas asosiasi atau ventura bersama.*

Profit or loss and each component of other comprehensive income are attributed to the owners of the Bank and to the non-controlling interest. Total comprehensive income of subsidiaries is attributed to the owners of the Bank and the non-controlling interest even if this results in the non-controlling interest having a deficit balance.

Non-controlling interests in subsidiaries are identified separately from the Group's equity therein. Those interests of non-controlling stockholders that are present ownership interests entitling their holders to a proportionate share of net assets upon liquidation may initially be measured at fair value or at the non-controlling interests' proportionate share of the fair value of the acquiree's identifiable net assets. The choice of measurement is made on an acquisition-by-acquisition basis. Other non-controlling interests are initially measured at fair value. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity.

Changes in the Group's ownership interest in existing subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interest and the non-controlling interest are adjusted to reflect the changes in their relative interest in the subsidiaries. Any difference between the amount by which the non-controlling interest are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Bank.

When the Group loses control of a subsidiary, a gain or loss recognized in profit or loss is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interest. All amounts previously recognized in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable accounting standards). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under PSAK 55, Financial Instruments: *Recognition and Measurement or, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.*

**d. Kombinasi Bisnis**

Akuisisi bisnis dicatat dengan menggunakan metode akuisisi. Imbalan yang dialihkan dalam suatu kombinasi bisnis diukur pada nilai wajar, yang dihitung sebagai hasil penjumlahan dari nilai wajar tanggal akuisisi atas seluruh aset yang dialihkan oleh Grup, liabilitas yang diakui oleh Grup kepada pemilik sebelumnya dari pihak yang diakuisisi dan kepentingan ekuitas yang diterbitkan oleh Grup dalam pertukaran pengendalian dari pihak yang diakuisisi. Biaya-biaya terkait akuisisi diakui di dalam laba rugi pada saat terjadinya.

Pada tanggal akuisisi, aset teridentifikasi yang diperoleh dan liabilitas yang diambilalih diakui pada nilai wajar kecuali untuk aset dan liabilitas tertentu yang diukur sesuai dengan standar yang relevan.

*Goodwill* diukur sebagai selisih lebih dari nilai gabungan dari imbalan yang dialihkan, jumlah setiap kepentingan non-pengendali pada pihak diakuisisi dan nilai wajar pada tanggal akuisisi kepentingan ekuitas yang sebelumnya dimiliki oleh pihak pengakuisisi pada pihak diakuisisi (jika ada) atas jumlah neto dari aset teridentifikasi yang diperoleh dan liabilitas yang diambilalih pada tanggal akuisisi. Penilaian kembali atas *goodwill* dilakukan untuk mengetahui adanya perubahan nilai *goodwill*. Jika, setelah penilaian kembali, jumlah neto dari aset teridentifikasi yang diperoleh dan liabilitas yang diambilalih pada tanggal akuisisi melebihi jumlah imbalan yang dialihkan, jumlah dari setiap kepentingan non-pengendali pada pihak diakuisisi dan nilai wajar pada tanggal akuisisi kepentingan ekuitas yang sebelumnya dimiliki oleh pihak pengakuisisi pada pihak diakuisisi (jika ada), selisih lebih diakui segera dalam laba rugi sebagai keuntungan pembelian dengan diskon.

Bila imbalan yang dialihkan oleh Grup dalam suatu kombinasi bisnis termasuk aset atau liabilitas yang berasal dari peraturan imbalan kontingen (*contingent consideration arrangement*), imbalan kontingen tersebut diukur pada nilai wajar pada tanggal akuisisi dan termasuk sebagai bagian dari imbalan yang dialihkan dalam suatu kombinasi bisnis.

Perubahan dalam nilai wajar atas imbalan kontingen yang memenuhi syarat sebagai penyesuaian periode pengukuran disesuaikan secara retrospektif, dengan penyesuaian terkait terhadap *goodwill*. Penyesuaian periode pengukuran adalah penyesuaian yang berasal dari informasi tambahan yang diperoleh selama periode pengukuran (yang tidak melebihi satu tahun sejak tanggal akuisisi) tentang fakta-fakta dan kondisi yang ada pada tanggal akuisisi.

**d. Business Combinations**

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree, and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognized in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value except for certain assets and liabilities that are measured in accordance with the relevant standards.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. Reassessment of goodwill performed to identify any changes in goodwill value. If, after the reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination.

Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the measurement period (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

Perlakuan akuntansi selanjutnya untuk perubahan nilai wajar dari imbalan kontinjensi yang tidak memenuhi syarat sebagai penyesuaian periode pengukuran tergantung pada bagaimana imbalan kontinjensi diklasifikasikan. Imbalan kontinjensi yang diklasifikasikan sebagai ekuitas tidak diukur kembali pada setiap tanggal pelaporan dan penyelesaian selanjutnya diperhitungkan dalam ekuitas. Imbalan kontinjensi lain diukur ulang ke nilai wajar pada tanggal pelaporan selanjutnya dengan perubahan nilai wajar diakui diakui di laba rugi.

Bila suatu kombinasi bisnis dilakukan secara bertahap, kepemilikan terdahulu Grup (termasuk operasi bersama) atas pihak diakuisisi diukur kembali ke nilai wajar pada tanggal akuisisi dan keuntungan atau kerugian dihasilkan, jika ada, diakui dalam laba rugi. Jumlah yang berasal dari kepemilikan sebelum tanggal akuisisi yang sebelumnya telah diakui dalam penghasilan komprehensif lain direklasifikasi ke laba rugi dimana perlakuan tersebut seperti jika kepemilikan tersebut dilepas/dijual.

Jika akuntansi awal untuk kombinasi bisnis belum selesai pada akhir periode pelaporan saat kombinasi terjadi, Grup melaporkan jumlah sementara untuk pos-pos yang proses akuntansinya belum selesai dalam laporan keuangannya. Selama periode pengukuran (lihat di atas), pihak pengakuisisi menyesuaikan, aset atau liabilitas tambahan yang diakui, untuk mencerminkan informasi baru yang diperoleh tentang fakta dan keadaan yang ada pada tanggal akuisisi dan, jika diketahui, akan berdampak pada jumlah yang diakui pada tanggal tersebut.

**e. Transaksi dan Penjabaran Laporan Keuangan Dalam Mata Uang Asing**

Laporan keuangan individu masing-masing entitas Grup diukur dan disajikan dalam mata uang dari lingkungan ekonomi utama dimana entitas beroperasi (mata uang fungsional). Laporan keuangan konsolidasian dari Grup dan laporan keuangan individu masing-masing entitas Grup disajikan dalam mata uang Rupiah yang merupakan mata uang fungsional individu masing-masing entitas Grup dan mata uang penyajian untuk laporan keuangan konsolidasian.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Other contingent consideration is remeasured to fair value at subsequent reporting dates with changes in fair value recognized in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interests (including joint operations) in the acquired entity are remeasured to their acquisition-date fair value and the resulting gain or loss, if any, is recognized in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if those interests were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amount recognized as of that date.

**e. Foreign Currency Transactions and Translation**

The individual financial statements of each Group entity are measured and presented in the currency of the primary economic environment in which the entity operates (its functional currency). The consolidated financial statements of the Group and the individual financial statement of each Group entity are presented in Indonesian Rupiah, which is the functional currency of the individual financial statement of each Group entity and the presentation currency for the consolidated financial statements.

Dalam penyusunan laporan keuangan setiap entitas individual Grup, transaksi dalam mata uang asing selain mata uang fungsional entitas (mata uang asing) diakui pada kurs yang berlaku pada tanggal transaksi. Pada setiap akhir periode pelaporan, pos moneter dalam valuta asing dijabarkan kembali dengan menggunakan kurs laporan (penutupan) yang ditetapkan oleh Bank Indonesia, yaitu kurs spot Reuters pada pukul 16.00 WIB untuk mencerminkan kurs yang berlaku pada tanggal tersebut. Pos-pos non moneter yang diukur pada nilai wajar dalam valuta asing dijabarkan kembali pada kurs yang berlaku pada tanggal ketika nilai wajar ditentukan. Pos non-moneter yang diukur dalam biaya historis dalam valuta asing tidak dijabarkan kembali. Selisih kurs atas pos moneter diakui dalam laba rugi pada periode saat terjadinya.

In preparing the financial statements of each individual Group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated using reporting (closing) exchange rate set by Bank Indonesia, which is Reuters' spot rate at 4.00 P.M. Western Indonesia Time to reflect the rates of exchange prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences on monetary items are recognized in profit or loss in the period in which they arise.

**f. Transaksi Pihak-pihak Berelasi**

Pihak-pihak berelasi adalah orang atau entitas yang terkait dengan Grup (entitas pelapor):

  - iii. kedua entitas tersebut adalah ventura bersama dari pihak ketiga yang sama.

**f. Transactions with Related Parties**

Transaksi signifikan yang dilakukan dengan pihak-pihak berelasi, baik dilakukan dengan kondisi dan persyaratan yang sama dengan pihak ketiga maupun tidak, diungkapkan pada laporan keuangan konsolidasian.

#### **g. Aset Keuangan**

Seluruh aset keuangan diakui dan dihentikan pengakuannya pada tanggal penyelesaian dimana pembelian dan penjualan aset keuangan berdasarkan kontrak yang mensyaratkan penyerahan aset keuangan dalam kurun waktu yang ditetapkan oleh kebiasaan pasar yang berlaku, dan awalnya diukur sebesar nilai wajar ditambah biaya transaksi, kecuali untuk aset keuangan yang diukur pada nilai wajar melalui laba rugi, yang awalnya diukur sebesar nilai wajar.

Aset keuangan Grup diklasifikasikan sebagai berikut:

- Aset keuangan pada nilai wajar melalui laba rugi (FVTPL)
- Investasi dimiliki hingga jatuh tempo
- Aset keuangan tersedia untuk dijual (AFS)
- Pinjaman yang diberikan dan piutang

- iv. one entity is a joint venture of a third entity and the other entity is an associate of the third entity.
- v. the entity is a post-employment benefit plan for the benefit of employees of either the reporting entity, or an entity related to the reporting entity. If the reporting entity is itself such a plan the sponsoring employees are also related to the reporting entity.
- vi. the entity is controlled or jointly controlled by a person identified in (a).
- vii. a person identified in (a) (i) has significant influence over the entity or is a member of the key management personnel of the entity (or a parent of the entity).
- viii. the entity, or any members of a group which it is a part, provides key management personnel services to the reporting entity or to the parent entity of the reporting entity.

Significant transactions with related parties, whether or not made at similar terms and conditions as those done with third parties, are disclosed in the consolidated financial statements.

#### **g. Financial Assets**

All financial assets are recognized and derecognized on settlement date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the time frame established by the market concerned, and are initially measured at fair value plus transaction costs, except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

The Group's financial assets are classified as follows:

- Financial assets at fair value through profit or loss (FVTPL)
- Held-to-maturity investments
- Available-for-sale (AFS) financial assets
- Loans and receivable

Aset keuangan pada nilai wajar melalui laba rugi (FVTPL)

Aset keuangan diklasifikasi dalam FVTPL, jika aset keuangan sebagai kelompok diperdagangkan atau pada saat pengakuan awal ditetapkan untuk diukur pada FVTPL.

Aset keuangan diklasifikasi sebagai kelompok diperdagangkan, jika:

- diperoleh atau dimiliki terutama untuk tujuan dijual kembali dalam waktu dekat; atau
- pada pengakuan awal merupakan bagian dari portofolio instrumen keuangan tertentu yang dikelola Grup secara bersama dan mempunyai pola ambil untung dalam jangka pendek aktual saat ini; atau
- merupakan derivatif yang tidak ditetapkan dan tidak efektif sebagai instrumen lindung nilai.

Aset keuangan selain aset keuangan yang diperdagangkan, dapat ditetapkan sebagai FVTPL pada saat pengakuan awal jika:

- penetapan tersebut mengeliminasi atau mengurangi secara signifikan inkonsistensi pengukuran dan pengakuan yang dapat timbul; atau
- kelompok aset keuangan, liabilitas keuangan atau keduanya, dikelola dan kinerjanya dievaluasi berdasarkan nilai wajar, sesuai dengan manajemen risiko atau strategi investasi yang didokumentasikan, dan informasi tentang Grup disediakan secara internal kepada manajemen kunci entitas (sebagaimana didefinisikan dalam PSAK 7: Pengungkapan Pihak-pihak Berelasi), misalnya direksi dan *Chief Executive Officer* (CEO).

Aset keuangan FVTPL disajikan sebesar nilai wajar, keuntungan atau kerugian yang timbul diakui dalam laba rugi. Keuntungan atau kerugian bersih yang diakui dalam laba rugi mencakup dividen atau bunga yang diperoleh dari aset keuangan. Nilai wajar ditentukan dengan cara seperti dijelaskan pada Catatan 3i.

Financial assets at FVTPL

Financial assets are classified as at FVTPL where the financial asset is either held for trading or its designated as at FVTPL.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- a group of financial assets, financial liabilities or both is managed and its performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, and information about the Group is provided internally on that basis to the entity's key management personnel (as defined in PSAK 7: Related Party Disclosures), for example the board of directors and Chief Executive Officer (CEO).

Financial assets at FVTPL are stated at fair value, with any resultant gain or loss recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset. Fair value is determined in the manner described in Note 3i.

#### Investasi dimiliki hingga jatuh tempo

Aset keuangan diklasifikasikan sebagai investasi dimiliki hingga jatuh tempo hanya jika investasi tersebut memiliki pembayaran yang tetap atau telah ditentukan dan jatuh temponya telah ditetapkan serta Grup mempunyai intensi positif dan kemampuan untuk memiliki aset keuangan tersebut hingga jatuh tempo. Pada saat pengakuan awal, investasi dimiliki hingga jatuh tempo diukur pada nilai wajar ditambah dengan biaya transaksi yang dapat diatribusikan secara langsung dengan perolehan aset keuangan. Setelah pengakuan awal, investasi dimiliki hingga jatuh tempo diukur pada biaya perolehan diamortisasi pada menggunakan metode suku bunga efektif dikurangi kerugian penurunan nilai.

#### Pinjaman yang diberikan dan piutang

Aset keuangan dengan pembayaran tetap atau telah ditentukan dan tidak mempunyai kuotasi di pasar aktif diklasifikasi sebagai pinjaman yang diberikan dan piutang. Pinjaman yang diberikan dan piutang diukur pada biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif dikurangi kerugian penurunan nilai. Bunga diakui dengan menggunakan metode suku bunga efektif, kecuali piutang jangka pendek dimana pengakuan bunga tidak material.

#### Aset keuangan tersedia untuk dijual (AFS)

AFS aset keuangan adalah aset keuangan non-derivatif yang ditetapkan baik sebagai AFS atau yang tidak diklasifikasikan sebagai (a) pinjaman yang diberikan dan piutang, (b) dimiliki hingga jatuh tempo atau (c) aset keuangan pada nilai wajar melalui laba rugi (FVTPL). Pada saat pengakuan awal, aset keuangan yang tersedia untuk dijual diukur pada nilai wajar ditambah dengan biaya transaksi yang dapat diatribusikan secara langsung. Setelah itu, aset keuangan tersedia untuk dijual diukur dan dicatat pada nilai wajar.

Keuntungan atau kerugian yang timbul dari perubahan nilai wajar diakui dalam penghasilan komprehensif lain di ekuitas sebagai akumulasi revaluasi investasi AFS kecuali untuk kerugian penurunan nilai, pendapatan bunga yang dihitung dengan metode suku bunga efektif dan laba rugi selisih kurs atas aset moneter, yang diakui pada laba rugi. Jika investasi dilepas atau mengalami penurunan nilai, akumulasi laba atau rugi yang sebelumnya diakumulasi pada revaluasi investasi AFS direklasifikasi ke laba rugi.

#### Held-to-maturity investments

Financial assets are classified as held-to-maturity investments only if these investments have fixed or determined payments and their maturity date has been determined and the Group has the positive intention and ability to hold such financial assets to maturity. Held-to-maturity investments are initially measured at fair value plus transaction costs which are attributable directly to the acquisition of the financial assets. Subsequent to initial recognition, held-to-maturity investments are measured at amortized cost, using effective interest rate method less impairment.

#### Loans and receivables

Financial assets that have fixed or determinable payments that are not quoted in an active market are classified as loans and receivables. Loans and receivables are measured at amortized cost using the effective interest method less impairment. Interest is recognized by applying the effective interest method, except for short-term receivables when the recognition of interest would be immaterial.

#### Available-for-sale (AFS) Financial Assets

AFS financial assets are non-derivative financial assets that are either designated as AFS or are not classified as (a) loans and receivables, (b) held-to-maturity investments or (c) financial assets at fair value through profit or loss (FVTPL). AFS financial assets are initially measured at fair value plus any directly attributable transaction costs. Subsequently, they are measured at fair value.

Gains and losses arising from changes in fair value are recognized in other comprehensive income in equity as accumulated in AFS investment revaluation, with the exception of impairment losses, interest income calculated using the effective interest method, and foreign exchange gains and losses on monetary assets, which are recognized in profit or loss. When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in AFS investment revaluation is reclassified to profit or loss.

Investasi dalam instrumen ekuitas yang tidak tercatat di bursa yang tidak mempunyai kuotasi di pasar aktif dan nilai wajarnya tidak dapat diukur secara andal, serta derivatif yang terkait dengan dan harus diselesaikan melalui penyerahan instrumen ekuitas tersebut diklasifikasikan sebagai AFS, diukur pada biaya perolehan dikurangi penurunan nilai.

Dividen atas instrumen ekuitas AFS, jika ada, diakui pada laba rugi pada saat hak Grup untuk memperoleh pembayaran dividen ditetapkan.

#### Metode suku bunga efektif

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari instrumen keuangan dan metode untuk mengalokasikan pendapatan bunga atau biaya selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi penerimaan atau pembayaran kas masa depan (mencakup seluruh komisi dan bentuk lain yang dibayarkan dan diterima oleh para pihak dalam kontrak yang merupakan bagian yang tak terpisahkan dari suku bunga efektif, biaya transaksi dan premium dan diskonto lainnya) selama perkiraan umur instrumen keuangan, atau (jika lebih tepat), digunakan periode yang lebih singkat untuk memperoleh nilai tercatat bersih dari aset keuangan pada saat pengakuan awal.

Pendapatan diakui berdasarkan suku bunga efektif untuk instrumen keuangan selain dari instrumen keuangan FVTPL.

#### Penurunan nilai aset keuangan

Aset keuangan, selain aset keuangan FVTPL, dievaluasi terhadap indikator penurunan nilai pada setiap akhir periode pelaporan. Aset keuangan diturunkan nilainya bila terdapat bukti objektif, sebagai akibat dari satu atau lebih peristiwa yang terjadi setelah pengakuan awal aset keuangan, dan peristiwa yang merugikan tersebut berdampak pada estimasi arus kas masa depan atas aset keuangan yang dapat diestimasi secara andal.

Untuk investasi ekuitas AFS yang tercatat dan tidak tercatat di bursa, penurunan yang signifikan atau jangka panjang dalam nilai wajar dari instrumen ekuitas di bawah biaya perolehannya dianggap sebagai bukti objektif terjadinya penurunan nilai.

Investments in unlisted equity instruments that are not quoted in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity investments are also classified as AFS, measured at cost less impairment.

Dividend on AFS equity instruments, if any, are recognized in profit or loss when the Group's right to receive the dividends is established.

#### Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial instrument and of allocating interest income or expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discount) through the expected life of the financial instrument, or where appropriate, a shorter period to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for financial instruments other than those financial instruments at FVTPL.

#### Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For listed and unlisted equity investments classified as AFS, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

Untuk seluruh aset keuangan lainnya, bukti objektif penurunan nilai termasuk sebagai berikut:

- kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam; atau
- pelanggaran kontrak, seperti terjadinya wanprestasi atau tunggakan pembayaran pokok atau bunga; atau
- terdapat kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan; atau
- hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan.

Untuk kelompok aset keuangan tertentu, seperti piutang, aset yang tidak akan dievaluasi secara individual akan dievaluasi penurunan nilainya secara kolektif. Bukti objektif dari penurunan nilai portofolio piutang dapat termasuk pengalaman Grup atas tertagihnya piutang di masa lalu, peningkatan keterlambatan penerimaan pembayaran piutang dari rata-rata periode kredit, dan juga pengamatan atas perubahan kondisi ekonomi nasional atau lokal yang berkorelasi dengan gagal bayar atas piutang.

Untuk aset keuangan yang diukur pada biaya perolehan diamortisasi, jumlah kerugian penurunan nilai merupakan selisih antara jumlah tercatat aset keuangan dengan nilai kini dari estimasi arus kas masa depan yang didiskontokan menggunakan suku bunga efektif awal dari aset keuangan.

Untuk aset keuangan yang dicatat pada biaya perolehan, jumlah kerugian penurunan nilai diukur berdasarkan selisih antara jumlah tercatat aset keuangan dan nilai kini estimasi arus kas masa depan yang didiskontokan pada tingkat imbal hasil yang berlaku di pasar untuk aset keuangan yang serupa. Kerugian penurunan nilai tersebut tidak dapat dibalik pada periode berikutnya.

Jumlah tercatat aset keuangan dikurangi dengan kerugian penurunan nilai secara langsung atas seluruh aset keuangan, kecuali aset keuangan yang jumlah tercatatnya dikurangi melalui penggunaan akun cadangan kerugian penurunan nilai. Jika aset keuangan tidak tertagih, aset keuangan tersebut dihapuskan melalui akun cadangan kerugian penurunan nilai. Pemulihan kemudian dari jumlah yang sebelumnya telah dihapuskan dikreditkan terhadap akun cadangan kerugian penurunan nilai. Perubahan jumlah tercatat akun cadangan kerugian penurunan nilai diakui dalam laba rugi.

For all other financial assets, the objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

For certain categories of financial assets, such as receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experiences of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of receivables, where the carrying amount is reduced through the use of an allowance account. When a receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

Jika aset keuangan AFS dianggap menurun nilainya, keuntungan atau kerugian kumulatif yang sebelumnya telah diakui dalam ekuitas direklasifikasi ke laba rugi.

Kecuali instrumen ekuitas AFS, jika, pada periode berikutnya, jumlah kerugian penurunan nilai berkurang dan pengurangan tersebut dapat dikaitkan secara obyektif dengan peristiwa yang terjadi setelah penurunan nilai diakui, kerugian penurunan nilai yang diakui sebelumnya dipulihkan melalui laba rugi. Pemulihan tersebut tidak dapat mengakibatkan nilai tercatat investasi pada tanggal pemulihan penurunan nilai melebihi biaya perolehan diamortisasi sebelum pengakuan kerugian penurunan nilai dilakukan.

Dalam hal efek ekuitas AFS, kerugian penurunan nilai yang sebelumnya diakui dalam laba rugi tidak boleh dibalik melalui laba rugi. Setiap kenaikan nilai wajar setelah penurunan nilai diakui secara langsung ke penghasilan komprehensif lain. Sehubungan dengan efek utang AFS, kerugian penurunan nilai dibalik melalui laba rugi jika kenaikan nilai wajar investasi dapat dikaitkan secara obyektif dengan peristiwa yang terjadi setelah pengakuan kerugian penurunan nilai.

#### Penghentian pengakuan aset keuangan

Grup menghentikan pengakuan aset keuangan jika dan hanya jika hak kontraktual atas arus kas yang berasal dari aset keuangan berakhir, atau Grup mentransfer aset keuangan dan secara substansial mentransfer seluruh risiko dan manfaat atas kepemilikan aset kepada entitas lain. Jika Grup tidak mentransfer serta tidak memiliki secara substansial atas seluruh risiko dan manfaat kepemilikan serta masih mengendalikan aset yang ditransfer, maka Grup mengakui keterlibatan berkelanjutan atas aset yang ditransfer dan liabilitas terkait sebesar jumlah yang mungkin harus dibayar. Jika Grup memiliki secara substansial seluruh risiko dan manfaat kepemilikan aset keuangan yang ditransfer, Grup masih mengakui aset keuangan dan juga mengakui pinjaman yang dijamin sebesar pinjaman yang diterima.

Pada penghentian pengakuan aset keuangan secara keseluruhan, selisih antara jumlah tercatat aset dan jumlah pembayaran dan piutang yang diterima dan keuntungan atau kerugian kumulatif yang telah diakui dalam penghasilan komprehensif lain dan terakumulasi dalam ekuitas diakui dalam laba rugi.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognized in equity are reclassified to profit or loss.

With the exception of AFS equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

In respect of AFS equity investments, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized directly in other comprehensive income. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

#### Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes their retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

On derecognition of financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognized in other comprehensive income and accumulated in equity is recognized in profit or loss.

Pada penghentian pengakuan aset keuangan terhadap satu bagian saja (misalnya ketika Grup masih memiliki hak untuk membeli kembali bagian aset yang ditransfer), Grup mengalokasikan jumlah tercatat sebelumnya dari aset keuangan tersebut pada bagian yang tetap diakui berdasarkan keterlibatan berkelanjutan, dan bagian yang tidak lagi diakui berdasarkan nilai wajar relatif dari kedua bagian tersebut pada tanggal transfer. Selisih antara jumlah tercatat yang dialokasikan pada bagian yang tidak lagi diakui dan jumlah dari pembayaran yang diterima untuk bagian yang tidak lagi diakui dan setiap keuntungan atau kerugian kumulatif yang dialokasikan pada bagian yang tidak lagi diakui tersebut yang sebelumnya telah diakui dalam penghasilan komprehensif lain diakui pada laba rugi. Keuntungan dan kerugian kumulatif yang sebelumnya diakui dalam penghasilan komprehensif lain dialokasikan pada bagian yang tetap diakui dan bagian yang dihentikan pengakuannya, berdasarkan nilai wajar relatif kedua bagian tersebut.

#### h. Liabilitas Keuangan dan Instrumen Ekuitas

Liabilitas keuangan awalnya diukur sebesar nilai wajarnya. Biaya transaksi yang dapat diatribusikan secara langsung dengan perolehan atau penerbitan liabilitas keuangan (selain liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi) ditambahkan atau dikurangkan dari nilai wajar liabilitas keuangan, pada pengakuan awal. Biaya transaksi yang dapat diatribusikan secara langsung dengan perolehan liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi langsung diakui dalam laba rugi.

##### Klasifikasi sebagai liabilitas atau ekuitas

Instrumen utang dan ekuitas yang diterbitkan oleh Grup diklasifikasikan sebagai liabilitas keuangan atau ekuitas sesuai dengan substansi perjanjian kontraktual dan definisi liabilitas keuangan dan instrumen ekuitas.

##### Instrumen ekuitas

Instrumen ekuitas adalah setiap kontrak yang memberikan hak residual atas aset Grup setelah dikurangi dengan seluruh liabilitasnya. Instrumen ekuitas yang diterbitkan oleh Grup dicatat sebesar hasil penerimaan bersih setelah dikurangi biaya penerbitan langsung.

Pembelian kembali instrumen ekuitas Perusahaan (saham treasury) diakui dan dikurangkan secara langsung dari ekuitas. Keuntungan dan kerugian yang timbul dari pembelian, penjualan, penerbitan atau pembatalan instrumen ekuitas Perusahaan tersebut tidak diakui dalam laba rugi.

On derecognition of financial asset other than its entirety (e.g., when the Group retains an option to repurchase part of a transferred asset), the Group allocates the previous carrying amount of the financial asset between the part it continues to recognize under continuing involvement, and the part it no longer recognizes on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognized and the sum of the consideration received for the part no longer recognized and any cumulative gain or loss allocated to it that had been recognized in other comprehensive income is recognized in profit or loss. A cumulative gain or loss that had been recognized in other comprehensive income is allocated between the part that continues to be recognized and the part that is no longer recognized on the basis of the relative fair values of those parts.

#### h. Financial Liabilities and Equity Instruments

Financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial liabilities (other than financial liabilities at FVTPL) are added to or deducted from the fair value of the financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial liabilities at FVTPL are recognized immediately in profit or loss.

##### Classification as debt or equity

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

##### Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recorded at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments (treasury shares) is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

#### Instrumen keuangan majemuk

Bagian komponen instrumen keuangan majemuk (obligasi konversi) yang diterbitkan oleh Grup diklasifikasikan secara terpisah sebagai liabilitas keuangan dan instrumen ekuitas sesuai dengan substansi perjanjian kontraktual dan definisi liabilitas keuangan dan instrumen keuangan. Opsi konversi yang akan diselesaikan dengan pertukaran sejumlah kas atau aset keuangan lainnya untuk sejumlah instrumen ekuitas Perusahaan yang telah ditetapkan merupakan instrumen ekuitas.

Pada tanggal penerbitan, nilai wajar komponen liabilitas diestimasi menggunakan suku bunga pasar yang berlaku untuk instrumen non-konversi serupa. Jumlah ini dicatat sebagai liabilitas dengan dasar biaya diamortisasi menggunakan metode suku bunga efektif sampai dihentikan pengakuannya pada saat konversi atau pada tanggal jatuh tempo instrumen.

Opsi konversi yang diklasifikasikan sebagai instrumen ekuitas ditentukan dengan mengurangi jumlah komponen liabilitas dari nilai wajar instrumen majemuk secara keseluruhan. Jumlah ini diakui dan dicatat dalam ekuitas, neto setelah dampak pajak penghasilan, dan selanjutnya tidak diukur ulang. Sebagai tambahan, opsi konversi yang diklasifikasikan sebagai instrumen ekuitas akan tetap di dalam ekuitas hingga opsi konversi belum dieksekusi, dalam kasus tersebut, jumlah yang diakui di ekuitas akan dialihkan ke "tambahan modal disetor". Ketika opsi konversi masih tidak dieksekusi pada tanggal jatuh tempo obligasi konversi, jumlah yang diakui di ekuitas akan dialihkan ke "tambahan modal disetor". Tidak ada keuntungan atau kerugian yang diakui di laba rugi pada saat konversi atau kadaluarsa opsi konversi.

Biaya transaksi yang berasal dari penerbitan obligasi konversi dialokasikan ke liabilitas dan komponen ekuitas sebesar proporsi terhadap alokasi hasil bruto. Biaya transaksi terkait komponen ekuitas diakui secara langsung di ekuitas. Biaya transaksi terkait komponen liabilitas diperhitungkan dalam jumlah tercatat komponen liabilitas dan diamortisasi sepanjang umur obligasi konversi menggunakan metode suku bunga efektif.

#### Liabilitas keuangan

Liabilitas keuangan diklasifikasikan sebagai FVTPL atau pada biaya perolehan diamortisasi.

#### Compound instruments

The component parts of compound instruments (convertible notes) issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recorded as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

A conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognized and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognized in equity will be transferred to "additional paid-in capital". Where the conversion option remains unexercised at the maturity date of the convertible notes, the balance recognized in equity will be transferred to "additional paid-in capital". No gain or loss is recognized in profit or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognized directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortized over the lives of the convertible notes using the effective interest method.

#### Financial liabilities

Financial liabilities are classified as either "at FVTPL" or "at amortized cost".

Liabilitas keuangan yang diukur pada FVTPL

Liabilitas keuangan diklasifikasikan sebagai FVTPL pada saat liabilitas keuangan baik dimiliki untuk diperdagangkan atau ditetapkan pada FVTPL.

Liabilitas keuangan dimiliki untuk diperdagangkan jika:

- diperoleh terutama untuk tujuan dibeli kembali dalam waktu dekat; atau
- pada pengakuan awal merupakan bagian dari portofolio instrumen keuangan tertentu yang dikelola Grup secara bersama dan terdapat bukti mengenai pola ambil untung dalam jangka pendek aktual saat ini; atau
- merupakan derivatif yang tidak ditetapkan dan tidak efektif sebagai instrumen lindung nilai.

Liabilitas keuangan selain liabilitas keuangan yang diperdagangkan dapat ditetapkan sebagai FVTPL pada saat pengakuan awal jika:

- mengeliminasi atau mengurangi secara signifikan inkonsistensi pengukuran dan pengukuran yang dapat timbul; atau
- liabilitas keuangan membentuk bagian dari kelompok aset keuangan, liabilitas keuangan atau keduanya dikelola dan kinerjanya dievaluasi berdasarkan nilai wajar, sesuai dengan manajemen risiko atau strategi investasi yang didokumentasikan dan informasi tentang kelompok tersebut disediakan secara internal.

Liabilitas keuangan lain yang sebagai FVTPL diukur pada nilai wajar, dengan keuntungan atau kerugian diakui dalam laba rugi. Keuntungan atau kerugian bersih yang diakui dalam laba rugi mencakup setiap bunga yang dibayar dari liabilitas keuangan. Nilai wajar ditentukan dengan cara yang dijelaskan dalam Catatan 3i.

Liabilitas keuangan pada biaya perolehan diamortisasi

Liabilitas keuangan lain meliputi utang usaha dan lainnya, obligasi dan wesel bayar, utang bank dan pinjaman lainnya, pada awalnya diukur pada nilai wajar, setelah dikurangi biaya transaksi, dan selanjutnya diukur pada biaya perolehan yang diamortisasi menggunakan metode suku bunga efektif.

Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or its designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been acquired principally for the purpose of repurchasing in the near term; or
- on initial recognition it is part of an identified portfolio of financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition, if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both which is managed and its performance is evaluated on a fair value basis in accordance with a documented risk management or investment strategy, and information about the grouping is provided internally on that basis.

Other financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability. Fair value is determined in the manner described in Note 3i.

Financial liabilities at amortized cost

Other financial liabilities, which include trade and other payables, bonds and notes payable, bank and other borrowings, are initially measured at fair value, net of transaction costs, and subsequently measured at amortized cost using the effective interest method.

#### Metode suku bunga efektif

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari liabilitas keuangan dan metode untuk mengalokasikan biaya bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran kas masa depan (mencakup seluruh komisi dan bentuk lain yang dibayarkan dan diterima yang merupakan bagian yang tak terpisahkan dari suku bunga efektif, biaya transaksi dan premium dan diskonto lainnya) selama perkiraan umur liabilitas keuangan, atau (jika lebih tepat) digunakan periode yang lebih singkat untuk memperoleh nilai tercatat bersih pada saat pengakuan awal.

#### Penghentian pengakuan liabilitas keuangan

Grup menghentikan pengakuan liabilitas keuangan, jika dan hanya jika, liabilitas Grup telah dilepaskan, dibatalkan atau kadaluarsa. Selisih antara jumlah tercatat liabilitas keuangan yang dihentikan pengakuannya dan imbalan yang dibayarkan dan utang diakui dalam laba rugi.

#### **i. Nilai Wajar**

Nilai wajar adalah harga yang akan diterima untuk menjual suatu aset atau harga yang akan dibayar untuk mengalihkan suatu liabilitas dalam transaksi teratur antara pelaku pasar pada tanggal pengukuran tanpa memperhatikan apakah harga tersebut dapat diobservasi secara langsung atau diestimasi menggunakan teknik penilaian lain. Dalam mengukur nilai wajar atas suatu aset atau liabilitas pada tanggal pengukuran, Grup memperhitungkan karakteristik suatu aset atau liabilitas jika pelaku pasar akan memperhitungkan karakteristik tersebut ketika menentukan harga aset atau liabilitas pada tanggal pengukuran.

Dalam rangka konsistensi dan perbandingan dalam pengukuran nilai wajar dan pengungkapan terkait, Grup melakukan pengukuran nilai wajar atas instrumen keuangan yang dimiliki dengan hirarki berikut:

- Pengukuran nilai wajar level 1 adalah yang berasal dari harga kuotasi (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik; dimana Grup dapat mengakses pada tanggal pengukuran;

#### Effective interest method

The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period to the net carrying amount on initial recognition.

#### Derecognition of financial liabilities

The Group derecognizes financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit or loss.

#### **i. Fair Value**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics the asset or a liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

In order to increase consistency and comparability in fair value measurements and related disclosures, the Group measures the fair value of the financial instruments held based on the following hierarchy that categorized into three levels the inputs to valuation techniques:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities; that the Group can access at the measurement date;

- Pengukuran nilai wajar level 2 adalah yang berasal dari input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung (misalnya harga) atau secara tidak langsung (misalnya deviasi dari harga); dan
- Pengukuran nilai wajar level 3 adalah yang berasal dari teknik penilaian yang mencakup input untuk aset atau liabilitas yang bukan berdasarkan data pasar yang dapat diobservasi (input yang tidak dapat diobservasi).

- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the assets or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

- (iii) Diukur pada nilai wajar melalui laba rugi

Fair value of investments is discussed in Note 3i.

Untuk investasi pada sukuk yang diukur pada biaya perolehan dan nilai wajar melalui penghasilan komprehensif lain, jika terdapat indikasi penurunan nilai, maka Grup mengukur jumlah terpulihkannya. Jika jumlah terpulihkan lebih kecil daripada jumlah tercatat, maka Grup mengakui rugi penurunan nilai. Untuk investasi sukuk pada nilai wajar melalui penghasilan komprehensif lain, rugi penurunan nilai yang diakui pada laba rugi adalah jumlah setelah memperhitungkan saldo dalam penghasilan komprehensif lain. Jumlah terpulihkan merupakan jumlah yang akan diperoleh dari pengembalian pokok tanpa memperhitungkan nilai kininya.

For investments in sukuk measured at cost and at fair value through other comprehensive income, if there is indication of impairment, the Group measures the recoverable amount. If the recoverable amount is less than the carrying amount, the Group recognizes an impairment losses. For investments in sukuk at fair value through other comprehensive income, an impairment losses recognized in profit or loss is the amount after taking into account the balance recorded in other comprehensive income. #### s. Penyertaan dalam Bentuk Saham

##### Investasi pada entitas asosiasi

Entitas asosiasi adalah suatu entitas dimana Grup mempunyai pengaruh yang signifikan. Pengaruh signifikan adalah kekuasaan untuk berpartisipasi dalam keputusan kebijakan keuangan dan operasional *investee* tetapi tidak mengendalikan atau mengendalikan bersama atas kebijakan tersebut.

Penghasilan dan aset dan liabilitas dari entitas asosiasi dicatat dalam laporan keuangan konsolidasian dengan menggunakan metode ekuitas, kecuali ketika investasi diklasifikasikan sebagai dimiliki untuk dijual, sesuai dengan PSAK 58, Aset Tidak Lancar yang Dimiliki untuk Dijual dan Operasi yang Dihentikan. Dengan metode ekuitas, investasi pada entitas asosiasi diakui di laporan posisi keuangan konsolidasian sebesar biaya perolehan dan selanjutnya disesuaikan untuk perubahan dalam bagian kepemilikan Grup atas laba rugi dan penghasilan komprehensif lain dari entitas asosiasi yang terjadi setelah perolehan. Ketika bagian Grup atas kerugian entitas asosiasi melebihi kepentingan Grup pada entitas asosiasi (yang mencakup semua kepentingan jangka panjang, yang secara substansi, membentuk bagian dari investasi bersih Grup dalam entitas asosiasi), Grup menghentikan pengakuan bagiannya atas kerugian selanjutnya. Kerugian selanjutnya diakui hanya apabila Grup mempunyai kewajiban bersifat hukum atau konstruktif atau melakukan pembayaran atas nama entitas asosiasi.

Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

#### s. Investments in Shares of Stock

##### Investments in associates

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results of operations and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case, it is accounted for in accordance with PSAK 58, Non-current Assets Held for Sale and Discontinued Operations. Under the equity method, an investment in an associate is initially recognized in the consolidated statement of financial position at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

Investasi pada entitas asosiasi dicatat dengan menggunakan metode ekuitas sejak tanggal saat *investee* menjadi entitas asosiasi. Setiap kelebihan biaya perolehan investasi atas bagian Grup atas nilai wajar bersih dari aset yang teridentifikasi, liabilitas dan liabilitas kontingen dari entitas asosiasi yang diakui pada tanggal akuisisi, diakui sebagai *goodwill*. *Goodwill* termasuk dalam jumlah tercatat investasi, dan diuji penurunan nilainya sebagai bagian dari investasi. Setiap kelebihan kepemilikan Grup dari nilai wajar bersih aset yang teridentifikasi, liabilitas dan liabilitas kontingen atas biaya perolehan investasi, sesudah pengujian kembali segera diakui di dalam laba rugi pada periode diperolehnya investasinya.

Persyaratan dalam PSAK 55, Instrumen Keuangan: Pengakuan dan Pengukuran, diterapkan untuk menentukan apakah perlu untuk mengakui setiap penurunan nilainya sehubungan dengan investasi pada entitas asosiasi. Jumlah tercatat investasi yang tersisa (termasuk *goodwill*) diuji penurunan nilai sesuai dengan PSAK 48, Penurunan Nilai Aset, sebagai suatu aset tunggal dengan membandingkan antara jumlah terpulihkan (mana yang lebih tinggi antara nilai pakai dan nilai wajar dikurangi biaya pelepasan) dengan jumlah tercatatnya. Rugi penurunan nilai diakui langsung pada nilai tercatat investasi. Setiap pembalikan dari penurunan nilai diakui sesuai dengan PSAK 48 sepanjang jumlah terpulihkan dari investasi tersebut kemudian meningkat.

Grup menghentikan penggunaan metode ekuitas sejak tanggal saat investasinya berhenti menjadi investasi pada entitas asosiasi atau ketika investasi diklasifikasi sebagai dimiliki untuk dijual. Ketika Grup mempertahankan kepemilikan dalam entitas yang sebelumnya merupakan entitas asosiasi dan sisa investasi tersebut merupakan aset keuangan, Grup mengukur setiap sisa investasi pada nilai wajar pada tanggal tersebut dan nilai wajar tersebut dianggap sebagai nilai wajar pada saat pengakuan awal sesuai dengan PSAK 55. Grup mengakui keuntungan dan kerugian atas pelepasan investasi asosiasi dalam laba rugi dengan turut memperhitungkan nilai wajar dari investasi yang tersisa. Seluruh jumlah yang diakui dalam penghasilan komprehensif lain yang terkait dengan entitas asosiasi direklasifikasi ke laba rugi (sebagai penyesuaian reklasifikasi) pada saat penghentian metode ekuitas.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. Any excess of the cost of acquisition over the Group's share of the net fair value of identifiable assets, liabilities and contingent liabilities of the associate or a joint venture recognized at the date of acquisition, is recognized as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss in the period in which the investment is acquired.

The requirements of PSAK 55, Financial Instruments: Recognition and Measurement, are applied to determine whether it is necessary to recognize any impairment loss with respect to the Group's investment in an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with PSAK 48, Impairment of Assets, as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized in accordance with PSAK 48 to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate, or when the investment is classified as held for sale. When the Group retains an interest in the former associate and the retained interest is a financial asset, the Group measures any retained investment at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with PSAK 55. The difference between the carrying amount of the associate at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate is included in the determination of the gain or loss on disposal of the associate. The Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the equity method is discontinued.

Jika Grup mengurangi bagian kepemilikan pada entitas asosiasi tetapi Grup tetap menerapkan metode ekuitas, Grup mereklasifikasi ke laba rugi proporsi keuntungan atau kerugian yang telah diakui sebelumnya dalam penghasilan komprehensif lain yang terkait dengan pengurangan bagian kepemilikan.

Ketika Grup melakukan transaksi dengan entitas asosiasi, keuntungan dan kerugian yang timbul dari transaksi dengan entitas asosiasi diakui dalam laporan keuangan konsolidasian Grup hanya sepanjang kepemilikan dalam entitas asosiasi yang tidak terkait dengan Grup.

#### Penyertaan lainnya

Penyertaan dalam bentuk saham dengan kepemilikan kurang dari 20% diklasifikasikan dalam kategori tersedia untuk dijual.

Pengakuan, pengukuran awal, pengukuran setelah pengakuan awal, penentuan nilai wajar, penurunan nilai dan penghentian pengakuan penyertaan lainnya mengacu pada Catatan 3g dan 3i terkait aset keuangan.

#### **t. Biaya Dibayar Dimuka**

Biaya dibayar dimuka diamortisasi selama masa manfaat masing-masing biaya dengan menggunakan metode garis lurus.

#### **u. Aset Tetap**

Aset tetap dinyatakan berdasarkan nilai revaluasi yang merupakan nilai wajar pada tanggal revaluasi dikurangi akumulasi penyusutan dan akumulasi kerugian penurunan nilai yang terjadi setelah tanggal revaluasi, kecuali tanah tidak disusutkan. Revaluasi dilakukan dengan keteraturan yang cukup regular untuk memastikan bahwa jumlah tercatat tidak berbeda secara material dengan jumlah yang ditentukan dengan menggunakan nilai wajar pada tanggal laporan posisi keuangan konsolidasian. Aset yang tidak mengalami perubahan nilai wajar secara signifikan wajib direvaluasi paling kurang setiap 3 (tiga) tahun.

When the group reduces its ownership interest in an associate but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognized in other comprehensive income relating to that reduction in ownership interests.

When a group entity transacts with an associate, profits and losses resulting from the transactions with the associate are recognized in the Group's consolidated financial statements only to the extent of its interest in the associate that are not related to the Group.

#### Other investments

Investment in shares of stock with percentage of ownership less than 20% is classified as available-for-sale financial assets.

Recognition, initial measurement, subsequent measurement, fair value measurement, impairment and derecognition of other investments are discussed in Notes 3g and 3i related to financial assets.

#### **t. Prepaid Expenses**

Prepaid expenses are amortized over their beneficial periods using the straight-line method.

#### **u. Premises and Equipment**

Premises and equipment are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses, except for land is not depreciated. Revaluation is made with sufficient regularity to ensure that the carrying amount does not differ materially from the determined fair value as at consolidated statement financial position reporting date. Asset with insignificant changes in fair value, must be revalued at least every 3 (three) years.

Kenaikan yang berasal dari revaluasi diakui pada penghasilan komprehensif lain dan terakumulasi dalam ekuitas pada bagian surplus revaluasi, kecuali sebelumnya penurunan revaluasi atas aset yang sama pernah diakui dalam laba rugi, dalam hal ini kenaikan revaluasi hingga sebesar penurunan nilai aset akibat revaluasi tersebut, dikreditkan dalam laba rugi. Penurunan jumlah tercatat yang berasal dari revaluasi dibebankan dalam laba rugi apabila penurunan tersebut melebihi saldo surplus revaluasi aset yang bersangkutan, jika ada.

Penyusutan aset tetap yang direvaluasi diakui pada laba rugi.

Surplus revaluasi yang telah disajikan dalam ekuitas dipindahkan langsung ke saldo laba pada saat aset tersebut dihentikan pengakuannya.

Pada bulan Januari 2017, Bank mengubah metode penyusutan aset tetap untuk kelompok kendaraan bermotor dan inventaris kantor dari metode saldo-menurun-ganda (*double-declining balance method*) menjadi metode garis lurus (*straight-line method*). Perubahan ini dilakukan berdasarkan penelaahan Bank atas pola konsumsi aset di masa depan dan diterapkan secara prospektif.

Tidak terdapat perubahan untuk metode penyusutan bangunan, yaitu metode garis lurus (*straight-line method*).

Tarif penyusutan untuk bangunan, kendaraan bermotor dan inventaris kantor masing-masing adalah sebagai berikut:

|                    | <u>Tahun/Years</u> | <u>Persentase/<br/>Percentage</u> |                               |
|--------------------|--------------------|-----------------------------------|-------------------------------|
| Bangunan           | 20 – 48            | 2% - 5%                           | Buildings                     |
| Kendaraan bermotor | 3 – 5              | 25% - 50%                         | Motor vehicles                |
| Inventaris kantor  | 3 – 25             | 25% - 50%                         | Office furniture and fixtures |

Aset tetap kendaraan bermotor dan inventaris kantor milik entitas anak disusutkan dengan metode garis lurus (*straight-line method*) berdasarkan taksiran masa manfaat ekonomis selama 2 – 5 tahun.

Aset sewa pembiayaan disusutkan berdasarkan taksiran masa manfaat ekonomis yang sama dengan aset yang dimiliki sendiri atau disusutkan selama jangka waktu yang lebih pendek antara periode masa sewa dan umur manfaatnya.

Any revaluation increase arising from appraisal is recognized in other comprehensive income and accumulated in equity under the heading of revaluation surplus, except to the extent that it reverses a revaluation decrease, for the same asset which was previously recognized in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously charged. A decrease in carrying amount arising on the revaluation is charged to profit or loss to the extent that it exceeds the balance, if any, held in the revaluation surplus relating to a previous revaluation of such assets.

Depreciation on revalued premises and equipment is recognized in profit or loss.

The revaluation surplus is directly transferred to retained earnings when the asset is derecognized.

In January 2017, the Bank has changed its depreciation method for motor vehicles and office furniture and fixtures from the double-declining-balance method to straight-line method. This change is based on the Bank's assessment on the consumption pattern of the assets in the future and applied the change prospectively.

There is no changes for buildings depreciation method, which is straight-line method.

The depreciation rate for buildings, motor vehicles and office furnitures and fixtures, respectively are as follows:

The depreciation of subsidiaries vehicles and office furniture and fixtures are computed using the straight line method based on their estimated useful lives of 2 – 5 years.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or where shorter, the term of the relevant lease.

Masa manfaat ekonomis, nilai residu dan metode penyusutan direview setiap akhir tahun dan pengaruh dari setiap perubahan estimasi tersebut berlaku prospektif.

Beban pemeliharaan dan perbaikan dibebankan pada laba rugi pada saat terjadinya. Biaya-biaya lain yang terjadi selanjutnya yang timbul untuk menambah, mengganti atau memperbaiki aset tetap dicatat sebagai biaya perolehan aset jika dan hanya jika besar kemungkinan manfaat ekonomis di masa depan berkenaan dengan aset tersebut akan mengalir ke entitas dan biaya perolehan aset dapat diukur secara andal.

Biaya legal pengurusan hak atas tanah pada saat perolehan tanah tersebut diakui sebagai bagian dari biaya perolehan aset tanah pada aset tetap.

Biaya pembaruan atau pengurusan perpanjangan hak atas tanah diakui sebagai biaya pada tahun berjalan.

Aset tetap dihentikan pengakuannya pada saat pelepasan atau ketika tidak ada manfaat ekonomis masa depan yang diharapkan timbul dari penggunaan aset secara berkelanjutan. Keuntungan atau kerugian yang timbul dari pelepasan atau penghentian pengakuan suatu aset tetap ditentukan sebagai selisih antara hasil penjualan dan nilai tercatat aset dan diakui dalam laba rugi.

**v. Aset Tidak Lancar yang Dimiliki Untuk Dijual dan Operasi yang Dihentikan**

Aset tidak lancar (atau kelompok lepasan) diklasifikasi sebagai yang dimiliki untuk dijual diukur pada nilai yang lebih rendah antara jumlah tercatat dan nilai wajar setelah dikurangi biaya untuk menjual.

Aset tidak lancar yang dimiliki untuk dijual (atau kelompok lepasan) diklasifikasi sebagai dimiliki untuk dijual jika jumlah tercatatnya akan dipulihkan terutama melalui transaksi penjualan dari pada melalui pemakaian berlanjut. Kondisi ini dianggap memenuhi hanya ketika aset (atau kelompok lepasan) adalah berada dalam keadaan segera dapat dijual dengan syarat-syarat yang biasa dan umum diperlukan dalam penjualan aset (atau kelompok lepasan) tersebut dan penjualannya harus sangat mungkin terjadi. Manajemen harus memiliki komitmen untuk menjual dan penjualan diharapkan untuk diselesaikan dalam waktu satu tahun sejak tanggal klasifikasi.

The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

The cost of maintenance and repairs is charged to operations as incurred. Other costs incurred subsequently to add to, replace part of, or service an item of premises and equipment, are recognized as asset if, and only if, it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably.

The legal cost of land rights upon acquisition of the land is recognized as part of the cost of land under premises and equipment.

The cost of renewal or extension of legal rights on land is recognized as an expense in the current year.

An item of premises and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item premises and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

**v. Non-current Assets Held for Sale and Discontinued Operations**

Non-current assets (or disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less cost to sell.

Non-current assets (or disposal groups) are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

**w. Aset Takberwujud**

Aset takberwujud terdiri dari *goodwill* dan perangkat lunak yang dibeli oleh Grup.

**Goodwill**

*Goodwill* timbul atas akuisisi dari suatu bisnis yang dicatat pada biaya perolehan yang ditetapkan pada tanggal akuisisi dari bisnis tersebut (lihat Catatan 3d di atas) dikurangi akumulasi penurunan nilai, jika ada.

Untuk tujuan uji penurunan nilai, *goodwill* dialokasikan pada setiap unit penghasil kas dari Grup (atau kelompok unit penghasil kas) yang diperkirakan memberikan manfaat dari sinergi kombinasi bisnis tersebut. Unit penghasil kas yang telah memperoleh alokasi *goodwill* diuji penurunan nilainya setiap tahun, atau lebih sering jika terdapat indikasi bahwa unit penghasil kas tersebut mungkin mengalami penurunan nilai. Jika jumlah terpulihkan dari unit penghasil kas kurang dari jumlah tercatatnya, rugi penurunan nilai dialokasikan pertama kali untuk mengurangi jumlah tercatat atas setiap *goodwill* yang dialokasikan pada unit penghasil kas dan kemudian ke aset lain dari unit penghasil kas secara prorata berdasarkan jumlah tercatat dari setiap aset dalam unit penghasil kas tersebut. Setiap kerugian penurunan nilai *goodwill* diakui secara langsung dalam laba rugi pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Rugi penurunan nilai yang diakui atas *goodwill* tidak dapat dibalik pada periode berikutnya.

Pada pelepasan unit penghasil kas, jumlah *goodwill* yang dapat diatribusikan termasuk dalam penentuan laba rugi atas pelepasan.

Kebijakan Grup atas *goodwill* yang timbul dari akuisisi entitas asosiasi dan ventura bersama dijelaskan pada Catatan 3s.

**Perangkat Lunak**

Perangkat lunak yang dibeli oleh Grup dicatat sebesar biaya perolehan dikurangi akumulasi amortisasi.

Amortisasi diakui dalam laba rugi dengan menggunakan metode saldo-menurun-ganda (*double-declining balance method*) berdasarkan taksiran masa manfaat ekonomis selama 4 tahun.

Masa manfaat ekonomis, nilai residu dan metode amortisasi direview setiap akhir tahun.

**w. Intangible Assets**

Intangible assets consist of goodwill and software acquired by the Group.

**Goodwill**

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see Note 3d above) less accumulated impairment losses, if any.

For the purpose of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or group of cash-generating units) expected to benefit from the synergies of the combination. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro-rata on the basis of the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognized directly in profit or loss in the consolidated statement of profit or loss and other comprehensive income. An impairment loss recognized for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

The Group's policy for goodwill arising on the acquisition of an associate and Joint Venture is described in Note 3s.

**Software**

Software acquired by the Group is stated at cost less accumulated amortization.

Amortization is recognized in profit or loss using the double-declining balance method based on its estimated useful lives of 4 years.

The estimated useful lives, residual values and amortization method are reviewed at each year end.

**x. Penurunan Nilai Aset Non-keuangan kecuali Goodwill**

Pada setiap akhir periode pelaporan, Grup menelaah nilai tercatat aset non-keuangan untuk menentukan apakah terdapat indikasi bahwa aset tersebut telah mengalami penurunan nilai. Jika terdapat indikasi tersebut, jumlah terpulihkan dari aset diestimasi untuk menentukan tingkat kerugian penurunan nilai (jika ada). Bila tidak memungkinkan untuk mengestimasi jumlah terpulihkan atas suatu aset individual, Grup mengestimasi jumlah terpulihkan dari unit penghasil kas atas aset.

Estimasi jumlah terpulihkan adalah nilai tertinggi antara nilai wajar dikurangi biaya pelepasan dan nilai pakai. Dalam menilai nilai pakainya, estimasi arus kas masa depan didiskontokan ke nilai kini menggunakan tingkat diskonto sebelum pajak yang menggambarkan penilaian pasar kini dari nilai waktu uang dan risiko spesifik atas aset yang mana estimasi arus kas masa depan belum disesuaikan.

Jika jumlah terpulihkan dari aset non-keuangan (unit penghasil kas) lebih kecil dari nilai tercatatnya, nilai tercatat aset (unit penghasil kas) diturunkan menjadi sebesar jumlah terpulihkan dan rugi penurunan nilai segera diakui dalam laba rugi.

Ketika penurunan nilai selanjutnya dibalik, jumlah tercatat aset (atau unit penghasil kas) ditingkatkan ke estimasi yang direvisi dari jumlah terpulihkannya, namun kenaikan jumlah tercatat tidak boleh melebihi jumlah tercatat yang tidak ada kerugian penurunan nilai yang diakui untuk aset (atau unit penghasil kas) pada tahun-tahun sebelumnya. Pembalikan rugi penurunan nilai diakui segera dalam laba rugi, kecuali aset yang bersangkutan dicatat pada jumlah revaluasi, dalam hal ini pemulihan kerugian penurunan nilai diperlakukan sebagai kenaikan nilai revaluasi (Catatan 3u).

Kebijakan akuntansi untuk penurunan nilai aset keuangan dijelaskan dalam Catatan 3g; penurunan nilai untuk goodwill dijelaskan dalam Catatan 3w.

**y. Aset Tetap yang Belum Digunakan dalam Kegiatan Operasional**

Aset tetap yang belum digunakan dalam kegiatan operasional dinyatakan sebesar nilai tercatat, yaitu biaya perolehan setelah dikurangi dengan akumulasi penyusutan dan akumulasi kerugian penurunan nilai.

**x. Impairment of Non-financial Asset except Goodwill**

At the end of each reporting period, the Group reviews the carrying amounts of non-financial assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash generating unit to which the asset belongs.

Estimated recoverable amount is the higher of fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of the non-financial asset (cash generating unit) is less than its carrying amount, the carrying amount of the asset (cash generating unit) is reduced to its recoverable amount and an impairment loss is recognized immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase (Note 3u).

Accounting policy for impairment of financial assets is discussed in Note 3g; while impairment for goodwill is discussed in Note 3w.

**y. Unused Premises and Equipment**

Unused premises and equipment are stated at carrying amount, i.e. cost less accumulated depreciation and any accumulated impairment losses.

Selisih antara nilai agunan yang telah diambil alih dan hasil penjualannya diakui sebagai keuntungan atau kerugian pada saat penjualan agunan.

Manajemen mengevaluasi nilai agunan yang diambil alih secara berkala. Cadangan kerugian penurunan nilai agunan yang diambil alih dibentuk atas penurunan nilai agunan yang diambil alih.

Bila terjadi penurunan nilai yang bersifat permanen, maka nilai tercatatnya dikurangi untuk mengakui penurunan tersebut dan kerugiannya dibebankan pada laba rugi.

Provisi dan komisi yang tidak berkaitan dengan kegiatan perkreditan dan jangka waktu tertentu atau nilainya tidak material menurut Grup diakui sebagai pendapatan atau beban pada saat terjadinya transaksi.

**ai. Dana Syirkah Temporer**

Dana syirkah temporer terdiri dari tabungan Mudharabah, deposito berjangka Mudharabah dan Sertifikat Investasi Mudharabah antar Bank.

Tabungan Mudharabah dinyatakan sebesar nilai investasi pemegang tabungan di Bank.

Deposito berjangka Mudharabah dinyatakan sebesar nilai nominal sesuai dengan perjanjian antara pemegang deposito berjangka dengan Bank.

Dana syirkah temporer tidak dapat digolongkan sebagai liabilitas. Hal ini karena Bank tidak mempunyai liabilitas, ketika mengalami kerugian, untuk mengembalikan jumlah dana awal dari pemilik dana kecuali akibat kelalaian atau wanprestasi Bank. Di sisi lain, dana syirkah temporer tidak dapat digolongkan sebagai ekuitas karena mempunyai waktu jatuh tempo dan pemilik dana tidak mempunyai hak kepemilikan yang sama dengan pemegang saham seperti hak voting dan hak atas realisasi keuntungan yang berasal dari aset lancar dan aset non investasi.

Revenue from Mudharabah is recognized during the period of revenue sharing in accordance with the agreed revenue sharing ratio and recognition of revenue based on projected result is not allowed. Loss incurred due to negligence of mudharib is charged to mudharib and will not reduce the Mudharabah investment.

Third party share on the revenue sharing of temporary syirkah funds represents their share on the return of their fund managed by PDSB based on Mudharabah Mutlaqah principles, which is recognized based on distributed income (*cash basis*).

Distribution of income is based on revenue sharing principle, which is calculated from PDSB gross profit margin.

**ah. Recognition of Revenues and Expenses on Commissions and Fees**

Commissions and fees income related to loan activities or specific terms and with significant amounts are treated as deferred transaction cost which directly attributable to the financial instruments and amortized over the periods of the related financial instruments using the effective interest method.

Commissions and fees, which are not related to loan activities and terms of the loan or whose amount is not material according to the Group are recognized as revenues or expenses at the time the transactions are made.

**ai. Temporary Syirkah Funds**

Temporary syirkah funds consist of Mudharabah savings deposits, Mudharabah time deposits and Mudharabah Interbank Investment Certificates.

Mudharabah savings deposits are stated at the amount deposited by depositors.

Mudharabah time deposits are stated at the nominal amount set forth in the agreements between the holders of time deposit and the Bank.

Temporary syirkah funds can not be classified as liability because the Bank has no obligation to return the fund to the owner when the Bank has loss, unless there is negligence or default by the Bank. On the other side, temporary syirkah funds can not be classified as equity since they have maturity and the owner of the funds do not have ownership rights as common shareholders, such as voting rights and right of the profit derived from current assets and non-investment assets.

Pemilik dana syirkah temporer memperoleh bagian atas keuntungan sesuai kesepakatan dan menerima kerugian berdasarkan jumlah dana dari masing-masing pihak. Pembagian hasil dana syirkah temporer berdasarkan konsep bagi hasil.

**aj. Hak Pemilik Dana atas Bagi Hasil Dana Syirkah Temporer**

Hak pemilik dana atas bagi hasil dana syirkah temporer merupakan bagian bagi hasil pemilik dana yang didasarkan pada prinsip Mudharabah Mutlaqah atas hasil pengelolaan dana mereka oleh Bank yang diakui berdasarkan pendapatan yang telah diterima.

Pembagian hasil usaha dilakukan berdasarkan prinsip bagi hasil usaha, yaitu dihitung dari pendapatan Bank yang telah diterima berupa laba bruto (*gross profit margin*).

**ak. Program Pensiun dan Imbalan Pasca Kerja Lainnya**

Bank menyelenggarakan program pensiun imbalan pasti untuk semua karyawan tetapnya. Grup juga memberikan imbalan pasca kerja imbalan pasti untuk karyawan sesuai dengan Undang Undang Ketenagakerjaan No. 13/2003. Bank menghitung selisih antara imbalan yang diterima karyawan berdasarkan undang-undang yang berlaku dengan manfaat yang diterima dari program pensiun untuk pensiun normal.

Biaya penyediaan imbalan ditentukan dengan menggunakan metode *projected unit credit* dengan penilaian aktuarial yang dilakukan pada setiap akhir periode pelaporan tahunan. Pengukuran kembali, terdiri dari keuntungan dan kerugian aktuarial, dampak batas atas aset (jika ada) dan dari imbal hasil atas aset program (tidak termasuk bunga), diakui langsung dalam laporan posisi keuangan konsolidasian yang dibebankan atau dikreditkan dalam penghasilan komprehensif lain periode terjadinya. Pengukuran kembali diakui dalam penghasilan komprehensif lain tercermin segera dalam "saldo laba" tidak direklasifikasi ke laba rugi. Biaya jasa lalu diakui dalam laba rugi ketika terjadi amandemen program atau kurtailmen, atau ketika Grup mengakui biaya restrukturisasi terkait atau pesangon, jika lebih dahulu. Bunga neto dihitung dengan mengalikan tingkat diskonto dengan liabilitas atau aset imbalan pasti neto. Biaya imbalan pasti dibagi menjadi tiga kategori:

The owners of temporary syirkah funds earn profit in accordance with the agreement and receive loss in proportion to the amount of funds from each party. The return of temporary syirkah funds are based on revenue sharing concept.

**aj. Depositors Share on Revenue Sharing of Temporary Syirkah Funds**

Depositors share on the revenue sharing of temporary syirkah funds represents their share on the return of their fund managed by the Bank based on Mudharabah Mutlaqah principles, which is recognized based on distributed income.

Distribution of income is based on revenue sharing principle, which is calculated from gross profit margin.

**ak. Pension Plan and Other Post-employment Benefits**

The Bank established a defined benefit pension plan covering the local permanent employments. In addition, the Group also provides post-employment benefits as required under Labor Law No. 13/2003 (the "Labor Laws"). For normal pension scheme, the Bank calculates and recognizes the higher of the benefits under the Labor Law and those under such pension plan.

The cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the consolidated statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurements recognised in other comprehensive income are reflected immediately in "retained earnings" not reclassified. Past service cost is recognized in profit or loss when the plan amendment or curtailment occurs, or when the Group recognizes related restructuring costs or termination benefits, if earlier. Net interest is calculated by applying a discount rate to the net defined benefit liability or asset. Defined benefit costs are in to three categories:

- Biaya jasa (termasuk biaya jasa kini, biaya jasa lalu serta keuntungan dan kerugian kurtailmen dan penyelesaian)
- Beban atau pendapatan bunga neto
- Pengukuran kembali

Grup menyajikan dua komponen pertama dari biaya imbalan pasti di laba rugi. Keuntungan dan kerugian kurtailmen dicatat sebagai biaya jasa lalu.

Kewajiban liabilitas imbalan pensiun yang diakui pada laporan posisi keuangan konsolidasian merupakan defisit atau surplus aktual dalam program imbalan pasti Grup. Surplus yang dihasilkan dari perhitungan ini terbatas pada nilai kini manfaat ekonomis yang tersedia dalam bentuk pengembalian dana program dan pengurangan iuran masa depan atas program.

**al. Pajak Penghasilan**

Beban pajak penghasilan merupakan jumlah pajak yang terutang dan pajak tangguhan.

Pajak kini terutang berdasarkan laba kena pajak untuk suatu tahun. Laba kena pajak berbeda dari laba sebelum pajak seperti yang dilaporkan di laba rugi karena tidak memperhitungkan penghasilan atau beban yang dikenakan pajak atau dikurangkan pada tahun berbeda dan tidak memperhitungkan pos-pos yang tidak pernah dikenakan pajak atau tidak dapat dikurangkan. Liabilitas Grup untuk pajak kini dihitung berdasarkan tarif pajak yang telah berlaku pada akhir periode pelaporan.

Provisi diakui untuk penentuan pajak yang tidak pasti, tetapi kemungkinan besar akan mengakibatkan arus keluar dana kepada otoritas pajak. Provisi diukur sebesar estimasi terbaik atas jumlah ekspektasian yang terhutang. Penilaian berdasarkan pada pertimbangan professional pajak dalam Grup yang didukung dengan pengalaman lalu atas aktivitas tersebut dan dalam kasus tertentu berdasarkan saran pakar pajak independen.

- Service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements).
- Net interest expense or income.
- Remeasurement.

The Group presents the first two components of defined benefit costs in profit or loss. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the consolidated statements of financial position represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

**al. Income Tax**

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

A provision is recognized for those matters for which the tax determination is uncertain but it is considered probable that there will be a future outflow of funds to a tax authority. The provisions are measured at the best estimate of the amount expected to become payable. The assessment is based on the judgement of tax professionals within the Group supported by previous experience in respect of such activities and in certain cases based on specialist independent tax advice.

Pajak tangguhan diakui atas perbedaan temporer antara jumlah tercatat aset dan liabilitas dalam laporan keuangan konsolidasian dengan dasar pengenaan pajak yang digunakan dalam perhitungan laba kena pajak. Liabilitas pajak tangguhan umumnya diakui untuk seluruh perbedaan temporer kena pajak. Aset pajak tangguhan umumnya diakui untuk seluruh perbedaan temporer yang dapat dikurangkan sepanjang kemungkinan besar bahwa laba kena pajak akan tersedia sehingga perbedaan temporer dapat dimanfaatkan. Aset dan liabilitas pajak tangguhan tidak diakui jika perbedaan temporer timbul dari pengakuan awal (selain dari kombinasi bisnis) dari aset dan liabilitas suatu transaksi yang tidak mempengaruhi laba kena pajak atau laba akuntansi. Selain itu, liabilitas pajak tangguhan tidak diakui jika perbedaan temporer timbul dari pengakuan awal *goodwill*.

Aset dan liabilitas pajak tangguhan diukur dengan menggunakan tarif pajak yang diharapkan berlaku dalam periode ketika liabilitas diselesaikan atau aset dipulihkan berdasarkan tarif pajak (dan peraturan pajak) yang telah berlaku atau secara substantif telah berlaku pada akhir periode pelaporan.

Pengukuran aset dan liabilitas pajak tangguhan mencerminkan konsekuensi pajak yang sesuai dengan cara Grup memperkirakan, pada akhir periode pelaporan, untuk memulihkan atau menyelesaikan jumlah tercatat aset dan liabilitasnya.

Jumlah tercatat aset pajak tangguhan ditelaah ulang pada akhir periode pelaporan dan dikurangi jumlah tercatatnya jika kemungkinan besar laba kena pajak tidak lagi tersedia dalam jumlah yang memadai untuk mengkompensasikan sebagian atau seluruh aset pajak tangguhan tersebut.

Pajak kini dan pajak tangguhan diakui sebagai beban atau penghasilan dalam laba rugi periode berjalan, kecuali untuk pajak penghasilan yang timbul dari transaksi atau peristiwa yang diakui diluar laba rugi (baik dalam penghasilan komprehensif lain maupun secara langsung di ekuitas), dalam hal tersebut pajak juga diakui di luar laba rugi atau yang timbul dari akuntansi awal kombinasi bisnis. Dalam hal kombinasi bisnis, pengaruh pajak termasuk dalam akuntansi kombinasi bisnis.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary differences arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary differences arises from the initial recognition of goodwill.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on the tax rates (and tax laws) that have been enacted, or substantively enacted, by the end of the reporting period.

The measurement of deferred tax assets and liabilities reflects the consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of their assets and liabilities.

The carrying amount of deferred tax asset is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Current and deferred tax are recognized as an expense or income in profit or loss, except when they relate to items that are recognized outside of profit or loss (whether in other comprehensive income or directly in equity), in which case the tax is also recognized outside of profit or loss, or where they arise from the initial accounting for a business combination. In the case of a business combination, the tax effect is included in the accounting for the business combination.

Aset dan liabilitas pajak tangguhan saling hapus ketika entitas memiliki hak yang dapat dipaksakan secara hukum untuk melakukan saling hapus aset pajak kini terhadap liabilitas pajak kini dan ketika aset pajak tangguhan dan liabilitas pajak tangguhan terkait dengan pajak penghasilan yang dikenakan oleh otoritas perpajakan yang sama atas entitas kena pajak yang sama atau entitas kena pajak yang berbeda yang memiliki intensi untuk memulihkan aset dan liabilitas pajak kini dengan dasar neto, atau merealisasikan aset dan menyelesaikan liabilitas secara bersamaan, pada setiap periode masa depan dimana jumlah signifikan atas aset atau liabilitas pajak tangguhan diharapkan untuk diselesaikan atau dipulihkan.

**am. Laba per Saham**

Laba per saham dasar dihitung dengan membagi laba bersih yang diatribusikan kepada pemilik entitas induk dengan jumlah rata-rata tertimbang saham yang beredar pada tahun yang bersangkutan.

Laba per saham dilusian dihitung dengan membagi laba bersih yang diatribusikan kepada pemilik entitas induk dengan jumlah rata-rata tertimbang saham biasa yang telah disesuaikan dengan dampak dari semua efek berpotensi saham biasa yang dilutif.

**an. Informasi Segmen**

Segmen operasi diidentifikasi berdasarkan laporan internal mengenai komponen dari Grup yang secara regular direviu oleh "pengambil keputusan operasional" dalam rangka mengalokasikan sumber daya dan menilai kinerja informasi segmen.

Segmen operasi adalah suatu komponen dari entitas:

- a) yang terlibat dalam aktivitas bisnis yang mana memperoleh pendapatan dan menimbulkan beban (termasuk pendapatan dan beban terkait dengan transaksi dengan komponen lain dari entitas yang sama);
- b) yang hasil operasinya dikaji ulang secara regular oleh pengambil keputusan operasional untuk membuat keputusan tentang sumber daya yang dialokasikan pada segmen tersebut dan menilai kinerjanya; dan
- c) dimana tersedia informasi keuangan yang dapat dipisahkan.

Informasi yang digunakan oleh pengambil keputusan operasional dalam rangka alokasi sumber daya dan penilaian kinerja mereka terfokus pada kategori dari setiap produk.

Deferred tax assets and liabilities are offset when there is legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities when there is an intention to settle its current tax assets and current tax liabilities on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

**am. Earnings per Share**

Basic earnings per share is computed by dividing net income attributable to the owners of the Bank by the weighted average number of shares outstanding during the year.

Diluted earnings per share is computed by dividing net income attributable to the owners of the Bank by the weighted average number of shares outstanding as adjusted for the effects of all potentially dilutive ordinary shares.

**an. Segment Information**

Operating segments identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segments and to assess their performances.

An operating segment is a component of an entity:

- a) that engages in business activities from which it may earn revenues and incurred expenses (including revenues and expenses relating to the transactions with other components of the same entity);
- b) whose operating results are reviewed regularly by the entity's chief operating decision maker to make decision about resources to be allocated to the segments and assess its performance; and
- c) for which discrete financial information is available.

Information reported to the chief operating decision maker for the purpose of resource allocation and assessment of performance is more specifically focused on the category of each product.

#### 4. PERTIMBANGAN KRITIS AKUNTANSI DAN SUMBER ESTIMASI KETIDAKPASTIAN

Dalam penerapan kebijakan akuntansi Grup, yang dijelaskan dalam Catatan 3, manajemen diwajibkan untuk membuat pertimbangan, estimasi dan asumsi tentang jumlah tercatat aset dan liabilitas yang tidak tersedia dari sumber lain. Estimasi dan asumsi yang terkait didasarkan pada pengalaman historis dan faktor-faktor lain yang dianggap relevan. Hasil aktualnya mungkin berbeda dari estimasi tersebut.

Estimasi dan asumsi yang mendasari ditelaah secara berkelanjutan. Revisi estimasi akuntansi diakui dalam periode dimana estimasi tersebut direvisi jika revisi hanya mempengaruhi periode tersebut, atau pada periode revisi dan periode masa depan jika revisi mempengaruhi periode saat ini dan masa depan.

##### Pertimbangan Kritis dalam Penerapan Kebijakan Akuntansi

Di bawah ini adalah pertimbangan kritis, selain dari estimasi yang telah diatur, dimana manajemen telah membuat suatu proses penerapan kebijakan akuntansi Grup dan memiliki pengaruh paling signifikan terhadap jumlah yang diakui dalam laporan keuangan konsolidasian.

#### 4. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group accounting policies, which are described in Note 3, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period which the estimates is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

##### Critical Judgement in Applying Accounting Policies

Below are the critical judgments, apart from those involving estimations, that the managements have made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognized in the consolidated financial statements.

##### **Control over subsidiaries**

#### **Aset keuangan yang dimiliki hingga jatuh tempo**

Manajemen telah menelaah aset keuangan Grup yang dimiliki hingga jatuh tempo karena persyaratan pemeliharaan modal dan likuiditas dan telah dikonfirmasi intensi positif Grup dan kemampuan untuk memiliki aset tersebut hingga jatuh tempo. Rincian dan jumlah tercatat aset keuangan yang dimiliki hingga jatuh tempo dijelaskan dalam Catatan 9.

#### **Sumber Estimasi Ketidakpastian**

Asumsi utama mengenai masa depan dan sumber estimasi ketidakpastian utama lainnya pada akhir periode pelaporan, yang memiliki risiko signifikan yang mengakibatkan penyesuaian material terhadap jumlah tercatat aset dan liabilitas dalam periode pelaporan berikutnya dijelaskan dibawah ini:

#### **Rugi penurunan nilai aset keuangan**

Grup menilai penurunan nilai aset keuangan pada setiap tanggal pelaporan. Dalam menentukan apakah rugi penurunan nilai harus dicatat dalam laba rugi, manajemen membuat penilaian, apakah terdapat bukti obyektif bahwa kerugian telah terjadi. Suatu aset keuangan dinyatakan mengalami penurunan nilai bila ada bukti obyektif terjadinya peristiwa yang berdampak pada estimasi arus kas atas aset keuangan. Bukti tersebut meliputi data yang dapat diobservasi yang menunjukkan bahwa telah terjadi peristiwa yang merugikan dalam status pembayaran debitur atau kondisi ekonomi nasional atau lokal yang berkorelasi dengan kelalaian membayar piutang.

Cadangan kerugian penurunan nilai akan dibentuk untuk mengakui kerugian penurunan nilai yang terjadi dalam portofolio aset keuangan. Manajemen menggunakan perkiraan berdasarkan pengalaman kerugian historis untuk aset dengan karakteristik risiko kredit dan bukti obyektif adanya penurunan nilai yang serupa dengan yang ada dalam portofolio pada saat penjadwalan arus kas masa depan.

On January 25, 2019, VMF has completed a series of Limited Public Offering II processes through the issuance of Pre-emptive Rights (HMETD). The Bank did not execute or take away its rights when the new shares were issued so that the Bank had diluted its ownership in VMF from previously owning 57.54% to 26.15%. #### **Held-to-maturity financial assets**

The management have reviewed the Group's held-to-maturity financial assets in the light of its capital maintenance and liquidity requirements and have confirmed the Group's positive intention and ability to hold those assets to maturity. The details and its carrying amounts of the held-to-maturity financial assets are described in Note 9.

#### **Key Sources of Estimation Uncertainty**

The key assumptions concerning future and other key sources of estimation uncertainty at the end of the reporting period, that may have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are discussed below:

#### **Impairment loss on financial assets**

The Group assesses its financial assets at each reporting date. In determining whether the impairment loss should be recorded in profit or loss, management makes judgement as to whether there is an objective evidence that loss event has occurred. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the financial assets have been affected. The evidence includes observable data which indicates that an adverse event has occurred in the payment status of borrowers or in the national or local economic conditions that correlate with the omission of payment of receivables.

Provision for loss on impairment will be set up to recognize the impairment loss that occurs in a portfolio of financial assets. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the portfolio when scheduling the future cash flows.

Manajemen juga membuat penilaian atas metodologi dan asumsi untuk memperkirakan jumlah dan waktu arus kas masa depan yang direviu secara berkala untuk mengurangi perbedaan antara estimasi kerugian dan kerugian aktualnya.

Grup melakukan penilaian terhadap penurunan nilai dalam dua cara, yaitu:

- a. Individual, dilakukan untuk jumlah aset keuangan yang melebihi ambang batas (*threshold*) tertentu dan aset keuangan yang memiliki bukti obyektif penurunan nilai yang telah teridentifikasi secara terpisah pada tanggal laporan posisi keuangan konsolidasian. Kerugian penurunan nilai adalah selisih antara nilai tercatat dan nilai kini dari estimasi terbaik atas arus kas masa depan dan realisasi agunan pada tingkat suku bunga efektif awal dari aset keuangan tersebut. Estimasi ini dilakukan dengan mempertimbangkan kapasitas utang dan fleksibilitas keuangan debitur, kualitas pendapatan debitur, jumlah dan sumber arus kas, industri di mana debitur beroperasi dan nilai realisasi agunan. Estimasi jumlah dan waktu pemulihan masa depan akan membutuhkan banyak pertimbangan. Jumlah penerimaan tergantung pada kinerja debitur pada masa mendatang dan nilai agunan, keduanya akan dipengaruhi oleh kondisi ekonomi di masa depan, di samping itu agunan mungkin tidak mudah dijual. Nilai aktual arus kas masa depan dan tanggal penerimaan mungkin berbeda dari estimasi tersebut dan akibatnya kerugian aktual yang terjadi mungkin berbeda dengan yang diakui dalam laporan keuangan konsolidasian.
- b. Kolektif, dilakukan untuk jumlah aset keuangan yang tidak melebihi ambang batas (*threshold*) tertentu, tidak memiliki bukti obyektif penurunan nilai dan aset keuangan yang memiliki bukti obyektif penurunan nilai, namun belum diidentifikasi secara terpisah pada tanggal laporan posisi keuangan konsolidasian. Pembentukan kerugian penurunan nilai dilakukan secara kolektif dengan antara lain memperhitungkan jumlah dan lamanya tunggakan, agunan dan pengalaman kerugian masa lalu. Faktor paling penting dalam pembentukan cadangan adalah *probability of default* dan *loss given default*. Kualitas aset keuangan pada masa mendatang dipengaruhi oleh ketidakpastian yang dapat menyebabkan kerugian aktual aset keuangan dapat berbeda secara material dari cadangan kerugian penurunan nilai yang telah dibentuk. Ketidakpastian ini termasuk lingkungan ekonomi, suku bunga dan pengaruhnya terhadap pembelanjaan debitur, tingkat pengangguran dan perilaku pembayaran.

Management also makes judgement as to the methodology and assumptions for estimating the amount and timing of future cash flows which are reviewed regularly to reduce any difference between loss estimate and actual loss.

The Group performs assessment of the impairment amounts in two ways, namely:

- a. Individually, made to the amount of financial assets that exceed certain threshold and to certain financial assets that have objective evidence that impairment has been identified separately on the date of consolidated statement of financial position. Impairment loss is the difference between the carrying amount and the present value of the best estimated future cash flows and realization of collateral at the initial effective interest rates of financial assets. The estimates are made by considering the debt capacity and financial flexibility of the debtor, debtor's earnings quality, quantity and source of cash flows, industry in which the debtor operates and realizable value of collateral. Estimating the amount and timing of future recovery will require a lot of considerations. The amount of revenue depends on the performance of the debtor in the future and the value of collateral, both of which will be affected by future economic conditions, in addition to the fact that the collateral may not be easily sold. The actual value and date of receipt of future cash flows may differ from the estimates and as a result, actual loss which occurs may be different from the amount recognized in the consolidated financial statements.
- b. Collectively, made to the amount of financial assets that do not exceed certain threshold and do not have objective evidence of impairment when assessed individually, and to the financial assets that have objective evidence of impairment but has not been identified separately on the date of consolidated statement of financial position. Establishment of collective impairment loss is made by, among others, taking into account the number and duration of arrears, collateral and past loss experience. The most important factors in establishing reserves are the probability of default and the loss given default. The quality of financial assets in the future is affected by uncertainties that could cause actual loss on financial assets, which may differ materially from the impairment loss reserves that have been established. These uncertainties include the economic environment, interest rates and the effect on spending of the debtor, unemployment rate and payment behavior.

#### Manfaat Karyawan

Penentuan liabilitas imbalan kerja tergantung pada pemilihan asumsi tertentu yang digunakan oleh aktuaris dalam menghitung jumlah liabilitas tersebut. Asumsi tersebut termasuk antara lain tingkat diskonto dan tingkat kenaikan gaji. Realisasi yang berbeda dari asumsi Grup diakui langsung dalam penghasilan komprehensif lain konsolidasian dan akibatnya akan berpengaruh terhadap jumlah penghasilan komprehensif lain serta liabilitas yang diakui di tahun berjalan. Walaupun asumsi Grup dianggap tepat dan wajar, namun perubahan signifikan pada kenyataannya atau perubahan signifikan dalam asumsi yang digunakan dapat berpengaruh secara signifikan terhadap liabilitas imbalan pasca kerja Grup.

#### Penentuan Nilai Wajar dan Taksiran Masa Manfaat Ekonomis Aset Tetap

Aset tetap milik Grup diukur berdasarkan nilai wajarnya. Grup menggunakan jasa penilai independen yang terdaftar di OJK untuk mengestimasi nilai aset tetap berdasarkan pendekatan data pasar, pendekatan pendapatan dan pendekatan biaya. Informasi mengenai penilai independen dan cara penentuan nilai wajar dijelaskan dalam Catatan 17 dan 52.

Masa manfaat setiap aset tetap Grup ditentukan berdasarkan kegunaan yang diharapkan dari aset tersebut. Estimasi ini ditentukan berdasarkan evaluasi teknis internal dan pengalaman atas aset sejenis. Masa manfaat setiap aset direviu secara periodik dan disesuaikan apabila prakiraan berbeda dengan estimasi sebelumnya karena keausan, keusangan teknis dan komersial, hukum atau keterbatasan lainnya atas pemakaian aset. Namun terdapat kemungkinan bahwa hasil operasi dimasa mendatang dapat dipengaruhi secara signifikan oleh perubahan atas jumlah serta periode pencatatan biaya yang diakibatkan karena perubahan faktor yang disebutkan di atas.

Perubahan masa manfaat aset tetap dapat mempengaruhi jumlah biaya penyusutan yang diakui dan penurunan nilai tercatat aset tersebut.

Nilai tercatat aset tetap diungkapkan dalam Catatan 17.

#### Employee benefits

Determination of liability for employee benefits depends on the selection of certain assumptions used by actuaries in calculating the amount of such liability. These assumptions include, among others, the discount rate and the rate of increase in salaries. Different realization of the Group's assumptions is directly recognized in the consolidated other comprehensive income and therefore, generally affect the recognized amount of other comprehensive income and recorded obligation in the period in which they occur. Although the assumptions used by the Group are assessed to be appropriate and fair, significant changes in actual events or significant changes in the assumptions used can significantly affect the Group's post-employment benefits liability.

#### Fair Value Measurement and Estimated Useful Lives of Premises and Equipment

Premises and equipment owned by the Group are measured based on its fair value. The Group use independent appraiser registered in OJK to estimate the value of premises and equipment based on market data approach, income approach and cost approach. Information regarding independent appraiser and valuation method to determine its fair value as described in Notes 17 and 52.

The useful life of each item of the Group's premises and equipment are estimated based on the period over which the asset is expected to be available for use. Such estimation is based on internal technical evaluation and experience with similar assets. The estimated useful life of each asset is reviewed periodically and updated if expectations differ from previous estimation due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the asset. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above.

A change in the estimated useful life of any item of premises and equipment would affect the recorded depreciation expense and decrease in the carrying values of these assets.

The carrying amounts of premises and equipment are disclosed in Note 17.

Utang bank memiliki suku bunga tetap maupun variabel, sehingga CFI terpapar risiko suku bunga atas nilai wajar (*fair value interest rate risk*) dan risiko suku bunga atas arus kas (*cash flow interest rate risk*).

Bank loans are arranged at both fixed and floating interest rates, thus, exposing CFI to fair value interest rate risk and cash flow interest rate risk.

**44. PROGRAM PENSIUN DAN IMBALAN PASCA KERJA LAINNYA**

**a. Program Pensiun Imbalan Pasti**

Bank menyelenggarakan program pensiun imbalan pasti untuk semua karyawan lokal. Program ini memberikan imbalan pensiun berdasarkan penghasilan dasar pensiun dan masa kerja karyawan.

Dengan akta No. 25 tanggal 15 Agustus 1981 dari notaris Hendra Karyadi, S.H., yang disahkan oleh Menteri Keuangan dengan Surat No. S-879/MK.11/1983 tanggal 15 Desember 1983, Bank mendirikan Yayasan Dana Jaminan Hari Tua Pan Indonesia Bank (YDJHT PIB).

Rapat Umum Luar Biasa Para Pemegang Saham Bank tanggal 4 Januari 1994 telah menyetujui dan memutuskan untuk menyesuaikan YDJHT PIB menjadi Dana Pensiun Karyawan Pan Indonesia Bank (DPK PIB). Penyesuaian nama menjadi DPK PIB maupun peraturannya telah mendapat pengesahan Menteri Keuangan Republik Indonesia dengan keputusannya No. Kep-069/KM.17/1994 tanggal 4 April 1994, dan telah diumumkan dalam Berita Negara Republik Indonesia No. 46 tanggal 10 Juni 1994.

DPK PIB mengelola program pensiun manfaat pasti yang memberikan jaminan hari tua bagi seluruh karyawan yang telah pensiun atau, bila yang bersangkutan meninggal dunia, kepada janda-janda/duda-duda dan anak-anak mereka di bawah usia 21 tahun atau belum menikah.

Pendanaan DPK PIB terutama berasal dari kontribusi pemberi kerja dan karyawan. Kontribusi karyawan sebesar 3% dari gaji pokok.

Program pensiun imbalan pasti memberikan eksposur kepada Grup terhadap risiko aktuarial seperti risiko investasi, risiko tingkat bunga, risiko harapan hidup dan risiko gaji.

Risiko investasi

Nilai kini kewajiban imbalan pasti dihitung menggunakan tingkat diskonto yang ditetapkan dengan mengacu pada imbal hasil obligasi korporasi berkualitas tinggi; jika pengembalian aset program di bawah tingkat tersebut, hal itu akan mengakibatkan defisit program. Saat ini program tersebut memiliki investasi yang relatif seimbang pada efek ekuitas, instrumen utang dan perumahan. Karena sifat jangka panjang dari liabilitas program, dewan dana pensiun perlu menetapkan bahwa bagian wajar dari aset program harus diinvestasikan pada efek ekuitas dan real estate untuk meningkatkan imbal hasil yang dihasilkan oleh dana.

**44. PENSION PLAN AND OTHER POST-EMPLOYMENT BENEFITS**

**a. Defined Benefits Pension Plan**

The Bank established defined benefit pension plan covering all the local permanent employees. This plan provides pension benefits based on years of service and salaries of the employees.

The Bank established Yayasan Dana Jaminan Hari Tua Pan Indonesia Bank (YDJHT PIB), based on Deed No. 25 dated August 15, 1981 of notary Hendra Karyadi, S.H., which is approved by the Minister of Finance of the Republic of Indonesia through Decision Letter No. S-879/MK.11/1983 dated December 15, 1983.

Based on the Extraordinary Meeting of the Bank's Stockholders on January 4, 1994, the stockholders agreed and decided to change the name of YDJHT PIB into Dana Pensiun Karyawan Pan Indonesia Bank (DPK PIB). The change in the name and its regulation was approved by the Minister of Finance of Republic of Indonesia through Decision Letter No. Kep-069/KM.17/1994 dated April 4, 1994, and is published in the State Gazette of the Republic of Indonesia No. 46 dated June 10, 1994.

DPK PIB manages the Bank's defined benefit pension program, which provides pension benefits to the employees when they retire or, in case of death, to their widows/widowers and their children below 21 years old or their unmarried children.

DPK PIB is funded by contributions from both the employer and its employees. Employees contributions amounted to 3% of their basic salaries.

The defined benefit pension plan typically expose the Group to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk

The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to high quality corporate bond yields; if the return on plan asset is below this rate, it will create a plan deficit. Currently the plan has a relatively balanced investment in equity securities, debt instruments and real estates. Due to the long-term nature of the plan liabilities, the Board of the pension fund considers it appropriate that a reasonable portion of the plan assets should be invested in equity securities and in real estate to leverage the return generated by the fund.

Risiko tingkat bunga

Penurunan suku bunga obligasi akan meningkatkan liabilitas program; Namun, sebagian akan di offset (saling hapus) oleh peningkatan imbal hasil atas investasi instrumen utang.

Risiko harapan hidup

Nilai kini kewajiban imbalan pasti dihitung dengan mengacu pada estimasi terbaik dari mortalitas peserta program baik selama dan setelah kontrak kerja. Peningkatan harapan hidup peserta program akan meningkatkan liabilitas program.

Risiko gaji

Nilai kini kewajiban imbalan pasti dihitung dengan mengacu pada gaji masa depan peserta program. Dengan demikian, kenaikan gaji peserta program akan meningkatkan liabilitas program itu.

Nilai yang diakui dalam laporan laba rugi dan penghasilan komprehensif lain atas program pensiun imbalan pasti adalah sebagai berikut:

Interest risk

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Longevity risk

The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Nilai wajar instrumen ekuitas, utang dan derivatif di atas ditentukan berdasarkan harga pasar kuotasian di pasar aktif sedangkan nilai wajar perumahan tidak didasarkan pada harga pasar kuotasian di pasar aktif. Dana pensiun memiliki kebijakan untuk menggunakan swap tingkat bunga (*interest rate swap*) sebagai lindung nilai terhadap eksposur risiko suku bunga. Kebijakan ini telah dilaksanakan selama tahun berjalan dan sebelumnya. Eksposur mata uang asing sepenuhnya dilindungi dengan menggunakan kontrak berjangka valuta asing.

The fair values of the above equity, debt instruments and derivatives are determined based on quoted market prices in active markets whereas the fair values of properties are not based on quoted market prices in active markets. It is the policy of the fund to use interest rate swaps to hedge its exposure to interest rate risk. This policy has been implemented during the current and prior years. Foreign currency exposures are fully hedged by the use of the forward foreign exchange contracts.

Asumsi aktuarial yang signifikan untuk penentuan kewajiban imbalan pasti adalah tingkat diskonto dan kenaikan gaji yang diharapkan. Sensitivitas analisis di bawah ini ditentukan berdasarkan masing-masing perubahan asumsi yang mungkin terjadi pada akhir periode pelaporan, dengan semua asumsi lain konstan.

Significant actuarial assumptions for the determination of the defined obligation are discount rate and expected salary increase. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

- Jika tingkat diskonto lebih tinggi (lebih rendah) 1%, kewajiban imbalan pasti akan berkurang sebesar Rp 176.452 juta (meningkat sebesar Rp 203.780 juta) pada tanggal 31 Desember 2019 dan berkurang sebesar Rp 174.838 juta (meningkat sebesar Rp 203.543 juta) pada tanggal 31 Desember 2018.
- Jika pertumbuhan gaji yang diharapkan naik (turun) sebesar 1%, kewajiban imbalan pasti akan naik sebesar Rp 177.262 juta (turun sebesar Rp 157.403 juta) pada tanggal 31 Desember 2019 dan naik sebesar Rp 180.349 juta (turun sebesar Rp 158.733 juta) pada tanggal 31 Desember 2018.
- If the discount rate is 1% basis points higher (lower), the defined benefit obligation would decrease by Rp 176,452 million (increase by Rp 203,780 million) as of December 31, 2019 and decrease by Rp 174,838 million (increase by Rp 203,543 million) as of December 31, 2018.
- If the expected salary growth increases (decreases) by 1%, the defined benefit obligation would increase by Rp 177,262 million (decrease by Rp 157,403 million) as of December 31, 2019 and increase by Rp 180,349 million (decrease by Rp 158,733 million) as of December 31, 2018.

Analisis sensitivitas yang disajikan di atas mungkin tidak mewakili perubahan yang sebenarnya dalam kewajiban imbalan pasti mengingat bahwa perubahan asumsi terjadinya tidak terisolasi satu sama lain karena beberapa asumsi tersebut mungkin berkorelasi.

Selanjutnya, dalam menyajikan analisis sensitivitas di atas, nilai kini kewajiban imbalan pasti dihitung dengan menggunakan metode *projected unit credit* pada akhir periode pelaporan, yang sama dengan yang diterapkan dalam menghitung liabilitas manfaat pasti yang diakui dalam laporan posisi keuangan konsolidasian.

Asumsi utama yang digunakan dalam menentukan biaya manfaat pensiun adalah sebagai berikut:

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the sensitivity analysis above, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the consolidated statements of financial position.

The key actuarial assumptions used for the calculation of pension benefits are as follows:

|                                             | 2019                                                          | 2018           |                                          |

Asumsi aktuarial yang signifikan untuk penentuan kewajiban imbalan pasti adalah tingkat diskonto dan kenaikan gaji yang diharapkan. Sensitivitas analisis di bawah ini ditentukan berdasarkan masing-masing perubahan asumsi yang mungkin terjadi pada akhir periode pelaporan, dengan semua asumsi lain konstan.

- Jika tingkat diskonto lebih tinggi (lebih rendah) 1%, kewajiban imbalan pasti akan berkurang sebesar Rp 5.007 juta (meningkat sebesar Rp 5.622 juta) pada tanggal 31 Desember 2019 dan berkurang sebesar Rp 5.419 juta (meningkat sebesar Rp 6.148 juta) pada tanggal 31 Desember 2018.
- Jika pertumbuhan gaji yang diharapkan naik (turun) sebesar 1%, kewajiban imbalan pasti akan naik sebesar Rp 4.582 juta (turun sebesar Rp 4.167 juta) pada tanggal 31 Desember 2019 dan naik sebesar Rp 5.151 juta (turun sebesar Rp 4.632 juta) pada tanggal 31 Desember 2018.

Analisis sensitivitas yang disajikan di atas mungkin tidak mewakili perubahan yang sebenarnya dalam kewajiban imbalan pasti mengingat bahwa perubahan asumsi terjadinya tidak terisolasi satu sama lain karena beberapa asumsi tersebut mungkin berkorelasi.

Selanjutnya, dalam menyajikan analisis sensitivitas di atas, nilai kini kewajiban imbalan pasti dihitung dengan menggunakan metode *projected unit credit* pada akhir periode pelaporan, yang sama dengan yang diterapkan dalam menghitung liabilitas manfaat pasti yang diakui dalam laporan posisi keuangan.

Perhitungan imbalan pasca kerja dihitung oleh PT Dayamandiri Dharmakonsilindo aktuaris independen dengan menggunakan asumsi utama sebagai berikut:

Significant actuarial assumptions for the determination of the defined obligation are discount rate and expected salary increase. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

- If the discount rate is 1% basis points higher (lower), the defined benefit obligation would decrease by Rp 5,007 million (increase by Rp 5,622 million) as of December 31, 2019 and decrease by Rp 5,419 million (increase by Rp 6,148 million) as of December 31, 2018.
- If the expected salary growth increases (decreases) by 1%, the defined benefit obligation would increase by Rp 4,582 million (decrease by Rp 4,167 million) as of December 31, 2019 and increase by Rp 5,151 million (decrease by Rp 4,632 million) as of December 31, 2018.

The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

Furthermore, in presenting the sensitivity analysis above, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the statement of financial position.

The cost of providing employee benefits is calculated by an independent actuary, PT Dayamandiri Dharmakonsilindo, using the following key assumptions:

### Teknik penilaian dan asumsi yang diterapkan untuk tujuan pengukuran nilai wajar

Nilai wajar aset keuangan dan non-keuangan dan liabilitas keuangan ditentukan sebagai berikut:

- Manajemen menganggap bahwa nilai tercatat kas, giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain, pendapatan yang masih akan diterima, simpanan, simpanan dari bank lain, efek yang dijual dengan janji dibeli kembali, bunga yang masih harus dibayar, setoran jaminan dan liabilitas keuangan lainnya dengan suku bunga tetap yang diakui dalam laporan keuangan konsolidasian mendekati nilai wajarnya karena jatuh tempo dalam jangka pendek atau yang memiliki tingkat suku bunga pasar.

### Valuation techniques and assumptions applied for the purposes of measuring fair value

The fair value of financial and non-financial assets and financial liabilities are determined as follows:

- Management considers that the carrying amount of cash, demand deposits with Bank Indonesia, demand deposits with other banks, placements with Bank Indonesia and other banks, income receivables, deposits, deposits from other banks, securities sold with agreements to repurchase, accrued interest, margin deposits and other financial instruments with fixed interest recognized in the consolidated financial statements approximate their fair values either because of their short-term maturities or they carry market rates of interest.

- Nilai wajar efek-efek dan penyertaan saham dengan syarat dan kondisi standar dan diperdagangkan di pasar aktif, surat berharga yang diterbitkan dan obligasi subordinasi ditentukan dengan mengacu pada kuotasi harga pasar.
- Nilai wajar tagihan dan liabilitas derivatif diukur dengan menggunakan kurs kuotasi dan kurva yield yang berasal dari suku bunga kuotasi mencocokkan jatuh tempo kontrak.
- Nilai wajar aset keuangan dan liabilitas keuangan lainnya (tidak termasuk yang dijelaskan di atas) ditentukan sesuai dengan model penentuan harga yang berlaku umum berdasarkan analisis *discounted cash flow* menggunakan harga dari transaksi pasar yang dapat diamati saat ini dan kutipan dealer untuk instrumen sejenis.
- Nilai wajar aset tetap ditentukan antara lain dengan menggunakan pendekatan pasar yang mempertimbangkan harga yang baru terjadi di pasar dari transaksi aset yang identik atau sebanding, pendekatan pendapatan yang mempertimbangkan pendapatan yang akan dihasilkan aset selama masa manfaatnya dan menghitung nilai melalui proses kapitalisasi. Kapitalisasi merupakan konversi pendapatan menjadi sejumlah modal dengan menggunakan tingkat diskonto yang sesuai, serta pendekatan biaya yang berdasarkan prinsip harga yang akan dibayarkan pembeli di pasar untuk aset yang akan dinilai, tidak lebih dari biaya untuk membeli atau membangun untuk aset yang setara, kecuali ada faktor waktu yang tidak wajar, ketidaknyamanan, risiko atau faktor lainnya.
- Fair value of securities and investments in shares of stocks with standard terms and conditions and traded on active markets, securities issued and subordinated bonds are determined with reference to quoted market prices.
- Fair value of derivative receivables and payables are measured using quoted forward exchange rates and yield curves derived from quoted interest rates matching maturities of the contracts.
- Fair value of other financial assets and financial liabilities (excluding those described above) are determined in accordance with generally accepted pricing models on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.
- Fair value of premises and equipment was determined based on market approach that consider current market value from identical or comparable assets transaction, income approach that consider the value of income that generates by the assets during its useful life and calculating the value through capitalization. Capitalization is conversion process from revenue into equity through appropriate discount rate, also cost approach that based on cost principal that will be paid by the buyer in the market for the assets that valued less than its cost to buy or to build the comparable assets, except for unfair timing factor, inconvenience, risk or other factors.

Tabel berikut ini memberikan analisis dari nilai wajar aset dan liabilitas yang dikelompokkan ke Level 1 sampai 3 didasarkan pada sejauh mana nilai wajar diamati.

The following table provides an analysis of fair value of assets and liabilities, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

Bank melakukan pengelolaan terhadap 8 (delapan) jenis risiko, sebagai berikut:

#### Manajemen Risiko Kredit

Risiko kredit adalah risiko kerugian keuangan yang timbul jika nasabah, klien atau rekanan Bank gagal memenuhi kewajiban kontraktualnya kepada Bank.

##### a. Pengukuran Risiko Kredit

Untuk mendukung kuantifikasi risiko kredit, Bank memiliki metode untuk menghitung cadangan penurunan nilai berdasarkan kualitas kredit. Untuk kredit yang memiliki kolektibilitas lancar dan dalam perhatian khusus, cadangan penurunan nilai dihitung secara kolektif dengan mempertimbangkan dua komponen:

1. *Probability of default* (PD) debitur atau counterpart atas kewajiban kontraktualnya; dan
2. Rasio kemungkinan pemulihan atas kewajiban yang telah wanprestasi (*loss given default*) (LGD).

Metode yang digunakan untuk menghitung PD adalah *Migration Analysis*. Metode ini dilakukan dengan menganalisis tingkat migrasi dari baki debit kredit. Sementara itu, kerugian ekonomi yang dialami oleh Bank saat terjadi default (LGD) dihitung dari rata-rata kerugian terhadap baki debit kredit.

Untuk kredit dengan kategori bermasalah, cadangan penurunan nilai dihitung dengan cara berbeda. Jika terbukti secara objektif terjadi penurunan nilai, maka cadangan penurunan nilai dihitung berdasarkan selisih dari baki debit dengan nilai sekarang arus kas yang nilainya berbeda untuk tiap debitur. Khusus untuk *unsecured loan* cadangan penurunan nilainya dihitung sebesar baki debit.

The Bank continuously developing sustainable risk management function, also continues to develop and improve risk management system framework and integrated and comprehensive internal control. Supported by management information system, the internal risk management could be optimized internally. However, the Bank must review periodically the reliability of internal control system and management information system thus risk management system is always updated.

The Bank manages eight types of risks as follows:

#### Credit Risk Management

Credit risk is the risk of financial losses should any of the Bank's customers, clients or counterparties fail to fulfill their contractual obligations to the Bank.

##### a. Credit Risk Measurement

To support the quantification of credit risk, the Bank has a method to calculate the allowance for impairment based on the credit quality. For loans in the category of current and special mention, the allowance for impairment collectively calculated by considering two components:

1. The probability of default (PD) of the client or counterparty based on its contractual obligations; and
2. The ratio of recovery on the defaulted obligations (Loss Given Default) (LGD).

The method used to calculate the PD is the Migration Analysis. The method is performed by analyzing the migration rate of outstanding loans. Meanwhile, the economic losses suffered by the Bank at the time of default (LGD) is calculated from the average of loss compare to outstanding.

For non-performing credit category, an allowance for impairment losses is calculated in a different way. If the loan is objectively proven to be impaired, the allowance is calculated based on the difference between the outstanding and the present value of cash flows whose value is different for each debtor. Especially for unsecured loan, the impairment value is calculated at the outstanding value.

b. Pengendalian batas risiko dan kebijakan mitigasi

Bank mengelola, membatasi dan mengendalikan konsentrasi risiko kredit di manapun risiko tersebut teridentifikasi – secara khusus, terhadap debitur individu dan kelompok, dan industri serta geografis. Bank menentukan tingkat risiko kredit yang dimiliki dengan menetapkan batas jumlah risiko yang bisa diterima yang terkait dengan satu debitur, atau beberapa kelompok debitur, dan berdasarkan segmen geografis dan industri. Batas pemberian kredit ditelaah mengikuti perubahan pada kondisi pasar dan ekonomi dan telaahan kredit secara periodik dan penilaian atas kemungkinan wanprestasi.

c. Eksposur maksimum terhadap risiko kredit (setelah dikurangi cadangan kerugian penurunan nilai)

Tabel berikut menyajikan eksposur maksimum terhadap risiko kredit Grup atas instrumen keuangan pada laporan posisi keuangan konsolidasian dan komitmen dan kontinjensi (rekening administratif), tanpa memperhitungkan agunan yang dimiliki atau jaminan kredit lainnya.

b. Risk Limit Control and Mitigation Policies

The Bank manages, limits and controls the credit risk's concentrations wherever the risk is identified - in particular, to individual counterparties and group, and industries and also geographical. The Bank determined the levels of credit risk by applying limits on the amount of risk that can be accepted related to a debtor or a group of debtors, and based on geographic and industry segments. Legal lending limits are reviewed by following the change in the market and economic conditions and periodically credit reviews and assessment of the default probability.

c. Maximum exposure to credit risk (net of allowance for impairment losses)

The following table presents the Group's maximum exposure to credit risk on financial instruments in its consolidated statements of financial position and commitments and contingencies (administrative accounts), without taking into account any collateral held or other credit enhancement.

- f. Kualitas kredit berdasarkan kelas aset keuangan

- f. Credit quality by class of financial asset

Sebagai bagian dari manajemen risiko kredit, Bank mengadopsi kebijakan rating kredit untuk mengukur kualitas kredit dari aset keuangan berdasarkan rating eksternal dan mengembangkan sistem rating kredit secara internal menggunakan data kualitatif dan kuantitatif.

As part of its credit risk management, the Bank adopted a credit rating policy to assess the credit quality of financial assets based on the external ratings and internally developed credit rating system which uses qualitative and quantitative data.

Kualitas kredit diklasifikasikan sebagai berikut:

The credit quality are defined as follows:

– *High Grade*

– High Grade

Peringkat dalam kategori ini memiliki kapasitas sangat baik dalam memenuhi komitmen keuangan dengan risiko kredit sangat rendah.

Rating in this category have an excellent capacity to meet financial commitments with very low credit risk.

– *Medium Grade*

Peringkat dalam kategori ini memiliki kapasitas yang baik dalam memenuhi komitmen keuangan dengan risiko kredit sangat rendah.

– *Low Grade*

Peringkat dalam kategori ini memiliki kapasitas yang cukup dalam memenuhi komitmen keuangan dengan risiko kredit sedang.

– *Unrated*

Kategori ini tidak menyediakan peringkat dikarenakan ketidaktersediaan dari model-model peringkat atau risiko pada lembaga pemerintah dan/atau agen-agen yang berhubungan dengan pemerintah.

Untuk PDSB, kualitas kredit dari pinjaman yang diberikan (piutang Murabahah segmen konsumsi dan retail) dinilai berdasarkan parameter *Historical/Behavioral DPD (Days Past Due)*.

Penilaian dilakukan dengan menganalisa data ketepatan membayar dalam rentang waktu 6 bulan ke belakang sehingga dapat digunakan sebagai indikasi tingkat potensi risiko kredit inherennya.

Kredit *grading* atas piutang tersebut diklasifikasikan berdasarkan parameter sebagai berikut:

*High Grade*

- Jumlah terjadinya *past due* nihil + jumlah hari *past due* nihil

*Medium Grade*

- Jumlah terjadinya *past due* rendah + jumlah hari *past due* rendah

*Low Grade*

- Jumlah terjadinya *past due* sedang + jumlah hari *past due* rendah
- jumlah terjadinya *past due* rendah + jumlah hari *past due* sedang

*Unrated*

- Jumlah terjadinya *past due* sedang + jumlah hari *past due* sedang

Untuk CFI, kualitas kredit dari piutang sewa pembiayaan, piutang pembiayaan konsumen, dan tagihan anjak piutang dinilai berdasarkan banyaknya dan jumlah hari *delay* selama masa tenor pembayaran.

– Medium Grade

Rating in this category have a good capacity to meet financial commitments with very low credit risk.

– Low Grade

Rating in this category have fairly acceptable capacity to meet financial commitments with standard credit risk.

– Unrated

This category are currently not assigned with any ratings due to unavailability of rating models or exposures and/or government related agencies.

For PDSB, the credit quality of loans (Murabahah receivables in the consumer and retail segment) is assessed based on the Historical/Behavioral Parameter of DPD (Days Past Due).

Assessment is conducted by analyzing at the data on timeliness of payment within the previous six-month period so that it can be used as an indication of the level of potential inherent credit risk.

Credit grading of the receivables is classified based on the following parameters:

High Grade

- Nil number of times past due + nil number of days past due

Medium Grade

- Low number of times past due + low number of days past due

Low Grade

- Moderate number of times past due + low number of days past due
- Low number of times past due + moderate number of days past due

Unrated

- Moderate number of times past due + moderate number of days past due

For CFI, the credit quality of receivables from finance lease receivables, consumer financing receivables, and factoring receivables are assessed based on the frequency and historical number of days of delays in payments during the credit term.

Kredit *grading* atas piutang-piutang tersebut akan berdasarkan parameter yang akan dijelaskan sebagai berikut:

The credit grades of the receivables are further classified into the followings:

Penggolongan kualitas piutang pembiayaan konsumen, piutang sewa pembiayaan dan tagihan anjak piutang VMF ditetapkan sebagai berikut:

Classification of VMF's consumer financing receivables, finance lease receivables and factoring receivables quality designated as follows:

#### Kelompok lancar

#### Current Group

Kelompok lancar dibagi menjadi dua bagian yaitu:

Current group is divided into two parts:

- a. *Dirating* : Piutang lancar yang di *rating* berdasarkan *Low Grade (High Risk)*, *Medium Grade (Medium Risk)* dan *High Grade (Low Risk)*.
- b. Tidak *dirating* : Piutang lancar yang tidak di *rating* yaitu pembayaran baru di bulan berjalan.

- a. Rated : Current receivables which are rated based on Low Grade (High Risk), Medium Grade (Medium Risk) and High Grade (Low Risk).
- b. Unrated : Current receivables that is not rated refer to new disbursement for the current month.

Kelompok yang *dirating* kemudian dilakukan pengelompokkan dengan ketentuan sebagai berikut:

Tabel di bawah ini menyajikan kualitas aset keuangan berdasarkan kelas dengan risiko kredit, jumlah yang disajikan adalah sebelum dikurangi cadangan kerugian penurunan nilai.

### Overdue Group

Overdue groups are divided into two parts:

- Past due but not impaired (overdue from collective group)

## Manajemen Risiko Pasar

Risiko pasar adalah potensi kerugian yang timbul karena adanya pergerakan faktor pasar dimana nilai wajar atau arus kas dimasa mendatang dari instrumen keuangan akan berfluktuasi akibat adanya pergerakan dari variabel pasar seperti : suku bunga, nilai tukar, harga ekuitas, dan harga komoditas. Risiko pasar melekat pada semua portfolio bank, baik posisi *trading book* maupun posisi *banking book* di neraca dan rekening administratif. Pemantauan risiko pasar senantiasa dilakukan secara rutin dan berkala baik harian, mingguan, hingga bulanan. Untuk meningkatkan fungsi pemantauan tersebut Bank menggunakan *Guava Treasury System* yang telah terintegrasi antara *front office*, *middle office*, dan *back office*.

## Market Risk Management

Market risk is the potential loss that occurs due to the movements of market factor in which the fair value or cash flow of financial instruments in the future fluctuates due to movements from market variables such as: interest rate, foreign exchange, equity price and commodity price. Market risk monitoring is constantly done routine and periodically in daily, weekly until monthly. To increase such monitoring function, the Bank utilize the *Guava Treasury System* which is integrated in front office, middle office and back office.

Risiko pasar dibagi menjadi dua bagian, yaitu:

Pada Triwulan IV 2019 Posisi Devisa Neto Bank sebesar IDR 304,622 Milyar atau 0,77% dan berada dalam kisaran antara Rp 245,65 miliar – Rp 970,95 miliar (0,61% - 2,51% dari modal Bank). Pada 18 Desember 2019, Rupiah menguat 0,93% (ptp) dibandingkan dengan level November 2019 sehingga sejak awal tahun menguat 2,90% (ytd). Penguatan Rupiah didukung oleh pasokan valas dari para eksportir dan aliran masuk modal asing yang tetap berlanjut sejalan prospek ekonomi Indonesia yang tetap terjaga, daya tarik pasar keuangan domestik yang tetap besar, serta ketidakpastian pasar keuangan global yang mereda. Ke depan, Bank Indonesia memandang nilai tukar Rupiah tetap stabil sesuai dengan fundamentalnya dan mekanisme pasar yang terjaga. Prakiraan ini didukung prospek Neraca Pembayaran Indonesia yang tetap baik akibat berlanjutnya aliran masuk modal asing seiring dengan prospek ekonomi domestik yang membaik dan imbal hasil yang menarik, serta dampak positif kebijakan moneter longgar di negara maju.

#### Sensitivitas Nilai Tukar

Analisis sensitivitas nilai tukar diukur dengan kemampuan ekspos modal Bank untuk menyerap potensi kerugian dari nilai tukar, yaitu dengan membuat asumsi perubahan/fluktuasi nilai tukar yang berlawanan arah dengan masing-masing posisi nilai tukar. Pada posisi Desember 2019, selisih lebih modal Bank mampu meng-cover risiko nilai tukar sebesar 369,59 kali, naik dibandingkan triwulan sebelumnya. Namun demikian, Bank dinilai tidak rentan terhadap pergerakan nilai tukar.

#### Exchange Rate Sensitivity

Exchange rate sensitivity analysis is measured by Bank's capital excess ability to absorb potential loss from the exchange rate, namely by creating assumption of changes/fluctuation of exchange rate that are in opposition with each exchange rate position. In the December 2019 position, the bank's capital excess has the adequacy to cover exchange rate risk as much as 369,59 times, increasing compared to previous quarter. Therefore, the Bank is not considered vulnerable to exchange rate movements.

## 2. Risiko Suku Bunga

Pengelolaan risiko pasar pada *banking book* terutama dalam pengelolaan risiko suku bunga dengan menganalisa *gap* penyesuaian suku bunga (*repricing gap*). Dalam analisa ini, baik aset maupun liabilitas di kelompokkan dalam *time bucket* tertentu sesuai dengan periode penyesuaian atau waktu perubahan suku bunga (*di-reprice*) untuk menghasilkan *net repricing gap* dimana *net repricing gap* ini dapat mengukur seberapa besar pengaruh jika terjadi perubahan suku bunga terhadap pendapatan bunga bersih (*Net Interest Income*).

Tabel di bawah ini menyajikan *Repricing Profile* aset dan liabilitas Bank yang sensitif terhadap suku bunga dan diurutkan berdasarkan rentang waktu suku bunga tersebut akan *di-repricing* (*Floating Rate*) atau sisa jangka waktu sampai dengan jatuh temponya (*fixed rate*).

## 2. Interest Rate Risk

Market risk management within the banking book mainly in the management of interest rate risk by analyzing interest rate gap adjustment (*repricing gap*). In this analysis, asset as well as liabilities are grouped into a certain time bucket corresponding to the adjustment period or time of interest rate shift (*reprice*) to result in net repricing gap in which this net repricing gap can measure the amount of impact if there were to be a shift of interest rate against net interest income.

The table below presents the re-pricing profile of the Bank's assets and liabilities that are sensitive to interest rates and sorted based on the time span of the interest rate will be repricing (*floating rate*) or the remaining term to maturity (*fixed rate*).

Selain itu untuk memperkecil dampak perubahan tingkat suku bunga terhadap pendapatan Bank, Bank senantiasa menjaga agar rasio RSA (*rate sensitive asset*) terhadap RSL (*rate sensitive liabilities*) tidak terlalu jauh dari 100%. Dengan rasio yang tidak jauh dari 100% maka apabila terjadi perubahan tingkat suku bunga secara paralel pada aset dan liabilitas, Bank tidak terekspos risiko suku bunga yang besar.

Rapat Dewan Gubernur (RDG) Bank Indonesia pada 18-19 Desember 2019 memutuskan untuk mempertahankan BI 7-Day Reverse Repo Rate (BI7DRR) sebesar 5,00%, suku bunga *Deposit Facility* sebesar 4,25%, dan suku bunga *Lending Facility* sebesar 5,75%. Kebijakan moneter tetap akomodatif dan konsisten dengan prakiraan inflasi yang terkendali dalam kisaran sasaran, stabilitas eksternal yang terjaga, serta upaya untuk menjaga momentum pertumbuhan ekonomi domestik di tengah perekonomian global yang melambat. Strategi operasi moneter terus ditujukan untuk menjaga kecukupan likuiditas, khususnya di pergantian tahun, dan mendukung transmisi bauran kebijakan yang akomodatif. Sementara itu, kebijakan makroprudensial yang akomodatif ditempuh untuk mendorong pembiayaan ekonomi sejalan dengan siklus finansial yang masih di bawah optimal dengan tetap memerhatikan prinsip kehati-hatian.

#### Sensitivitas Suku Bunga

Analisis sensitivitas suku bunga diukur dengan kemampuan eksekusi modal Bank untuk menyerap potensi kerugian dari perubahan suku bunga, yaitu dengan membuat asumsi perubahan/fluktuasi suku bunga terhadap aset dan liabilitas yang sensitif terhadap suku bunga. Pada posisi Desember 2019, selisih lebih modal Bank mampu meng-cover risiko suku bunga sebesar 12,09 kali lebih tinggi dibandingkan triwulan sebelumnya. Hal ini diartikan bahwa bank tidak rentan terhadap perubahan suku bunga.

Bank juga menganalisis kemungkinan perubahan tingkat suku bunga yang berdampak pada laba rugi portofolio Bank. Tabel di bawah ini menyajikan perubahan tingkat suku bunga posisi *trading book* dan *banking book* dan pengaruhnya terhadap laba rugi maupun ekuitas Bank.

In addition, to minimize the impact of interest rate changes on the Bank's income, the Bank continues to maintain the ratio of RSA (*rate sensitive assets*) against RSL (*rate sensitive liabilities*) near 100%. With a ratio which is near 100%, if there were a change in interest rates in parallel on the assets and liabilities, the Bank is not exposed to great interest rate risk.

The Bank Indonesia Board of Governors Meeting (RDG) on 18th and 19th December 2019 decided to hold the BI 7-Day Reverse Repo Rate at 5.00%, the Deposit Facility interest rate of 4.25% (DF) and Lending Facility (LF) interest rate of 5.75%. Monetary policy remains accommodative and consistent with the inflation in the target corridor, maintained external stability and maintain domestic economic growth momentum against slowdown of global economic condition. The monetary operations addressed to maintain adequate liquidity, particularly at the end of the year, and supporting the transmission of an accommodative policy. Meanwhile, the accommodative macroprudential policy used to stimulate economic financing in accordance with the suboptimal financial cycle, while still considering prudential principles.

#### Interest Rate Sensitivity

Interest rate sensitivity analysis is measured by the ability of the Bank's excess capital to absorb potential loss from changes in interest rate, namely by making an assumption of interest rate changes or fluctuations on assets and liabilities that are sensitive to interest rate. In December 2019, the excess of the Bank's capital able to cover the risk of interest rate of 12.09 times, higher compared to the previous quarter. It means that Bank is not vulnerable to interest rate changes.

The Bank also analyzes the possibility of interest rate changes which have an impact on the Bank's portfolio of profit and loss. The table below presents the interest rate changes for trading book and banking book position and its effect on the Bank's income and equity.

## Manajemen Risiko Likuiditas

Risiko likuiditas merupakan risiko yang timbul akibat Bank tidak dapat memenuhi kewajiban finansialnya kepada nasabah atau pihak lawan (*counterparty*) secara tepat waktu dengan biaya yang wajar. Manajemen risiko likuiditas merupakan hal yang sangat penting karena dapat berdampak signifikan terhadap keberlangsungan bisnis. Bank senantiasa berupaya memastikan bahwa setiap kebutuhan likuiditas dan pendanaan saat ini dan masa yang akan datang dapat terpenuhi baik dalam kondisi pasar normal maupun krisis.

Bank mengelola risiko likuiditas secara hati-hati (*prudent*) dengan memastikan kecukupan dana secara harian maupun di masa datang baik pada saat kondisi normal maupun kondisi krisis dalam pemenuhan liabilitas secara tepat waktu dari berbagai sumber dana yang tersedia, termasuk memastikan ketersediaan aset likuid berkualitas tinggi. Rencana pendanaan darurat (*contingency funding plan*) telah disusun untuk mempersiapkan Bank jika terjadi krisis.

Salah satu rasio likuiditas yang digunakan adalah rasio dari aset likuid terhadap liabilitas lancar. Bank juga telah mengimplementasi perhitungan *Liquidity Coverage Ratio* (LCR) sesuai dengan ketentuan LCR dari OJK.

Pada triwulan IV Stabilitas sistem keuangan tetap terjaga, meskipun fungsi intermediasi perbankan terus menjadi perhatian. Stabilitas sistem keuangan terjaga tercermin dari rasio kecukupan modal (*Capital Adequacy Ratio*/CAR) perbankan Oktober 2019 yang tinggi yakni 23,44%, dan rasio kredit bermasalah (*Non Performing Loan*/NPL) yang tetap rendah yakni 2,73% (*gross*) atau 1,25% (*net*). Pertumbuhan kredit melambat dari 7,89% (yoy) pada September 2019 menjadi 6,53% (yoy) pada Oktober 2019, terutama dipengaruhi permintaan kredit korporasi yang belum kuat. Pertumbuhan Dana Pihak Ketiga (DPK) pada Oktober 2019 tercatat sebesar 6,29% (yoy), menurun dibandingkan dengan pertumbuhan September 2019 sebesar 7,47% (yoy). Dengan mempertimbangkan perkembangan tersebut, pertumbuhan kredit perbankan 2019 diperkirakan sekitar 8% dan ditopang oleh pertumbuhan DPK juga sekitar 8%. Pada tahun 2020, pertumbuhan kredit dan pertumbuhan DPK diperkirakan membaik masing-masing dalam kisaran 10-12% dan 8-10% sejalan dengan prospek peningkatan pertumbuhan ekonomi. Ke depan, Bank Indonesia tetap menempuh kebijakan makroprudensial yang akomodatif dan memperkuat koordinasi dengan otoritas terkait sehingga dapat tetap menjaga stabilitas sistem keuangan dan mendorong fungsi intermediasi perbankan.
