In the midst of uncertain external conditions, PaninBank was able to record satisfactory business performance by recording better profits compared to the previous year.

### *Pemegang Saham yang Terhormat,* Distinguished Shareholders,

Pada kesempatan ini, perkenalkan kami mewakili Dewan Komisaris menyampaikan laporan pelaksanaan tugas dan tanggung jawab terkait dengan pengawasan dan pengarahannya kepada Direksi atas kinerja PaninBank untuk tahun buku 2019. Tugas dan tanggung jawab pengawasan dimaksud sejalan dengan amanat yang tertuang dalam Undang-Undang Perseroan Terbatas Nomor 40 tahun 2007.

Dalam melakukan pengawasan atas kebijakan dan tata kelola Perseroan, jalannya pengurusan pada umumnya, Dewan Komisaris dibantu oleh Komite Pemantau Risiko, Komite Audit dan Komite Remunerasi dan Nominasi. Pengawasan atas tata kelola perusahaan tersebut dalam rangka memastikan kinerja perusahaan agar sejalan serta memenuhi target, visi dan misi yang telah ditetapkan.

Ketentuan dimaksud diamanatkan oleh Peraturan Otoritas Jasa Keuangan (OJK) Nomor 33/POJK.04/2014 tentang Direksi dan Dewan Komisaris Emiten atau Perusahaan Publik. Dengan mengacu pada regulasi tersebut, laporan Dewan Komisaris ini berkenaan dengan tugas pengawasan dan pemberian arahan dalam rangka meningkatkan perkembangan usaha Perseroan secara berkesinambungan.

Please allow us to take this opportunity to submit the report on the implementation of the tasks and responsibilities pertaining to the oversight of the Board of Directors of PaninBank for the Financial Year 2019 on behalf of the Board of Commissioners. The oversight tasks and responsibilities referred to correspond with the mandate outlined in the Limited Liability Company Law Number 40 of 2007.

In overseeing the Company's policies and governance, and the conduct of the management, the Board of Commissioners was assisted by the Risk Monitoring Committee, the Audit Committee, and the Nomination and Remuneration Committee. This oversight of the Company's good corporate governance was made within the context of ensuring that the Company's performance is in line with the established targets, as well as vision and mission.

The provisions referred are mandated by the Financial Services Authority (OJK) Regulation Number 33/POJK.04/2014 concerning the Board of Directors and the Board of Commissioners of Issuers or Publicly Listed Companies. In line with this regulation, this Board of Commissioners report deals with its oversight tasks within the context of sustainably and improving the Company's business performance.

## PENILAIAN TERHADAP KINERJA DIREKSI

### Dasar Penilaian

Dalam memberikan penilaian terhadap Direksi terkait dengan kinerja pengelolaan PaninBank, Dewan Komisaris pada prinsipnya menggunakan dua dasar pertimbangan. Pertama mengacu pada Rencana Bisnis Bank (RBB) yang telah disusun dan disepakati bersama serta disahkan oleh Otoritas Jasa Keuangan sebagai acuan dan arah kebijakan kegiatan usaha PaninBank.

Dasar pertimbangan Kedua adalah efektivitas Direksi dalam mengelola operasional dan masukan yang disampaikan oleh Dewan Komisaris.

Kedua dasar pertimbangan dimaksud dapat dijabarkan dalam rapat-rapat bersama dan dengan hasil yang dicapai sehingga berbagai masalah prinsip yang perlu mendapatkan solusi dapat didiskusikan dan disepakati secara lebih efektif.

### Hasil Penilaian

Dalam memberikan penilaian, Dewan Komisaris tetap perlu mengevaluasi kondisi eksternal yang memiliki potensi untuk berdampak pada kinerja PaninBank. Selama tahun 2019, kondisi eksternal seperti situasi perekonomian, ketentuan industri keuangan, tingkat suku bunga, inflasi, kurs valuta asing dan berbagai pergerakan perekonomian global turut memberikan tekanan bagi perekonomian nasional secara umum.

Dunia usaha di dalam negeri yang masih kurang kondusif dengan adanya berbagai isu global seperti harga komoditi dan perang dagang tentunya berimbas pada pertumbuhan perekonomian dalam negeri. Survei Kegiatan Dunia Usaha yang diselenggarakan oleh Bank Indonesia (BI) telah menunjukkan pelambatan dimaksud dan sebagai respons untuk memberikan stimulus pada pasar, BI melakukan pelonggaran moneter melalui penurunan suku bunga acuan.

Tahun 2019 Indonesia mengalami peristiwa politik besar di dalam negeri, yaitu pemilihan umum Presiden dan Wakil Presiden. Sekaligus untuk pertama kalinya secara bersamaan dilakukan Pemilihan Kepala Daerah sehingga Indonesia mencatat sejarah dunia sebagai negara satu-satunya yang mampu melaksanakan Pemilu Serentak secara sukses, meskipun terdapat hal-hal yang masih perlu diperbaiki. Kondisi tersebut tentunya menimbulkan ketidakpastian bagi dunia usaha sehingga aktivitas dan transaksi perdagangan menurun sedangkan ekspansi bisnis ataupun investasi baru akan menunggu sampai keadaan lebih stabil.

Di tengah ketidakpastian tersebut, Dewan Komisaris menilai bahwa kinerja bisnis PaninBank cukup memuaskan. Kemampuan PaninBank membukukan laba sebelum pajak sebesar Rp4.595,6 miliar, sedikit lebih tinggi dibandingkan tahun 2018 yang sebesar Rp4.572,8 miliar.

## ASSESSMENT OF THE PERFORMANCE OF THE BOARD OF DIRECTORS

### Basis of Assessment

In assessing the Board of Directors' management of PaninBank, the Board of Commissioners used two basic considerations. The first refers to the Bank's Business Plan (RBB) that was prepared, mutually agreed upon and endorsed by the Financial Services Authority as a policy reference for PaninBank's business activities.

The second basic consideration is the effectiveness of the Board of Directors in managing the Company's operations and following the suggestions submitted by the Board of Commissioners.

Both of these basic considerations are discussed in the joint meetings and compared with the results achieved, ensuring that various principle issues that require solutions can be discussed and agreed upon more effectively.

### Results of the Assessment

In providing this assessment, the Board of Commissioners evaluated the external conditions that had a potential impact on PaninBank's performance. Throughout 2019, external conditions such as the economic situation, financial industry regulations, interest rate levels, inflation, foreign currency exchange rates and other global economic movements also affected the nation's economy.

The business environment in Indonesia continued to be less than conducive, with the presence of various global issues, such as commodity prices and the trade war between the US and China, which impacted the country's economic growth. The Business Activity Survey conducted by Bank Indonesia (BI) responded to the slowdown with stimulus policies, including monetary easing by reducing the benchmark rates.

In 2019, Indonesia held the Presidential and Vice Presidential general elections. Meanwhile, Regional Elections were held simultaneously for the very first time, wherein Indonesia historically became the first and only country in the world that successfully carried out concurrent elections, although a number of aspects still needed to be improved. This naturally led to business uncertainties, causing trading activities and transactions to decline while business expansion and new investments were put on hold until conditions were more stable.

The Board of Commissioners is satisfied with PaninBank's business performance amid this uncertainty. PaninBank was able to book a pre-tax profit of Rp4,595.6 billion in 2019, slightly higher than Rp4,572.8 billion in 2018.

Begitu pun dengan pendapatan bunga bersih pada 2019 tercatat sebesar Rp8.968,9 miliar, naik dibandingkan pendapatan bunga bersih tahun 2018 sebesar Rp8.964,5 miliar. Pertumbuhan laba operasional mengalami peningkatan dari posisi pada 2018 yang Rp4.375,1 miliar menjadi Rp4.416,2 miliar.

Laba bersih PaninBank untuk akhir tahun 2019 tercatat sebesar Rp3,5 triliun, dibandingkan tahun 2018 yang Rp3,2 triliun, atau meningkat 9,8%.

## PENGAWASAN TERHADAP IMPLEMENTASI STRATEGI

Sebagai Bank yang telah dikategorikan ke BUKU 4, Perseroan secara strategis dan berkelanjutan perlu terus meningkatkan terobosan dan pemanfaatan kemampuan teknologi digital, selain untuk efisiensi juga memenuhi berbagai ketentuan-ketentuan *standard accounting system* yang disyaratkan oleh Otoritas baik secara nasional maupun internasional. Bekerja sama dengan Konsultan Internasional, diharapkan suatu ekosistem yang tepat di antara Perseroan dengan Anak Perusahaan dapat disinergikan.

PaninBank dengan *platform* nasabah yang luas dapat secara strategis menjangkau nasabah untuk Anak Perusahaan lain, sehingga tercipta suatu ekosistem yang solid. Dari nasabah ritel yang membutuhkan Kredit Kendaraan, ke Kredit Modal Kerja untuk UMKM, ke kebutuhan asuransi umum maupun asuransi jiwa dan kemudian kebutuhan berinvestasi atau *wealth management*. Semua kebutuhan itu sudah tersedia di Panin Group. Kini berbagai terobosan perlu terus ditingkatkan untuk dapat saling bersinergi, saling melengkapi untuk pengembangan usaha yang lebih berkesinambungan.

Untuk mendukung kinerja Perseoran, Dewan Komisaris menilai kebijakan manajemen dalam peningkatan kapasitas dan kualitas sumber daya manusia (SDM) perlu ditingkatkan sejalan dengan berbagai disrupsi usaha yang kini sudah masuk ke digital banking sehingga banyak SOP yang perlu disesuaikan dengan kebutuhan nasabah yang menuntut jasa perbankan yang memenuhi kemajuan zaman.

Sebagai entitas usaha yang memiliki berbagai anak usaha, PaninBank sebagai induk usaha perlu secara terus menerus meningkatkan sinergi serta kerja sama. Ketentuan-Ketentuan Otoritas Jasa Keuangan juga mendukung yang semakin mendekatkan kerja sama maupun efisiensi. Selain memasarkan produk-produk jasa, juga berbagai ketentuan yang mengharuskan Perusahaan induk melakukan integrasi dan peningkatan sumber daya manusia termasuk integritas serta budaya perusahaan yang sama tinggi nilainya.

Demikian juga dengan ketentuan-ketentuan baru dari OJK, Perusahaan induk wajib melakukan sinkronisasi dan sosialisasi kepada entitas anak, agar diperoleh tujuan, visi misi yang searah.

Likewise, net interest income amounted to Rp8,968.9 billion in 2019, an increase from Rp8,964.5 billion in 2018. Operating profit totaled Rp4,416.2 billion in 2019, up from Rp4,375.1 billion in 2018.

PaninBank's net profit for 2019 amounted to Rp3.5 trillion, a 9.8% increase from Rp3.2 trillion in 2018.

## OVERSIGHT OF STRATEGY IMPLEMENTATION

As a BUKU IV bank, PaninBank needs to continue to enhance its digital technology capabilities, which improve efficiency and fulfill various standard accounting system provisions set by the Authorities, both nationally and internationally. It is expected that working with an International Consultant can develop an appropriate ecosystem that synergizes the Company's activities with those of its Subsidiaries.

With its broad platform, PaninBank is able to capture customers for its subsidiaries, thereby creating a solid ecosystem that ranges from retail customers that require Automotive Loans, to Working Capital Loans for MSME, to general and life insurance and subsequent investment or wealth management needs. All of these customer needs can be fulfilled by the Panin Group. Various Company breakthroughs need to be continually updated, so as to maintain synergy to ensure the development of a more sustainable business.

The Board of Commissioners believes that, in order to support the Company's performance, the management's policy to improve human resource (HR) capacity must be improved. This needs to be done to enable employees to deal with the various business disruptions that currently affect digital banking. It is important that the Company's SOPs conform with customer demand for quality banking services that remains relevant to the changing economic conditions.

As a parent business entity with various subsidiaries, PaninBank needs to continually improve synergy and cooperation. The Financial Services Authority's regulations also support cooperation and efficiency. In addition to marketing service products, there are various provisions that require the parent company to enhance the capacity of its human resources, including in terms of integrity and corporate culture.

Likewise with the new OJK provisions, the parent company is required to synchronize with, and disseminate information to, the subsidiary so as to obtain common objectives, vision and mission.

## PANDANGAN ATAS PROSPEK USAHA

### Dasar Pertimbangan

Dalam memberikan penilaian terhadap prospek usaha yang telah disusun oleh Direksi, Dewan Komisaris mengevaluasi asumsi yang digunakan. Untuk prospek tahun 2020, di samping rencana kebijakan pemerintah yang tertuang dalam Anggaran Pendapatan dan Belanja Negara (APBN) 2020 sebagai pertimbangan utama.

Selain prospek usaha yang menjadi pengawasan Dewan Komisaris adalah pengelolaan manajemen risiko. Manajemen risiko wajib melekat dan Komite Pemantau Risiko diminta untuk secara proaktif melakukan rapat dengan Anggota Dewan Komisaris yang ditunjuk. PaninBank cukup kuat dalam mengelola risiko kredit UMKM. Namun demikian Dewan Komisaris meminta kredit spesifik diawasi secara lebih ketat mengingat perubahan perekonomian yang cepat, khususnya yang menyangkut komoditi dan infrastruktur.

Seluruh pertimbangan tersebut telah dijadikan bahan masukan oleh Direksi dalam menyusun prospek usaha. Namun demikian, Dewan Komisaris tetap mengingatkan kepada Direksi bahwa Tahun 2020 secara khusus diwarnai dengan secara tiba-tiba merebaknya virus Corona yang dimulai di Wuhan, Cina dan berpotensi berdampak pada perekonomian global. Cina adalah mitra dagang hampir semua negara di dunia dan hal tersebut berpotensi berdampak luas. Diperkirakan kuartal pertama tahun 2020, perekonomian seluruh dunia akan melambat bahkan dikhawatirkan memburuk di tahun 2020.

### MEKANISME PEMBERIAN NASIHAT KEPADA DIREKSI

Dewan Komisaris memiliki tugas di bidang pengawasan dan pengarahan kepada Direksi. Metode komunikasi dengan Direksi dilakukan secara resmi melalui rapat koordinasi rutin dan rapat-rapat lain dimana perlu. Sepanjang tahun 2019, Dewan Komisaris telah melaksanakan rapat gabungan dengan Direksi sebanyak empat kali.

Masukan dan saran serta informasi hasil pengawasan yang disampaikan Dewan Komisaris kepada Direksi, baik dari masukan Komite ataupun laporan dari OJK. Komite-komite yang membantu Dewan Komisaris melakukan pemantauan dan analisis, kemudian hasilnya disampaikan kepada Dewan Komisaris yang wajib menindaklanjuti.

### LAPORAN PENERAPAN TATA KELOLA PERUSAHAAN

Dewan Komisaris memastikan bahwa manajemen PaninBank berpegang teguh pada penerapan tata kelola perusahaan yang baik (*Good Corporate Governance/GCG*). Dewan Komisaris berkoordinasi dengan Direktur Kepatuhan atas hasil penilaian GCG dimaksud.

Dari pemantauan kinerja, Dewan Komisaris menemukan bahwa sebagian besar temuan auditor internal telah ditindaklanjuti sepanjang tahun 2019, sehingga dapat dianggap sudah

## VIEWS OF BUSINESS PROSPECTS

### Basis of Consideration

In assessing the business prospects prepared by the Board of Directors, the Board of Commissioners evaluates the assumptions used. In regard to the prospects for 2020, the government's policy plan as outlined within the 2020 State Budget (APBN) serves as the main consideration.

Aside from the business prospects, the Board of Commissioners also oversees risk management. To manage risk, the Risk Monitoring Committee is requested to proactively conduct meetings with the designated member of the Board of Commissioners. PaninBank manages MSME credit risk in an appropriate manner. However, the Board of Commissioners requests that specific loans must be closely monitored given the rapid economic changes, especially in regard to commodities and infrastructure.

All of these considerations serve as input for the Board of Directors in preparing their business prospects. However, the Board of Commissioners continues to remind the Board of Directors that the global economy in 2020 will be affected by the outbreak of the coronavirus that began in Wuhan, China. China is a trading partner for most countries in the world. It is estimated that in the first quarter of 2020, the world economy will experience a slowdown and the situation might deteriorate throughout the year.

### MECHANISM FOR THE PROVISION OF ADVICE TO THE BOARD OF DIRECTORS

The Board of Commissioners is tasked with overseeing and advising the Board of Directors. The communication with the Board of Directors is carried out through official methods such as routine meetings as well as other meetings as required. In 2019, the Board of Commissioners conducted four joint meetings with the Board of Directors.

The suggestions and information about the results of the oversight submitted by the Board of Commissioners to the Board of Directors were derived from the Committee's input and reports from the OJK. A number of Committees assisted the Board of Commissioners to monitor, analyze and subsequently submit its results to the Board of Commissioners to be followed-up.

### GOOD CORPORATE GOVERNANCE IMPLEMENTATION REPORT

The Board of Commissioners ensures that PaninBank's management upholds the application of Good Corporate Governance (GCG). The Board of Commissioners discusses the results of GCG assessments with the Compliance Director.

The Board of Commissioners' performance monitoring found that most of the internal auditor's findings were followed up throughout 2019, so it can be considered to have been

Untuk keputusan Rapat Umum Pemegang Saham (RUPS), seluruh rekomendasi telah ditindaklanjuti sebagaimana mestinya.

## Pandangan atas Penerapan WBS

Penerapan *whistle blowing system* (WBS) merupakan salah satu unsur penting dalam pelaksanaan GCG. Di lingkungan PaninBank, penerapan WBS sejalan dengan nasihat yang senantiasa disampaikan kepada manajemen agar selalu menerapkan prinsip kepatuhan dalam praktik bisnis. Kehadiran WBS menjadi saluran yang sangat mendukung implementasi tata kelola perusahaan yang baik.

Mengingat pentingnya WBS, Dewan Komisaris memantau implementasi WBS, terutama yang menjadi bagian dari tanggung jawab Dewan Komisaris.

## Application of the WBS

The application of the whistle blowing system (WBS) is crucial when it comes to the implementation of GCG. PaninBank's WBS corresponds with the advice conveyed to the management to continually apply the compliance principle in business practices. WBS serves as a channel that supports the implementation of good corporate governance.

In view of the importance of WBS, the Board of Commissioners monitors the implementation of WBS, particularly in areas that are the responsibility of the Board of Commissioners.

## Tinjauan Ekonomi 2019

Perlambatan kinerja membayangi kondisi perekonomian dunia pada tahun 2019, yang antara lain karena terus berlangsungnya perang dagang antara Amerika Serikat (AS) dan Tiongkok. Atas kondisi tersebut, Bank Dunia pun menurunkan proyeksi pertumbuhan ekonomi global menjadi 2,6% dari awalnya sebesar 2,9%. Pemangkasan proyeksi pertumbuhan ekonomi juga dilakukan oleh Dana Moneter Internasional (IMF), yang memperkirakan ekonomi global di tahun 2019 hanya tumbuh 3,0%, yang sebelumnya diperkirakan sebesar 3,2%.

Tekanan yang terjadi pada perekonomian global direspons oleh bank sentral Amerika Serikat, Federal Reserve (The Fed) dengan penurunan suku bunga dan pada akhir tahun 2019 berada di kisaran 1,5-1,75%. Sepanjang tahun itu, The Fed telah memangkas suku bunga sebanyak tiga kali untuk merespons kondisi perekonomian yang melambat.

Perekonomian nasional tentunya terkena imbas dari perkembangan ekonomi dunia internasional. Disamping itu pada tahun 2019 terjadi peristiwa besar yakni pemilihan umum serentak yang turut menekan kegiatan dunia usaha. Kondisi itu tercermin dari hasil Survei Kegiatan Dunia Usaha yang dilakukan Bank Indonesia (BI). Pada kuartal IV-2019, Saldo Bersih Tertimbang yang dijadikan ukuran hasil survei, hanya menunjukkan angka 7,79% lebih rendah dibandingkan kuartal sebelumnya yang 13,39%.

Rata-rata kapasitas produksi lebih rendah dibandingkan dengan rata-rata pada triwulan sebelumnya, berdasarkan hasil survei BI tersebut. Tingkat penggunaan kapasitas produksi dari rata-rata 75,42% menjadi 74,41%. Begitu juga dengan tingkat penggunaan tenaga kerja, menjadi lebih rendah seperti tercermin dari Saldo Bersih Tertimbang Tenaga Kerja, menjadi 0,95% dari 1,40%.

Dengan demikian, pertumbuhan ekonomi, sebagaimana tercatat dalam Anggaran Pendapatan dan Belanja Negara (APBN) 2019 yang awalnya ditargetkan sebesar 5,3%, tidak tercapai. Pertumbuhan ekonomi Indonesia tahun 2019 tercatat hanya sebesar 5,02%. Sedangkan pada tahun 2018, pertumbuhan ekonomi mencapai 5,17%.

Sebagai respons kondisi perekonomian yang mengalami perlambatan, sepanjang tahun 2019, Bank Indonesia telah empat kali menurunkan suku bunga acuan, *BI 7-Day Reverse Repo Rate* (BI7DRR). Jika pada Januari suku bunga masih di posisi 6,00%, pada Desember telah turun menjadi 5,00%.

## 2019 Economic Review

Global economic conditions in 2019 experienced economic slowdown partly due to the trade war between the United States (US) and China. Due to these conditions, the World Bank reduced the global economic growth projections to 2.6% from its initial estimate of 2.9%. The economic growth projection cuts were also carried out by the International Monetary Fund (IMF), which projected that the global economy in 2019 would grow by only 3.0%, down from a previous estimate of 3.2%.

The United States central bank, the Federal Reserve (The Fed), responded to the pressures on the global economy by reducing interest rates, which at the end of October 2019 amounted to 25 basis points, in the range of 1.5-1.75%. The Fed cut rates by as much as three times in 2019 in response to the economic slowdown.

The national economy was affected by the global economic developments. Moreover, an important event occurred in 2019 in the form of general elections, which impacted business activities. These developments have been reflected in the results of the Business World Activities Survey that was conducted by Bank Indonesia (BI). In the Fourth Quarter of 2019, the Weighted Net Balance that is used to measure the survey's results was only 7.79%, down from 13.39% in the previous quarter.

Based on the results of BI's survey, the average production capacity was lower than the previous quarter's average. The production capacity usage level, which was at an average of 75.42%, amounted to 74.41%. A similar trend was seen in the labor usage level, which decreased as shown by the Labor Weighted Net Balance to 0.95% from 1.40%.

As a result, economic growth, as registered in the 2019 State Budget (Anggaran Pendapatan dan Belanja Negara or APBN), which was initially targeted at 5.3%, was not achieved. Indonesia's economic growth in 2019 was registered at only 5.02%, down from 5.17% in 2018.

In response to the economic slowdown, Bank Indonesia reduced the benchmark rate, *BI 7-Day Reverse Repo Rate* (BI7DRR), by as much as four times throughout 2019. The interest rates were still within the 6.00% position in January, but by December they had dropped to 5.00%.

Bank Indonesia juga menurunkan Giro Wajib Minimum (GWM) Bank Umum sebesar 50 basis poin. Melalui kebijakan tersebut, likuiditas bank di Indonesia diharapkan bertambah, sehingga dapat ikut mendorong pergerakan ekonomi.

Dengan serangkaian kebijakan tersebut, otoritas di bidang moneter berharap kinerja industri keuangan dapat berjalan stabil, walaupun sejumlah target kinerja perbankan tetap mengalami revisi. Pertumbuhan kredit yang semula ditargetkan 10-12%, kemudian Otoritas Jasa Keuangan (OJK) merevisi target tersebut menjadi 9-11%.

Meskipun begitu, kinerja dan stabilitas industri perbankan secara umum masih terjaga. Berdasarkan data OJK, rasio kecukupan modal perbankan konvensional hingga berakhirnya tahun 2019 sebesar 23,40%, masih lebih tinggi dari pada periode yang sama tahun sebelumnya yang sebesar 22,97%.

Sementara itu, total laba industri perbankan sebelum pajak per Desember 2019 tercatat Rp200,51 triliun, mengalami kenaikan dibandingkan dengan Desember 2018 yang Rp190,72 triliun. Padahal, rasio biaya operasional terhadap pendapatan operasional bank pada periode yang sama, lebih tinggi daripada periode yang sama tahun sebelumnya yakni menjadi 79,39% pada 2019 dari 77,86%.

Sementara itu, kinerja margin bunga Bersih atau *net interest margin* (NIM) tahun 2019 tercatat sebesar 4,91%, menurun dari posisi tahun 2018 yang tercatat sebesar 5,14%.

Terkait dengan penyaluran kredit, pada tahun 2019 masih lebih baik dibandingkan dengan tahun 2018. Pertumbuhan kredit tercatat sebesar 6,08% dari Rp5.294,9 triliun menjadi Rp5.617,0 triliun. Pertumbuhan kredit tersebut juga sejalan dengan pertumbuhan dana pihak ketiga (DPK). Hingga Desember 2019, DPK tercatat sebesar Rp5.998,6 triliun, tumbuh 6,54% dibandingkan dengan Desember 2018 yang sebesar Rp5.630,4 triliun.

Secara keseluruhan, PaninBank memandang kondisi makro ekonomi sepanjang tahun 2019 seperti berada di “persimpangan”. Kondisi ekonomi menunjukkan kelemahan dan pelaku usaha tidak dapat mengambil langkah pro-aktif terkait dengan usahanya akibat ketidakpastian yang berlanjut, sehingga berdampak pada pertumbuhan kredit secara keseluruhan, dan khususnya kinerja PaninBank.

Bank Indonesia also reduced the Statutory Reserve Requirement for Commercial Banks by 50 basis points. Through this policy, banking liquidity in Indonesia is expected to increase, driving economic growth.

The monetary authority expects these policies to stabilize the financial industry, although a number of banking performance targets continue to be revised. Loan growth, which initially was targeted at 10-12%, was revised by the Financial Services Authority (Otoritas Jasa Keuangan or OJK) to 9-11%.

Nevertheless, the banking industry’s stability and performance remains secure. Based on the OJK’s data, the conventional bank’s capital adequacy ratio amounted to 23.40% at the end of 2019, which was still higher than 22.97% in the same period in 2018.

Meanwhile, the banking industry’s total profit before tax as at December 2019 amounted to Rp200.51 trillion, an increase from Rp190.72 trillion in 2018. The ratio of operating expense to operating profit within the same period, was 79.39% in 2019, up from 77.86% in 2018.

The net interest margin was registered at 4.91% in 2019, a decrease from 5.14% in 2018.

In regard to loan disbursements, 2019 was better compared to 2018. Loan growth was at 6.08% from Rp5,294.9 trillion to Rp5,617.0 trillion. This loan growth was also in line with the growth in Third Party Funds, which as at December 2019, amounted to Rp5,998.6 trillion, a 6.54% increase from Rp5,630.4 trillion in December 2018.

Overall, PaninBank views the macroeconomic conditions throughout 2019 as being at a “crossroads.” The economic condition showed weakness and businesses did not take proactive steps as a result of the continuing uncertainty, thereby impacting overall credit growth and PaninBank’s performance.

## KEBIJAKAN STRATEGIS

Untuk mengatasi kondisi tersebut, PaninBank melakukan sejumlah strategi yang fokus pada penciptaan ekosistem untuk mencapai pertumbuhan. Langkah utama yang dilakukan adalah memaksimalkan efisiensi, salah satunya menekan biaya operasional dengan meningkatkan peran Kantor Cabang Utama untuk melakukan konsolidasi Kantor-kantor Cabang Pembantu yang dikelolanya.

Penekanan biaya operasional tersebut juga melalui upaya-upaya *cross selling* dan sinergi usaha dengan Perusahaan Anak. Selain memanfaatkan ruang kantor cabang PaninBank yang ada, juga dapat meningkatkan pelayanan kepada basis nasabah yang lebih luas, sehingga pada akhirnya mendukung kinerja Panin Group secara berkelanjutan.

Ekosistem yang telah mulai dibangun, antara lain dengan Panin Dubai Syariah Bank, Clipan Finance Indonesia, IBJ Verena Finance, Panin Sekuritas, MAG Fairfax, Panin Dai-ichi Life, selain menjadikan Panin Group suatu *one stop service*, juga dalam rangka mengelola Manajemen Risiko dan terus memperkuat budaya perusahaan untuk dapat meningkatkan prinsip kehati-hatian agar selalu menjaga kepatuhan atas *Good Corporate Governance* sebagaimana yang diharapkan bersama.

Dari segi pendanaan, PaninBank melakukan strategi pengelolaan dana yang tepat agar dapat menyeimbangkan antara kredit dan pendanaan. Bagian *treasury* bertanggungjawab untuk mengelola kebutuhan dana, termasuk mengelola kelebihan dana jangka pendek untuk dapat disalurkan melalui instrumen pasar uang sehingga menjadi produktif. Bagian *Treasury* PaninBank merupakan salah satu Bank yang berperan aktif dalam mendukung pasar uang nasional. PaninBank juga aktif dalam melakukan penerbitan dan memasarkan produk-produk pasar modal, serta selalu siap mendukung penerbitan Obligasi Pemerintah. Sampai akhir tahun 2019 *outstanding* Obligasi yang diterbitkan PaninBank mencapai Rp13,43 triliun.

Berkenaan dengan pemasaran produk, PaninBank terus melakukan inovasi produk jasa dan meningkatkan *cross selling* dengan Perusahaan Anak. Ke depan, ekosistem yang terjalin antara Perusahaan Anak dengan PaninBank akan terus memperluas jangkauan serta basis nasabah. Tanpa disadari basis nasabah PaninBank yang sudah beroperasi setengah abad bersama dengan Perusahaan Anak tanpa diragukan adalah suatu *platform* atau *franchise* yang sangat bernilai.

## STRATEGIC POLICY

To address these challenges, PaninBank carried out a number of strategies that focused on creating an ecosystem to help achieve growth. The main steps carried out were to maximize efficiency, which included reducing operational expenses by increasing the role of the Main Branch Offices in the management of the Sub-Branches.

PaninBank also reduced operational expenses by cross-selling and business synergies with the Subsidiaries. Aside from utilizing PaninBank's existing branch office spaces, the move also enhanced services for a broader customer base, thereby sustainably supporting Panin Group's performance.

The ecosystem that includes Panin Dubai Syariah Bank, Clipan Finance Indonesia, IBJ Verena Finance, Panin Sekuritas, MAG Fairfax, and Panin Dai-ichi Life, aside from positioning Panin Group as a one-stop-service, also helps to manage Risk and strengthening the Group's corporate culture to enhance prudent principles and maintain compliance with Good Corporate Governance.

In terms of funding, PaninBank has the appropriate fund management strategy to balance loans and funding. The Company's treasury section is responsible for managing funding needs, including managing excess short-term funds to be disbursed through money market instruments so as to become productive. PaninBank's Treasury Section plays an active role in supporting the nation's money market. PaninBank is also active in issuing and marketing capital market products and is always ready to support Government Bond issuances. As at the end of 2019, the outstanding Bonds issued by PaninBank amounted to Rp13.43 trillion.

In regard to product marketing, PaninBank constantly carries out service product innovation and improves cross selling with its Subsidiaries. Going forward, the ecosystem between the Subsidiaries and PaninBank will continue to expand its reach and customer base. PaninBank's customer base, which has been built over the past half a century, along with the Subsidiaries, is a very valuable platform.

PaninBank senantiasa melakukan inovasi untuk meningkatkan produk pendanaan yang berbiaya rendah, seperti Rekening Koran dan Tabungan, sehingga dapat menekan biaya bunga secara umum. Produk Tabungan Super Bonanza yang dalam beberapa tahun ini sukses dalam meningkatkan pendanaan serta terbukti merupakan pilihan utama nasabah, masih terus dikembangkan dengan penambahan fitur-fitur yang unik serta menarik. Diharapkan ke depan dana berbiaya agak rendah ini dapat terus ditingkatkan.

Untuk mendukung kinerja, peningkatan kapasitas sumber daya manusia (SDM) tentunya menjadi perhatian manajemen. PaninBank secara berkelanjutan menganalisa peningkatan kompetensi melalui pelatihan yang tepat serta terencana sesuai dengan perkembangan usaha. Sejalan dengan kemajuan industri perbankan ke arah digital dan persyaratan OJK bagi para pejabat yang menduduki posisi tertentu seperti Manajemen Risiko, Audit, Valuta Asing, Pasar Uang, Pasar Modal, Akunting dan lainnya, yang bersangkutan wajib memiliki sertifikasi yang ditentukan selain untuk meningkatkan kemampuan diri sebagai profesional, tentunya untuk mendukung kinerja PaninBank agar dapat memenuhi ketentuan-ketentuan Tata Kelola yang Baik serta bertanggung jawab.

### Sinergi Terpadu dengan Anak Usaha

Sebagai entitas usaha yang memiliki berbagai anak usaha, PaninBank bersama dengan anak usaha membentuk suatu Forum Gabungan yang mengadakan rapat secara berkala untuk mempersatukan visi dan misi Perseroan. Selain itu OJK juga mewajibkan PaninBank melakukan sinergi dan pengawasan secara berjenjang dalam rangka memfasilitasi berbagai ketentuan dan pemberlakuan standar prosedur yang lebih kompleks sehingga Perseroan dapat terus meningkatkan kinerjanya secara berkesinambungan.

Guna mempersatukan visi dan misi dalam menjalankan kegiatan usahanya, PaninBank sebagai induk usaha wajib memberikan pengarahan dan memberikan *training* kepada para Perusahaan Anak untuk menyampaikan Rencana Kerja dan kegiatan jangka panjang dan jangka pendek kepada Direksi PaninBank. Sedikitnya setiap bulan setiap Perusahaan Anak wajib menyampaikan laporan bulanan termasuk *variance* yang ada. Melalui pertemuan berkala tersebut, kolaborasi antara induk usaha dan entitas anak diharapkan dapat tercipta sinergi usaha yang produktif serta efektif.

PaninBank continues to innovate to enhance its low-cost funding products, such as current and saving accounts, thereby reducing overall interest expenses. The Super Bonanza Savings product, which in recent years successfully improved funding and has been proven to be the customers' preferred choice, continues to be developed by adding unique and attractive features. This relatively low-cost fund will continue to be improved going forward.

The management strives to improve the capacity of the Company's human resource (HR). PaninBank continuously works on the competency improvement of its employees through appropriate and planned training sessions in accordance with the business developments. PaninBank requires that officials in certain positions, such as Risk Management, Audit, Foreign Exchange, Money Market, Capital Market, and Accounting, obtain the required certifications to improve their abilities as professionals and support PaninBank's compliance with Good Corporate Governance in line with the banking industry's progress towards digital and OJK requirements.

### Synergy with Subsidiaries

As a business entity that has various subsidiaries, PaninBank has formed a Joint Forum that periodically convenes meetings to align with the Company's vision and mission. Moreover, the OJK also requires PaninBank to conduct oversight within the context of facilitating various provisions and enacting standard procedures that are more complex and allow the Company to continue to sustainably improve its performance.

In order to align the vision and mission with its business activities, PaninBank is required to provide direction and training for its subsidiaries on submitting their Business Plans and long and short-term activity plans to PaninBank's Board of Directors. Every subsidiary is required to submit a report, including reporting on any variances, at least once a month. These periodic meetings between the parent company and its subsidiaries are expected to ensure productivity and effective business cooperation.

Selanjutnya setiap ada peraturan yang terus diperbarui dari Otoritas terkait sejalan dengan disrupsi pasar, seperti Pernyataan Standar Akuntansi Keuangan (PSAK), literasi keuangan hingga penerapan keuangan berkelanjutan, maka PaninBank sebagai induk usaha akan membuat turunannya sesuai kebutuhan untuk juga diterapkan oleh Perusahaan Anak, termasuk memberikan pelatihan dan pemahaman terkait dengan peraturan baru tersebut.

Upaya-upaya tersebut dilakukan PaninBank dalam menciptakan ekosistem yang mumpuni dan selaras guna mendukung pertumbuhan yang berkesinambungan dan berkualitas, baik pada entitas induk maupun entitas anak.

## KINERJA TAHUN BUKU 2019

### Kinerja Usaha Operasional

Pada tahun 2019, total penyaluran kredit (bersih) PaninBank secara konsolidasi turun 0,48% dari Rp137,4 triliun pada tahun 2018 menjadi Rp136,7 triliun. Penurunan tersebut terutama didorong oleh melambatnya kinerja kredit pada segmen perbankan institusional & BUMN serta segmen usaha kecil menengah (*small medium business*).

Kendati demikian, segmen perbankan korporasi mampu menopang kinerja kredit secara keseluruhan. Kredit Korporasi PaninBank secara individual berhasil tumbuh 15,07% dari tahun 2018 menjadi Rp31,3 triliun.

Sejalan dengan kinerja kredit, total penghimpunan dana pihak ketiga (DPK) turun 4,57% dari posisi tahun 2018 menjadi Rp131,4 triliun. Penurunan terutama didorong oleh Simpanan Berjangka terkait upaya Bank dalam melanjutkan perbaikan struktur biaya dana (*cost of fund*).

PaninBank berhasil memperluas basis nasabah sebagai hasil dari strategi *cross selling* dan inovasi produk jasa dengan Perusahaan Anak. Hingga akhir tahun buku 2019, PaninBank memiliki 523 kantor yang terdiri kantor wilayah, kantor cabang, dan kantor cabang pembantu yang tersebar di seluruh wilayah Indonesia dan Kantor Perwakilan di Singapura.

Kemudian, rasio antara Biaya Operasional dengan Pendapatan Operasional (BOPO) pada tahun 2019 sebesar 77,96%, atau lebih kecil dari BOPO industri pada tahun 2019 yang sebesar 79,39%

Furthermore, every time there were an update to regulations by the relevant authorities, such as the Statement of Financial Accounting Standards (PSAK), financial literacy and sustainable finance application, PaninBank as the parent company makes provisions according to its needs and applies these to its Subsidiaries. It also provides training related to these new regulations.

PaninBank carries out these efforts to create a harmonious ecosystem to support sustainable and quality growth, both for the parent company as well as the subsidiaries.

## PERFORMANCE IN FINANCIAL YEAR 2019

### Operational Business Performance

In 2019, PaninBank's loan disbursal (net) experienced a decline of 0.48% to Rp136.7 trillion from Rp137.4 trillion in 2018. This decline in loans was driven by the slowing loan performance in the institutional and SOE banking business segment and the small to medium business segment.

However, the corporate banking segment was able to compensate the decline in loans in those business segments by growing corporate banking loans to Rp31.3 trillion, a 15.07% increase from 2018.

In line with the credit performance, total third party funds decreased by 4.57% from 2018 position to Rp131.4 trillion. The decline was mainly driven by time deposits related to the Bank's efforts to continue to improve the cost of funds structure.

PaninBank successfully expanded its customer base as a result of its cross-selling strategy and service product innovation with its Subsidiaries. At the end of the 2019 financial year, PaninBank had 523 offices that included regional offices, branches, and sub-branches situated throughout Indonesia and a Representative Office in Singapore.

Meanwhile, the Operating Expense to Operating Revenue (BOPO) ratio amounted to 77.96% in 2019, lower than the industry's BOPO of 79.39% in 2019.

## Kinerja Keuangan

Selama tahun 2019, laba sebelum pajak PaninBank tercatat sebesar Rp4.595,6 miliar, tumbuh dari posisi tahun 2018 yang Rp4.572,8 miliar. Pertumbuhan tersebut sejalan dengan kinerja industri yang mencatatkan pertumbuhan sebesar 5,14%.

Pendapatan bunga bersih pada tahun 2019 tercatat sebesar Rp8.968,9 miliar, naik 0,06% dari posisi 2018 yang Rp8.964,5 miliar. Laba operasional meningkat 0,94% dari posisi tahun 2018 yang Rp4.375,1 miliar menjadi Rp4.416,2 miliar.

Sedangkan laba bersih tahun 2019 mencapai sebesar Rp3,5 triliun. Naik dibandingkan dengan tahun 2018 yang sebesar Rp3,2 triliun, atau berhasil tumbuh 9,8%.

Pertumbuhan laba tersebut juga didorong oleh pertumbuhan margin bunga bersih atau *Net Interest Margin* (NIM), yang sebesar 4,83%.

Perkembangan aset PaninBank tahun 2019 tumbuh 1,97% menjadi Rp211,3 triliun dari tahun 2018 yang sebesar Rp207,2 triliun. Total Ekuitas berhasil ditingkatkan sebesar 9,07% dari posisi tahun 2018 yang sebesar Rp40,7 triliun menjadi Rp44,4 triliun pada 2019.

Adapun Rasio Kecukupan Modal atau *Capital Adequacy Ratio* (CAR) PaninBank secara individual pada tahun 2019 adalah sebesar 24,07% dan secara konsolidasi sebesar 23,41%. Capaian tersebut, baik konsolidasi maupun individual, berada di atas realisasi industri tahun 2019 yang tercatat sebesar 23,40%.

## Perbandingan Realisasi dengan Target

Di tengah perlambatan ekonomi dan aksi *wait and see* para pelaku usaha, PaninBank juga tetap berusaha mengelola perusahaan dengan prinsip kehati-hatian dalam pertumbuhan aset dengan menyeimbangkan ketersediaan pendanaan dan pemberian kredit yang produktif.

Namun di tengah kondisi ekonomi yang menunjukkan kelemahan dan pelaku usaha tidak dapat mengambil langkah agresif terkait dengan usahanya, kondisi tersebut berdampak pada upaya pencapaian target pertumbuhan aset dan kinerja PaninBank secara keseluruhan.

Dengan mengupayakan efisiensi Operasional di tengah pertumbuhan usaha yang terbatas, PaninBank berhasil membukukan laba bersih yang tercatat Rp3,5 triliun pada 2019, dan telah mendekati target yang ditetapkan.

## Financial Performance

Throughout 2019, PaninBank's pre-tax profit amounted to Rp4,595.6 billion, a growth from its position of Rp4,572.8 billion in 2018. This growth is in line with the industry's performance, which registered a growth of 5.14%.

Net interest income in 2019 amounted to Rp8,968.9 billion, which represents a 0.06% increase from its position of Rp8,964.5 billion in 2018. Operating profit increased by 0.94% to Rp4,416.2 billion from Rp4,375.1 billion in 2018.

Meanwhile, Net Profit in 2019 amounted to Rp3.5 trillion. This represents a growth of 9.8% from Rp3.2 trillion in 2018.

This profit growth was also driven by Net Interest Margin (NIM), which stood at 4.83%.

PaninBank's assets grew by 1.97% in 2019 to Rp211.3 trillion from Rp207.2 trillion in 2018. Total Equity successfully increased by 9.07% from Rp40.7 trillion in 2018 to Rp44.4 trillion in 2019.

The PaninBank Capital Adequacy Ratio (CAR) individually in 2019 is 24.07% and on a consolidated basis of 23.41%. These achievements, both consolidated and individually, are above the industry realization in 2019 which was recorded at 23.40%.

## Comparison of Realizations and Target

Amid the economic slowdown and the wait-and-see attitude taken by businesses, PaninBank continued to strive to manage the Company prudently in terms of asset growth by balancing the supply of funding and productive loan disbursements.

However, weakening economic conditions and the inability of business actors to take aggressive steps affected the efforts to achieve PaninBank's asset growth and performance targets.

By striving for operational efficiency amid limited business growth, PaninBank successfully booked a net profit of Rp3.5 trillion in 2019 and came close to its established target.

## Kendala dan Tantangan yang Dihadapi

Sepanjang tahun 2019, industri perbankan pada umumnya menghadapi berbagai kendala dan tantangan, baik yang berasal dari eksternal maupun internal. Tantangan terbesar adalah kondisi makro ekonomi yang disebabkan oleh sejumlah peristiwa khusus, seperti pemilihan umum legislatif dan presiden yang dilaksanakan secara serentak sehingga berdampak terhadap dinamika perekonomian. Hal tersebut menyebabkan banyak pelaku usaha yang cenderung melakukan aksi *wait and see* sehingga berimbas kepada kinerja usaha industri perbankan, baik terkait dengan penghimpunan dana maupun penyaluran kredit.

Aksi menahan investasi dan ekspansi pada pelaku usaha juga mendorong banyaknya kinerja industri yang melambat, sehingga berisiko tinggi bagi pemberian kredit perbankan. Kelesuan dunia usaha berpotensi memberikan dampak negatif kepada kinerja perusahaan yang akhirnya akan berdampak terhadap peningkatan *non performing loan* (NPL). Oleh karena itu, Bank semakin selektif dalam menerima pengajuan kredit yang berujung pada terbatasnya penyaluran kredit.

## ANALISIS TENTANG PROSPEK USAHA 2020

Perekonomian yang mengalami perlambatan dan kelesuan pada tahun 2019 diperkirakan akan berlanjut pada tahun 2020. Sejumlah faktor diprediksi masih akan membayangi kinerja perekonomian, mulai dari perang dagang Amerika dengan Tiongkok yang masih akan berlangsung hingga timbulnya wabah virus COVID-19 yang tiba-tiba melanda Wuhan di Tiongkok ternyata merambah ke negara-negara lain secara mengejutkan serta merta menimpa beberapa negara. Termasuk negara-negara besar yang juga menjadi mitra dagang Indonesia, yaitu Amerika Serikat dan Negara Eropa lainnya, yang selama ini unggul dalam ilmu kedokteran.

Virus yang pertama kali menyebar di Wuhan, Tiongkok tersebut membuat perekonomian di negara tersebut menjadi kacau dan ternyata berpotensi memberikan dampak pada kinerja perekonomian dunia termasuk Indonesia. Baik dari sisi perdagangan, pariwisata maupun investasi, mengingat Tiongkok merupakan salah satu mitra terbesar dalam kegiatan perekonomian dunia maupun Indonesia.

Berdasarkan kondisi tersebut, untuk tahun 2020 PaninBank akan tetap fokus terhadap Kebijakan Jangka Panjang, yaitu "Penguatan Fondasi Bisnis Melalui Empat Pilar: Sumber Daya Manusia (SDM), Infrastruktur Teknologi Informasi (TI), Perluasan Basis Nasabah dan Memperkuat *Good Corporate Governance* (GCG)."

## Challenges and Obstacles

Throughout 2019, the banking industry faced various challenges and obstacles, both external and internal. The biggest challenge were the macro-economic conditions caused by a number of factors, such as the presidential and legislative general elections that affecting the economy. This led many business actors to adopt a wait-and-see attitude, affecting the banking industry's business performance, both relating to fund raising and loan disbursements.

The business actors' attitude of holding back investment and expansion also drove many to slow industry performance, thereby increasing risks in bank lending. The sluggish business conditions had a negative impact on the Company's performance and ultimately increased its non-performing loans (NPLs). Therefore, the Bank was increasingly selective in accepting credit applications, which resulted in limited lending.

## ANALYSIS OF 2020 BUSINESS PROSPECTS

The economic slowdown of 2019 is expected to continue in 2020. A number of factors are predicted to continue to affect economic performance, ranging from the ongoing US trade war with China and the COVID-19 virus pandemic that suddenly struck Wuhan in China and spread to other countries, including Indonesia's trading partners, namely the United States and European countries, which to date were leaders in the medical field.

This virus that initially appeared in Wuhan, China, affected the economy in that country and may impact the performance of the global economy. It may also affect Indonesia's economy, particularly in trade, tourism and investment, as China is one of the largest partners in Indonesia's economic activities.

PaninBank will continue to focus on its long-term policy in 2020, namely "Strengthening the Business Foundation Through the Four Pillars: Human Resources (HR), Information Technology (IT) Infrastructure, Expanding the Customer Base, and Strengthening Good Corporate Governance (GCG)."

Bank akan melanjutkan strategi jangka pendek dengan SDM yang berkualitas dalam mempersiapkan berbagai disrupsi pasar dan proses transformasi digital yang akan terus ditingkatkan. Kebijakan disusun lebih realistis dan moderat dengan menyesuaikan kondisi ekonomi bisnis yang ada, serta tetap mengutamakan prinsip kehati-hatian dalam mengelola Permodalan, Pendanaan dan Perkreditan yang Produktif.

Manajemen akan fokus pada kemampuan dalam menghadapi tantangan perubahan yang dihadapi industri perbankan serta situasi ekonomi yang masih diliputi banyak ketidakpastian, agar dapat mempertahankan hasil kinerja yang berkesinambungan.

## PENERAPAN MANAJEMEN RISIKO

Sebagai bentuk usaha yang sarat dengan peraturan dan rentan terhadap kondisi eksternal, PaninBank memiliki pengelolaan manajemen risiko sebagai bentuk mitigasi terhadap risiko-risiko yang mungkin dihadapi. Pelaksanaan pengelolaan manajemen risiko PaninBank mengacu pada Peraturan Otoritas Jasa Keuangan No. 18/POJK.03/2016 dan Surat Edaran OJK No.34/SEOJK.03/2016 tentang Penerapan Manajemen Risiko Bagi Bank Umum.

Fungsi utama pelaksanaan manajemen risiko yang diimplementasikan oleh PaninBank terkait dengan upaya identifikasi, penilaian, pengukuran, evaluasi, *monitoring* dan pengendalian risiko. Selain itu, peningkatan kualitas sumber daya manusia (SDM) juga menjadi bagian dari pengelolaan risiko di lingkungan PaninBank.

PaninBank masih perlu untuk terus mendorong perbaikan dan pengelolaan manajemen risiko yang terintegrasi. Hal tersebut dilakukan dengan cara adanya fungsi pembinaan dari induk usaha kepada anak usaha terkait dengan risiko-risiko dan tantangan yang perlu dikelola secara proaktif.

Ekosistem pengelolaan manajemen risiko yang terintegrasi diupayakan untuk dapat tercapainya pertumbuhan bisnis didukung dengan aktivitas operasional yang sehat dan berkelanjutan serta menghasilkan *return* yang optimal sesuai dengan *risk appetite* yang telah ditetapkan.

## PENERAPAN TATA KELOLA PERUSAHAAN YANG BAIK

Pelaksanaan tata kelola perusahaan yang baik (*Good Corporate Governance/GCG*) ditujukan untuk memaksimalkan nilai perusahaan, mendorong kinerja dan kontribusi PaninBank serta menjaga keberlanjutan dan kesinambungan bisnis secara jangka panjang.

The Bank will continue its short-term strategy by supervising HR to be ready for various market disruptions and the digital transformation processes. The policies are more realistic and moderate to conform with the prevailing business economic conditions and adhere with the prudent principles in managing Productive Capital, Funding and Loans.

In order to maintain sustainable performance results, the management will focus on the ability to deal with the challenges associated with changes in the banking industry, as well as the economic situation that continues to be marked with uncertainty.

## RISK MANAGEMENT IMPLEMENTATION

As a form of business that is heavily regulated and sensitive to external conditions, PaninBank has risk management policies. PaninBank's risk management is in line with the Financial Services Authority (OJK) Regulation No. 18/POJK.03/2016 and OJK Circular Letter No. 34/SEOJK.03/2016 on Risk Management Application for Commercial Banks.

PaninBank's main function in implementing risk management is related to risk identification, assessment, measurement, evaluation, monitoring and control. Moreover, the training of human resources (HR) is also a part of the Company's risk management.

PaninBank needs to continue to push for risk management improvements and apply them in an integrated manner. This is carried out with guidance from the parent company to the subsidiaries about the proactive management of the risks and challenges.

An integrated risk management ecosystem can ensure business growth that is supported by sound and sustainable operational activities and provide optimum returns that are in accordance with the established risk appetite.

## TINJAUAN EKONOMI TAHUN 2019

### Economic Review 2019

#### Ekonomi Global

Kinerja perekonomian global tidak cukup baik pada tahun 2019. Ekonomi diperkirakan hanya tumbuh sekitar 2,9%, terendah sejak krisis keuangan satu dekade lalu. Hambatan perdagangan dan ketidakpastian yang meningkat hampir sepanjang tahun, telah memberikan sentimen negatif terhadap aktivitas bisnis. Kondisi tersebut memperbesar tren perlambatan siklikal dan struktural yang sedang berlangsung.

Perselisihan dagang antara Amerika Serikat dan China kembali meningkat. Sejak pertama kali mengemuka pada tahun 2018, AS tercatat telah mengenakan tarif lebih dari US\$360 miliar barang-barang China, dan China membalasnya dengan pengenaan tarif lebih dari US\$110 miliar produk AS. Perundingan dua hari pada awal Mei 2019 berakhir buntu. Sepanjang September-Desember 2019, keduanya masih saling mengancam akan mengenakan tarif baru dan meningkatkan tarif yang telah berjalan.

Negosiasi AS dan China yang tidak tuntas telah memicu indeks kepercayaan bisnis di AS dan negara lainnya jatuh dengan cepat. Survei JP Morgan *Prompt Manufacturing Index* (PMI) Markitt menunjukkan bahwa, ketika pertumbuhan perdagangan melambat, sektor manufaktur global menyusut untuk pertama kalinya dalam kurun waktu lebih dari tiga tahun. Sektor jasa juga telah mulai mengikuti tren penurunan manufaktur, bahkan di ekonomi dengan pasar tenaga kerja yang kuat seperti Jerman. JP Morgan Global Composite PMI Markit berada pada level 51,7 pada akhir tahun 2019, lebih rendah dari akhir tahun 2018 yang sebesar 52,7.

Perselisihan tersebut berimbas pada ekonomi keduanya. Pada tahun 2019, surplus perdagangan China dengan AS turun 8,51% sementara defisit perdagangan AS dengan China turun 18%. Kebijakan perdagangan AS telah memperlebar kesenjangan perdagangan menjadi 5% dengan Uni Eropa, 26,2% dengan Meksiko, dan 42% dengan Kanada. Ekonomi China tumbuh 6,1% yang merupakan laju paling lambat dalam 29 tahun terakhir meskipun masih dalam target pemerintah yang sebesar 6%-6,5%. Sementara itu, ekonomi AS tumbuh 2,3% atau di bawah target Pemerintahan Donald Trump yang sebesar 3% dan merupakan pertumbuhan terendah sejak tahun 2016.

#### Global Economy

Global economy displayed unfavorable performance in 2019. The economic growth is estimated only around 2.9%, which is the lowest since the financial crisis a decade ago. Trade barriers and rising uncertainties for most of the year have created negative sentiment to business activities. These conditions have created a magnitude on the current cyclical and structural slowdown trends.

Trade disputes between the United States and China have heated-up again. Since it was first noted in 2018, the US has imposed tariffs on more than US\$360 billion in Chinese goods, and China responded by charging more than US\$110 billion in US products. The two-day negotiation held in early May 2019 ended in a deadlock. During September-December 2019, both countries still reciprocally threatened each other to impose new tariffs and increase existing tariffs.

Unfinished negotiations between US and China have triggered a rapid fall in business confidence indexes in the US and other countries. Markitt's JP Morgan Prompt Manufacturing Index (PMI) survey disclosed that, as trade growth was slowing down, the global manufacturing sector was shrinking for the first time in more than three years. The service sector has also begun to follow suit by displaying a downward trend in manufacturing, even in economies with a strong labor market such as Germany. JP Morgan Global Composite Markit PMI was reaching the level of 51.7 at the end of 2019, lower than the end of 2018 at 52.7.

The dispute had made an impact on both economies. In 2019, China's trade surplus with the US decreased by 8.51% while the US trade deficit with China decreased by 18%. US trade policy has widened the trade gap to 5% with the European Union, 26.2% with Mexico, and 42% with Canada. The Chinese economy grew 6.1% which is the slowest pace in the past 29 years even though it is still within the government's target of 6%-6.5%. Meanwhile, the US economy grew 2.3% or below the Donald Trump Government's target of 3% and it is the lowest growth since 2016.

**PEREKONOMIAN DAN INDUSTRI PERBANKAN**

## Banking Economy and Industry

Ekonomi tahun 2019 juga diwarnai dengan tekanan ekonomi pada kekuatan ekonomi negara berkembang seperti Brazil, India, Meksiko, dan Rusia. Ekonomi Brazil tumbuh 1,1%, terendah dalam tiga tahun terakhir. Ekonomi India tumbuh 5,0%, terendah sejak 2008. Ekonomi Meksiko berkontraksi 0,1% setelah tahun sebelumnya tumbuh 2,1% dan merupakan kontraksi pertama dalam 10 tahun terakhir. Ekonomi Rusia tumbuh 1,3%, melambat dari tahun sebelumnya yang tumbuh 2,5%. Di sisi lain, prospek *no-deal* Brexit, krisis fiskal yang makin ketat di Argentina, ketegangan politik di Iran, serta kerusuhan sosial di Venezuela, Libya, dan Yaman juga menambah ketidakpastian ekonomi global.

Dengan lingkungan ekonomi yang semakin tidak menentu, pelaku industri menjadi lebih waspada terhadap investasi jangka panjang yang berimbas pada perlambatan pembelian mesin dan peralatan global. Permintaan rumah tangga untuk barang-barang tahan lama juga melemah, meskipun terlihat adanya kenaikan pada triwulan II-2019. Hal ini terutama terlihat pada mobil, di mana perubahan regulasi, standar emisi baru, dan perubahan harga saham telah membebani penjualan di beberapa negara.

Dengan tidak adanya tekanan dari inflasi, bank sentral utama di negara maju telah bergerak lebih awal untuk mengurangi risiko penurunan ekonomi yang lebih dalam. Bank sentral mengambil kebijakan '*slower for lower*'. The Federal Reserve tercatat tiga kali memangkas *Fed Fund Rate* dengan masing-masing 25 basis poin pada Juli, September, dan Oktober 2019. Penurunan tersebut merupakan yang pertama sejak krisis 2008.

Kebijakan yang lebih *dovish* juga dilakukan European Central Bank (ECB), Bank of Japan (BoJ), dan Bank of England (BoE). ECB mempertahankan suku bunga *refinancing* utama tetap pada level 0% dan suku bunga deposito minus 0,5%. BoJ mempertahankan suku bunga jangka pendek utamanya tetap minus 0,1%, suku bunga jangka panjang mendekati 0%, dan melanjutkan program pembelian aset besar-besaran. BoE juga mempertahankan suku bunga acuan tetap 0,75% dan melanjutkan program pembelian obligasi korporasi senilai £10 miliar serta pembelian obligasi pemerintah senilai £435 miliar.

Kebijakan moneter yang lebih longgar tersebut mendorong investor untuk memindahkan dananya ke *emerging market* dan negara berkembang yang masih menawarkan suku bunga lebih tinggi, termasuk Indonesia. Indikator pasar modal global, seperti Dow Jones Industrial Average, FTSE 100 Index, dan Nikkei225 menunjukkan pelemahan. Pada akhir tahun 2019, ketiganya ditutup melemah masing-masing 0,64%, 0,76% dan 0,76% dari posisi yang sama tahun sebelumnya. Sementara, imbal hasil *Treasury Bond* AS 10 tahun turun dari 2,72% pada akhir tahun 2018 menjadi 1,92% pada akhir tahun 2019.

The economy in 2019 is also characterized by economic pressures on the economic strengths of developing countries such as Brazil, India, Mexico and Russia. Brazil's economy grew 1.1%, the lowest in the last three years. India economy grew 5.0%, the lowest since 2008. The Mexican economy contracted 0.1% after prior year's growth of 2.1% which was the first contraction in 10 years. The Russian economy grew 1.3%, slowing down from prior year which grew 2.5%. On the other hand, the prospect of Brexit no-deal, an increasingly tightening fiscal crisis in Argentina, political tensions in Iran, and social unrest in Venezuela, Libya and Yemen have also added up to the uncertainties of the global economy.

With increasing uncertainties in economic environment, industry players are becoming more cautious of their long-term investments which have made impact on the slow-down in global machinery and equipment purchases. Household demands for durable goods have also weakened, regardless of an increase in quarter II-2019. This is particularly noted in car demand, whereby changes in regulations, new emission standards, and changes in share prices have weighed on car sales in several countries.

In the absence of inflationary pressures, major central banks in developed countries have moved earlier to reduce the risk of a deeper economic downturn. The central bank adopted a '*slower for lower*' policy. The Federal Reserve cut the Fed Fund Rates three times by 25 basis points in July, September and October 2019, respectively. Such decline was the first since the 2008 crisis.

A more dovish policy was also adopted by the European Central Bank (ECB), the Bank of Japan (BoJ), and the Bank of England (BoE). The ECB maintained its major refinancing interest rate at 0% and the deposit rate is minus 0.5%. The BoJ maintained its main short-term interest rates steady at minus 0.1%, long-term interest rates near 0%, and continued its massive asset purchase program. The BoE also maintained its benchmark interest rate at 0.75% and continued a program of purchasing corporate bonds worth £10 billion and purchasing government bonds worth £435 billion.

The more relaxed monetary policy encouraged investors to shift their funds to emerging markets and developing countries that still offer higher interest rates, including Indonesia. Global capital market indicators, such as the Dow Jones Industrial Average, FTSE 100 Index, and Nikkei225 indicated weakness. At the end of 2019, these three indicators were closed lower by 0.64%, 0.76% and 0.76%, respectively compared to similar position in prior year. Meanwhile, the yield on the 10-year US Treasury Bond fell from 2.72% at the end of 2018 to 1.92% at the end of 2019.

## Ekonomi Indonesia

Sejalan dengan ekonomi global, kinerja ekonomi Indonesia juga menunjukkan perlambatan. Eskalasi perselisihan dagang AS-China yang memanas berimbas pada kinerja ekspor nasional. Hal tersebut memperburuk neraca perdagangan yang sudah membukukan defisit cukup besar, terutama akibat impor kebutuhan akselerasi sektor infrastruktur sejak tahun 2018.

Perekonomian Indonesia masih dalam proses moderasi pasca-*booming* pasar komoditas dan membutuhkan stimulus internal untuk tumbuh lebih tinggi. Setelah menikmati *boom* komoditas dan energi, pertumbuhan ekonomi perlahan melambat pada tahun 2012. Hal ini ditambah lagi dengan kebijakan moneter dan fiskal yang ketat untuk mengatasi *taper tantrum* pada 2013. Dampaknya terasa pada 2013 dan 2014. Situasi semakin diperburuk dengan menurunnya harga komoditas dan energi pada 2015. Akibatnya ekspor, investasi dan juga konsumsi rumah tangga terpukul. Pertumbuhan ekonomi mencapai titik terendah 4,9% (yoy) pada tahun 2015.

Upaya pemerintah untuk menggenjot pertumbuhan ekonomi dengan memfokuskan diri pada infrastruktur belum mampu mendorong pertumbuhan dalam jangka pendek. Pembangunan infrastruktur, sebagai upaya perbaikan sisi penawaran sangat diperlukan namun baru akan menghasilkan pertumbuhan dalam jangka panjang. Pembangunan infrastruktur diharapkan bisa menarik lebih banyak investasi.

Namun, kondisi politik yang relatif kondusif pasca pemilu legislatif dan pemilihan presiden memperkuat optimisme masyarakat. Indeks keyakinan konsumen (IKK) yang cenderung melemah hingga September 2019 perlahan menguat pada akhir tahun 2019. Survei Konsumen Bank Indonesia menunjukkan IKK sempat berada pada level 118,4 pada Oktober 2019, terendah sejak Maret 2017, kembali naik hingga level 126,4 pada Desember 2019. Peningkatan yang merata terjadi pada seluruh kelompok pengeluaran.

Terjaganya optimisme konsumen sangat penting bagi pertumbuhan ekonomi nasional. Konsumsi rumah tangga masih menjadi pilar penting perekonomian Indonesia. Kontribusinya terhadap pertumbuhan ekonomi mencapai 56,62%. Tekanan eksternal yang cukup berat membuat konsumsi rumah tangga menjadi pengontrol utama kinerja ekonomi. Investasi (pembentukan modal tetap bruto/PMTB) tumbuh 4,45% pada tahun 2019, lebih rendah dari pertumbuhan tahun 2017 dan 2018 yang masing-masing mencapai 6,15% dan 6,64%. Andil ekspor bersih juga membaik namun lebih didorong oleh kinerja impor yang berkontraksi. Ekonomi tahun 2019 tumbuh 5,02%, lebih rendah dari pertumbuhan tahun 2017 dan 2018 yang masing-masing mencapai 5,07% dan 5,17%.

## Indonesia Economy

In line with global economy, Indonesia's economic performance also experienced a slowdown. The escalation of the heated US-China trade dispute has made an impact on national export performance. Such condition has created a worsening effect on the trade balance that has already recorded a considerable large amount of deficit, mainly due to imports of accelerated infrastructure sector demands since 2018.

Indonesian economy is still undergoing the moderation process of post-booming in the commodity market and requires an internal stimulus to grow higher. After benefiting from the booming of commodity and energy, economic growth gradually slowed down in 2012. This was compounded by a tight monetary and fiscal policy to overcome the taper tantrum in 2013. The impact was experienced in 2013 and 2014. The situation was further exacerbated by the decline in commodity and energy prices in 2015. As a result, exports, investment and household consumption also experienced its adverse effects. Economic growth reached its lowest at 4.9% (yoy) in 2015.

Government efforts to boost economic growth by focusing on infrastructure have not been able to spur short-term growth. Infrastructure development, which represents an effort to improve supplies, is highly needed yet such development will only generate growth in the long term. Infrastructure development is expected to draw more interests in investment.

However, political conditions that were relatively conducive after the legislative and presidential elections have strengthened public optimism. The consumer confidence index (IKK), which tends to weaken until September 2019, slowly strengthened at the end of 2019. The Bank Indonesia Consumer Survey indicated that the IKK which was at 118.4 in October 2019, the lowest since March 2017, were rising again to 126.4 in December 2019. Increases were noted evenly in all expenditure groups.

Maintaining customer optimism plays a very important role in national economic growth. Household consumption still serves as an important pillar of the Indonesian economy. Its contribution to economic growth reached 56.62%. Considerable amount of external pressure has made household consumption as the main driver of economic performance. Investment (gross fixed capital establishment/PMTB) grew 4.45% in 2019, lower than the growth in 2017 and 2018 which reached 6.15% and 6.64%, respectively. Net exports also improved but were driven more by contracting import performance. The economy in 2019 grew 5.02%, lower than the growth in 2017 and 2018 which respectively reached 5.07% and 5.17%.

## PEREKONOMIAN DAN INDUSTRI PERBANKAN

### Banking Economy and Industry

Kebijakan pemerintah dalam menjaga daya beli masyarakat melalui program jaringan pengaman sosial dan pengendalian inflasi berdampak pada terjaganya pertumbuhan ekonomi pada level 5%. Berbagai program seperti penyaluran dana Program Keluarga Harapan (PKH), Bantuan Pangan Non Tunai (BPNT), Kartu Indonesia Pintar (KIP), hingga pembebasan iuran untuk Penerima Bantuan Iuran (PBI) BPJS Kesehatan telah memberikan perlindungan daya beli bagi kelompok bawah.

Pengendalian harga komoditas, khususnya harga yang diatur oleh pemerintah (*administered prices*) menjadi satu dari sejumlah faktor yang menyebabkan rendahnya laju inflasi yang mencapai 2,72% pada tahun 2019 yang merupakan level terendah dalam 20 tahun terakhir. Inflasi dari harga yang diatur pemerintah tercatat hanya sebesar 0,51%. Angka ini lebih rendah jika dibandingkan tahun sebelumnya yang sebesar 3,36%.

Tingkat inflasi yang relatif rendah, serta kebijakan bank sentral AS The Fed yang lebih *dovish*, telah memberikan ruang moneter yang lebih besar bagi Bank Indonesia (BI). BI kembali memangkas BI 7-Day Repo Rate sebesar 25 basis poin ke level 5% pada Oktober 2019 yang dipertahankan hingga akhir tahun 2019. Kebijakan bank sentral negara maju, terutama AS yang lebih *dovish* telah mendorong aliran dana masuk ke Indonesia. Pada akhir tahun 2019, aliran modal saham dan modal yang ditanam kembali dalam investasi langsung di Indonesia mencapai US\$24,80 miliar atau naik 24,49% dari tahun sebelumnya. Indeks harga Saham Gabungan (IHSG) tercatat naik 2,02% dari akhir tahun sebelumnya ke level 6.319,44.

### PaninBank dan Industri Perbankan

Perlambatan ekonomi dan peningkatan ketidakpastian global telah berdampak pada kenaikan risiko kredit, terutama segmen korporasi. Bisnis sektor manufaktur terutama yang berorientasi ekspor tertekan. Segmen *retail* yang cukup besar, seperti rumah di atas harga Rp1 miliar dan mobil di atas Rp200 juta juga mengalami penurunan permintaan. Penyaluran kredit perbankan pun tidak seperti yang diproyeksikan Otoritas Jasa keuangan (OJK) dan BI yang sekitar 10%. Kredit Bank Umum tercatat Rp5.617 triliun atau tumbuh 6,08% pada akhir tahun 2019.

Bank Indonesia tercatat telah melonggarkan kebijakan moneternya untuk mendorong kredit. Sejak Juli 2019, Bank Indonesia konsisten mengambil langkah menurunkan suku bunga acuan, masing-masing 25 basis poin (bps). Posisi BI 7-Day Repo Rate (BI7DRR) berada pada level 5,0% pada Oktober 2019 atau telah turun 100 bps. Selain menurunkan BI7DRR, BI juga memangkas Giro Wajib Minimum (GWM) dari 6,5% menjadi 6,0% pada Juni 2019. Pada September 2019, BI kembali memberi relaksasi dan stimulus melalui kebijakan makroprudensial. Meski begitu, kondisi pasar yang kurang kondusif membuat perbankan menahan kredit.

Government policies in maintaining people's purchasing power through social security network programs and controlling the inflation have made an impact on maintaining economic growth at 5%. Various programs such as the distribution of Family Hope Program (PKH) funds, Non-Cash Food Assistance (BPNT), Indonesia Smart Card (KIP), and the exemption of contributions for Beneficiaries of BPJS Health has provided protection for the purchasing power of lower economic class.

Commodity price control, particularly for administered prices, is one of the factors that triggered the low inflation rate to 2.72% in 2019 which is the lowest level in the last 20 years. Inflation from administered regulated prices was recorded at only 0.51%. Such figure is lower compared to prior year which was 3.36%.

The relatively low inflation rate, as well as the more dovish policy of the US central bank, has provided more room for growth for monetary policies of Bank Indonesia (BI). BI again cut the BI 7-Day Repo Rate by 25 basis points to a level of 5% in October 2019 which was maintained until the end of 2019. Central bank policies in developed countries, particularly in the US which is more dovish, have pushed the flow of funds into Indonesia. At the end of 2019, the flow of share capital and reinvested capital in direct investment in Indonesia amounted to US\$24.80 billion, increasing by 24.49% from prior year. The Composite Stock Price Index (CSPI) rose 2.02% from the end of prior year to 6,319.44.

### PaninBank and Banking Industry

The global economic slowdown and increasing uncertainties have resulted in an increase in credit risk, particularly in the corporate segment. The manufacturing sector, particularly export-oriented businesses, experienced a depressed condition. The retail segment that is fairly large in amount, such as houses above the price of Rp1 billion and cars above Rp200 million, also experienced a decrease in demand. Bank lending growth was not as projected by the Financial Services Authority (OJK) and BI, which was around 10%. Commercial bank loans were recorded amounting to Rp5,617 trillion or growing 6.08% at the end of 2019.

Bank Indonesia has provided relaxation on its monetary policy to spur credit growth. Since July 2019, Bank Indonesia has consistently taken measures to reduce the benchmark interest rate, each by 25 basis points (bps). The position of the BI 7-Day Repo Rate (BI7DRR) was at the level of 5.0% in October 2019 or has dropped by 100 bps. In addition to reducing BI7DRR, BI also cut the Statutory Reserves from 6.5% to 6.0% in June 2019. In September 2019, BI again provided relaxation and stimulus through macroprudential policies. Nonetheless, unfavorable market conditions have already made banks restrain their lending.

Untuk mengimbangi penyaluran kredit yang kurang agresif, bank secara umum menahan penghimpunan dana pihak ketiga (DPK). Beberapa bank memilih untuk merestrukturisasi DPK-nya demi mengoptimalkan biaya dana (*cost of fund*). Persaingan perebutan dana murah yang sudah ketat makin menantang dengan adanya surat utang negara (SUN) ritel. Instrumen itu menambah daftar pilihan penempatan dana bagi masyarakat, melengkapi instrumen yang sudah ada seperti emas, reksadana, *forex*, maupun *cryptocurrency*. DPK bank umum tercatat tumbuh 6,54% dari tahun 2018 menjadi Rp5.999 triliun. Pencapaian tersebut lebih rendah dari proyeksi OJK dan BI yang sekitar 8%.

Akumulasi tekanan ekonomi sepanjang sembilan bulan sebelumnya telah mendorong peningkatan kredit bermasalah sebagaimana tercermin dari Rasio *Non-Performing Loan* (NPL) *gross* dan net perbankan yang naik dari 2,4% dan 1,0% pada akhir tahun 2018 menjadi 2,5% dan 1,2% pada akhir tahun 2019. Meski begitu, permodalan bank makin kuat. Rasio Pemenuhan kecukupan Modal Minimum (*capital adequacy ratio*/CAR) meningkat dari 22,97% pada tahun 2018 menjadi 23,40% sementara Rasio Modal Inti terhadap ATMR meningkat dari 21,29% menjadi 21,86%.

Penurunan suku bunga bank, mengikuti pemangkasan BI7DRR, berimbas pada rentabilitas bank. Rasio Margin Bersih (*Net Interest Margin*/NIM) turun menjadi 4,91% dari sebelumnya 5,14% dan Rasio Laba terhadap Aset (*Return on Asset*/ROA) turun dari 2,55% menjadi 2,47%.

Jumlah bank umum dalam lanskap industri perbankan nasional tercatat sebanyak 110 bank per akhir tahun 2019, berkurang 5 bank dari tahun sebelumnya. Saat ini, sekitar 63% aset perbankan nasional masih terkonsentrasi pada 10 bank besar saja. Total aset 15 bank terbesar mencapai 72% aset. Dengan kata lain, sepertiga aset sisanya diperebutkan 96 bank. PaninBank (secara individual) berada pada urutan ke-7 bank beraset terbesar dengan aset Rp190,25 triliun.

Di tengah perkembangan ekonomi yang menantang dan ketatnya tingkat persaingan bisnis keuangan dan perbankan, PaninBank masih mampu membukukan kinerja keuangan yang positif. PaninBank terus berupaya menjaga fundamental keuangan tetap solid dengan fokus pada permodalan yang kuat dan tercapainya *bottom line* laba bersih Rp3 triliun (bagi PaninBank secara individual).

Meskipun beberapa pos keuangan menunjukkan penurunan, pencapaian kinerja PaninBank, baik individual maupun konsolidasian sepanjang tahun 2019 secara umum menunjukkan fondasi keuangan tetap solid. Rasio keuangan yang mencerminkan kualitas permodalan, rentabilitas, likuiditas, dan efisiensi menunjukkan hasil bervariasi namun secara umum masih terjaga di atas standar kesehatan perbankan nasional.

To compensate for less aggressive lending, banks in general also withheld their third party funds (DPK). A number of banks opted to restructure their third party funds in order to optimize the cost of funds. The tightening competition for CASA funds is increasingly challenging with the issuance of retail government securities (SUN). The instrument adds up to the list of options for fund placement for public, complemented by existing instruments such as gold, mutual funds, *forex*, and *cryptocurrency*. Commercial bank deposits recorded a growth of 6.54% from 2018 to Rp5,999 trillion. Such amount is lower than projected amount made by OJK and BI around 8%.

The accumulated economic pressures during the previous nine months has driven an increase in banks' non-performing loans as reflected in the gross and net Non-Performing Loans (NPL) ratio, which rose from 2.4% and 1.0% at the end of 2018 to 2.5% and 1.2% at the end of 2019. However, bank capital is growing stronger. The Capital Adequacy Ratio (CAR) increased from 22.97% in 2018 to 23.40% while the Core Capital Ratio to RWA increased from 21.29% to 21.86%.

The decline in bank interest rates, following the BI7DRR cut, has made an impact on bank profitability. The Net Interest Margin (NIM) fell to 4.91% from 5.14% and Return on Assets (ROA) ratio decreased from 2.55% to 2.47%.

The number of commercial banks in the national banking industry masterplan is totaling 110 banks as of the end of 2019, decreasing by 5 banks from prior year. At present, around 63% of national banking assets are still concentrated in 10 large banks. The total assets of the 15 largest banks account for 72% of assets. In other words, the remaining one third of assets is contested by 96 banks. PaninBank (individually) ranks the 7<sup>th</sup> largest bank with assets amounting to Rp190.25 trillion.

In the midst of challenging economic developments and intense level of competition in the financial and banking business, PaninBank was still capable of recording positive financial performance. PaninBank strives to maintain its solid financial fundamentals by focusing on strengthening its capital and achieving a bottom line of Rp3 trillion net profit (Bank only).

Despite the decline in a number of financial accounts, PaninBank's performance achievements, both at individual level and consolidated level, in general indicate that the financial foundation remains solid throughout 2019. Financial ratios that reflect the quality of capital, profitability, liquidity, and efficiency have shown mixed results, but in general they are still maintained above the national banking health standards.

**PEREKONOMIAN DAN INDUSTRI PERBANKAN**

## Banking Economy and Industry

**Permodalan makin kuat.** Posisi Rasio Kewajiban Pemenuhan Modal Minimum (KPMM) atau *Capital Adequacy Ratio* (CAR) tercatat sebesar 24,16% untuk individual dan 23,49% untuk konsolidasian. Rasio permodalan terus ditingkatkan untuk memitigasi risiko ditengah perlambatan dan ketidakpastian ekonomi global. Modal Inti (*Tier 1*) PaninBank mencapai Rp35.510 miliar sementara Konsolidasian mencapai Rp39.203 miliar.

**Rentabilitas terkoreksi.** Kondisi ekonomi yang melambat yang direspon dengan pemangkasan suku bunga acuan berimbas pada pendapatan. Rasio rentabilitas seperti *return on asset* (ROA), *return on equity* (ROE), dan *net interest margin* (NIM) sedikit menurun namun PaninBank masih bisa menjaga bottom line laba bersih pada level Rp3 triliun. Laba Bersih Setelah Pajak (*Net Profit After Tax/NPaT*) PaninBank tercatat sebesar Rp3.065 miliar sementara Konsolidasian sebesar Rp3.498 miliar.

**Pengelolaan DPK makin efisien.** PaninBank terus berupaya mengelola Dana Pihak Ketiga (DPK) seefisien mungkin untuk menekan peningkatan biaya. Konsekuensinya, penghimpunan DPK belum sesuai ekspektasi sebagai imbas penurunan suku bunga. Hal ini mendorong Rasio *Loan to Deposit* (LDR) masih berada pada kisaran 100%. PaninBank berupaya mengoptimalkan pengeluaran operasional demi mewujudkan tingkat efisiensi yang ideal, terutama secara Konsolidasian. Tingkat efisiensi menunjukkan tren membaik sebagaimana tercermin dari rasio beban operasional terhadap pendapatan operasional (BOPO) yang menurun.

**PROSPEK EKONOMI-BISNIS TAHUN 2020**

Prospek pertumbuhan ekonomi-bisnis tahun 2020 yang sebelumnya terlihat positif kembali suram dengan adanya wabah Coronavirus (Covid-19). Wabah yang pertama kali muncul di Provinsi Hubei, China pada akhir Desember 2019 tersebut telah menyebar ke seluruh dunia. Bloomberg Economic memperkirakan dampak ekonomi dapat mencakup resesi di AS, kawasan euro dan Jepang, pertumbuhan paling lambat yang tercatat di Tiongkok, dan total US\$2,7 triliun dalam *output* yang hilang atau setara dengan seluruh produk domestik bruto (PDB) AS.

OECD memangkas ekspektasinya untuk pertumbuhan global menjadi 2,4% dari 2,9%, dan memperingatkan bahwa itu bisa jatuh ke level terendah 1,5%. Goldman Sachs memperkirakan kontraksi global pada semester pertama tahun ini. Perkiraan terbaru untuk pertumbuhan PDB kuartal pertama di Tiongkok berkisar dari 5,8% hingga minus 0,5%, dengan menggarisbawahi tingginya tingkat ketidakpastian. *International Monetary Fund* (IMF) memperkirakan ekonomi global akan tumbuh kurang dari 2,9%, lebih rendah dari proyeksi sebelumnya yang tumbuh 3,3% dengan mempertimbangkan tensi perselisihan dagang AS dan China.

**Capital is growing stronger.** Capital Adequacy Ratio (CAR) was recorded at 24.16% for Bank only and 23.49% for consolidation. The Bank continues to increase its capital ratio to mitigate risks amid the global economic slowdown and uncertainties. PaninBank's core capital (*Tier 1*) reached Rp35,510 billion while consolidated amount reached Rp39,203 billion.

**Profitability has been adjusted.** Slowing down economic condition that has been addressed by cutting the benchmark interest rate have made an impact on income. Profitability ratios such as *return on assets* (ROA), *return on equity* (ROE), and *net interest margin* (NIM) decreased slightly but PaninBank was still able to maintain bottom line net profit at the level of Rp3 trillion. PaninBank's Net Profit After Tax (NPAT) was recorded amounting to Rp3,065 billion while consolidated NPAT was amounting to Rp3,498 billion.

**DPK management has been more efficient.** PaninBank continues to strive to manage Third Party Funds (DPK) as efficiently as possible to reduce cost increases. Consequently, the accumulated deposit was not as expected due to the impact of decreasing interest rates. Such condition has made Loan to Deposit Ratio (LDR) remain within the range of 100%. PaninBank seeks to optimize its operational expenses in order to achieve the ideal level of efficiency, particularly on a Consolidated basis. The efficiency level shows an improving trend as reflected in the declining ratio of operating expenses to operating income (BOPO).

**ECONOMY-BUSINESS PROSPECT 2020**

The outlook for economic-business growth in 2020 which was previously projected as positive returned to unfavorable again with the Coronavirus (Covid-19) outbreak. The outbreak that was first found in Hubei Province, China at the end of December 2019 has spread throughout the world. Bloomberg Economic estimates that economic impacts might include recessions in the US, the Euro area, and Japan, and the slowest growth was recorded in China, and a total loss of US\$2.7 trillion in output or equivalent to all US gross domestic product (GDP).

The OECD cut its expectations for global growth to 2.4% from 2.9% and provided an early warning that the figure could fall to the lowest level of 1.5%. Goldman Sachs expects global contraction in the first half of this year. The latest estimates for first quarter GDP growth in China are ranging from 5.8% to minus 0.5%, underlining the high level of uncertainty. The International Monetary Fund (IMF) estimates that the global economy will grow by less than 2.9%, lower than the previous projected growth of 3.3% taking into account the tension between the US and China trade disputes.

Sebelumnya Covid-19 merebak, isu ketidakpastian ekonomi masih bersumber pada sekitar prospek kebijakan dagang yang dilakukan Presiden Donald Trump. AS dan China telah menandatangani kesepakatan ‘fase satu’ yang ditandatangani pada Januari 2020. Cina berjanji akan meningkatkan impor AS sebesar US\$200 miliar di atas level tahun 2017 dan memperkuat aturan kekayaan intelektual. AS setuju untuk membagi dua beberapa tarif baru yang telah diberlakukannya terhadap China serta akan menangani masalah tambahan dalam kesepakatan ‘fase dua’.

Namun, China bukan satu-satunya kekuatan dunia yang berselisih dagang dengan Amerika Serikat. Uni Eropa termasuk yang lainnya. Uni Eropa, yang mengelola kebijakan perdagangan atas nama negara-negara anggotanya, telah mengancam untuk menanggapi jika diprovokasi.

Dengan adanya Covid-19, AS dan juga negara lainnya diharapkan bisa menyingkirkan ego sektoralnya untuk menjaga perekonomian global tidak terperosok lebih dalam. *The Fed* kembali memangkas *Fed Fund Rate* 50 basis poin (bps) dan mengucurkan US\$50 miliar ke dalam sistem keuangan untuk mengurangi dampak Covid-19. *People's Bank of China* memangkas suku bunga acuan 10 bps dan mengintruksikan untuk merelaksasi penilaian kredit nasabah.

Bank Indonesia memangkas suku bunga acuan BI *7-Day Repo Rate* sebesar 25 basis poin ke level 4,75%. Bank Indonesia juga memangkas Rasio GWM valas dari semula 8% menjadi 4% dari dana pihak ketiga (DPK) dan memangkas GWM rupiah sebesar 50 bps menjadi 5% khusus untuk bank yang menyalurkan pembiayaan ekspor-impor. Otoritas Jasa Keuangan (OJK) menerbitkan stimulus bagi perbankan berupa relaksasi penilaian kualitas aset kredit yang hanya didasarkan pada satu pilar yaitu ketepatan pembayaran pokok dan atau bunga serta relaksasi pengaturan restrukturisasi kredit bagi debitur di sektor yang terdampak penyebaran Coronavirus.

Simulasi Bloomberg *Economics* menunjukkan, Covid-19 berpotensi membuat ekonomi Indonesia berkontraksi dari 0,3% hingga paling buruk mencapai 4,6%. Bank Indonesia merevisi ke bawah proyeksi pertumbuhan kredit tahun 2020 menjadi 9%-11% dari sebelumnya 10%-12%. Pertumbuhan ekonomi yang terdampak Coronavirus yang belum kuat mendorong kredit menjadi alasannya.

Kondisi ekonomi tahun depan tidak akan mudah, baik bagi Pemerintah maupun pelaku perbankan. Meskipun begitu, PaninBank akan tetap mengupayakan kinerja berjalan secara optimal, baik dalam penghimpunan dana pihak ketiga (DPK) maupun penyaluran kredit guna menopang pertumbuhan ekonomi Indonesia.

PaninBank optimis akan dapat membukukan kinerja yang lebih baik pada tahun 2020 mendatang, minimal sesuai dengan pencapaian tahun 2019. Kebijakan disusun secara

Prior to Covid-19 outbreak, the issue of economic uncertainty was still originating from the prospect of trade policy made by President Donald Trump. The US and China have entered into a ‘phase one’ agreement in January 2020. China has promised to increase US imports by US\$200 billion higher than 2017 level and to strengthen the reinforcement of intellectual property rules. The US agreed to halve a number of new tariffs already imposed on China and will resolve additional issues in the ‘phase two’ agreement.

However, China is not the only world power in disputes with the United States. European Union is another one. The European Union, which manages trade policies on behalf of its member states, has threatened to respond if provoked.

With the outbreak of Covid-19, the US and other countries are expected to be able to set aside its sectoral ego to prevent the global economy from falling deeper. The Fed again cut the Fed Fund Rate by 50 basis points (bps) and injected US\$50 billion into the financial system to reduce the impact of Covid-19. The People's Bank of China cut its benchmark interest rate by 10 bps and instructed to provide relaxation on customer credit ratings.

Bank Indonesia cut its BI 7-Day Repo Rate benchmark by 25 basis points to the level of 4.75%. Bank Indonesia also cut the foreign currency reserve requirement ratio from 8% to 4% from third party funds (DPK) and cut the rupiah reserve requirement by 50 bps to 5% specifically for banks that provide export-import financing. The Financial Services Authority (OJK) issued a stimulus for banks in the form of relaxation in assessing the quality of credit assets based on only one pillar, namely the accuracy of principal and/or interest payments and relaxation of loan restructuring arrangements for debtors in sectors affected by the spread of Coronavirus.

The Bloomberg Economics simulation indicates that Covid-19 has the potentials to make Indonesian economy contract from 0.3% to the worst at 4.6%. Bank Indonesia has revised down its previously projected loan growth in 2020 to 9%-11% from 10%-12%. The underlying reason is that economic growth affected by Coronavirus has not strongly triggered any credit growth.

Economic conditions in the coming year will not be easy, both for the Government and for banking players as well. However, PaninBank will continue to strive to operate at its optimal level, both in collecting third party funds (DPK) and lending to support Indonesia's economic growth.

PaninBank is optimistic to be able to record better performance in 2020, at least in accordance with the performance in 2019. Policies are prepared more realistically and moderately by

lebih realistis dan moderat dengan menyesuaikan kondisi ekonomi-bisnis yang ada, serta tetap mengutamakan prinsip kehati-hatian (*prudentality*). Oleh karena itu, Manajemen akan fokus pada kemampuan dalam menghadapi tantangan perubahan yang dihadapi industri perbankan serta situasi ekonomi yang masih diliputi banyak ketidakpastian, agar dapat mempertahankan hasil yang baik.

Target bisnis tahun 2020 bertitik tolak pada upaya menjaga *bottom line* laba bersih Rp3 triliun. Indikator-indikator fundamental diarahkan pada kemampuan memitigasi risiko yang kuat di tengah prospek ekonomi yang cenderung masih spekulatif. Penyaluran kredit diproyeksikan tumbuh 3%-5% secara tahunan sementara penghimpunan DPK tumbuh 6%-8%. Aset tumbuh 3%-5%. Bank terus mengupayakan tingkat efisiensi yang optimal, antara lain dengan terus mengevaluasi pos biaya yang kurang produktif dan mendorong penguatan jaringan kantor. Dengan perbaikan efisiensi, Bank optimis dapat mewujudkan pertumbuhan Laba Bersih Setelah Pajak yang sama seperti tahun sebelumnya pada tahun 2020 mendatang.

adjusting to existing economic-business conditions, and still prioritizing the prudent principle. Therefore, Management will focus on its ability to address the changes in challenges encountered by the banking industry as well as the economic situation which is still full of uncertainties, so as to maintain good results.

The business target for 2020 starts from maintaining the bottom line of Rp3 trillion net profit. Fundamental indicators are directed towards the ability to mitigate strong risks amid economic prospects that tend to remain speculative. Loans are projected to grow by 3%-5% on an annual basis while the third party funds grow by 6%-8%. Assets grow by 3%-5%. The Bank continues to strive for optimal levels of efficiency, among others by continuously evaluating costs that are less productive and encouraging the strengthening of office networks. With such efficiency improvements, the Bank is optimistic to realize the growth of net profit after tax similar to prior year in the year of 2020.

# PERBANKAN KOMERSIAL

Commercial Banking

## Di tengah beragam tantangan sepanjang tahun 2019, perbankan komersial telah menjalankan sejumlah strategi dengan fokus pada pertumbuhan kredit dan pengembangan portofolio untuk menjaga kinerjanya.

Amid various challenges throughout 2019, commercial banking has carried out a number of strategies with a focus on credit growth and portfolio development to maintain performance.

### KINERJA PERBANKAN KOMERSIAL

Hingga tahun 2019, jasa dan layanan yang ditawarkan di segmen perbankan komersial terbagi menjadi tiga bagian, yakni *small medium business* (SMB), komersial, dan Kredit Mikro Panin (KMP). Ketiganya memiliki karakteristik masing-masing, yang tentunya telah disesuaikan dengan kebutuhan segmentasi nasabah.

#### Strategi dan Fokus Tahun 2019

Sejalan dengan kondisi perlambatan ekonomi global serta pertumbuhan makro ekonomi nasional tahun 2019 yang di bawah target, untuk mendukung kinerja bisnis PaninBank, perbankan komersial telah menjalankan sejumlah strategi dengan fokus pada pertumbuhan kredit dan pengembangan portofolio.

Pertumbuhan kredit dilakukan dengan menjaga debitur *existing* secara berkesinambungan dengan tetap mengacu pada pelaksanaan prinsip kehati-hatian dalam pemberian fasilitas pembiayaan (*prudential financing*), penerapan *Good Corporate Governance* (GCG), serta pengawasan yang ketat terhadap kualitas kredit dan tingkat kesehatan portofolio.

### COMMERCIAL BANKING PERFORMANCE

In 2019, products and services offered in the Commercial Banking segment are divided into three categories, namely *small medium business* (SMB), commercial, and Panin Micro Credit (KMP). These three categories have their own characteristics as suited to the needs of the different customer segments.

#### Strategy and Focus in 2019

In line with the global economic slowdown and below-target national macroeconomic growth in 2019, in order to support PaninBank's business performance, Commercial Banking has implemented a number of strategies with a focus on credit growth and portfolio development.

Credit growth is pursued by maintaining existing debtors on an ongoing basis, while adhering to the principle of prudential financing, the implementation of Good Corporate Governance (GCG), and stringent monitoring of credit quality and portfolio soundness.

Untuk memperkuat kinerja perbankan komersial, menjaga kualitas portofolio juga menjadi bagian penting. Pemantauan yang ketat terhadap kualitas kredit dan tingkat kesehatan portofolio dilakukan melalui *early warning system* (EWS), restrukturisasi, penjualan aset/jaminan debitur, tindakan/langkah-langkah hukum, dan pengambilan jaminan serta langkah hukum yang diperlukan.

Sebagai upaya merespons kondisi dan tantangan bisnis, perbankan komersial menilai pengembangan sumber daya manusia (SDM) merupakan bagian yang tidak boleh terlewatkan. Beberapa peningkatan kompetensi SDM dilakukan, antara lain melakukan pelatihan/*workshop/team building* untuk *special asset management* (SAM) agar mendapatkan tambahan pengetahuan untuk menangani kredit bermasalah.

Melalui pelatihan SAM, kantor cabang memiliki pemahaman yang sama dalam penanganan kredit bermasalah. Selain itu, Perbankan Komersial juga melakukan pelatihan yang berkesinambungan bagi *sales person*.

### Kinerja Tahun 2019

Sepanjang tahun 2019, total dana yang dikelola yang berasal dari penghimpunan dana nasabah perbankan komersial mencapai Rp5,4 triliun. Dibandingkan dengan tahun sebelumnya yang sebesar Rp5,6, telah terjadi penurunan 3,05%.

Dari sisi penyaluran kredit, pada tahun 2019 penurunan *outstanding* kredit tidak sebesar penurunan *sales*. *Outstanding* kredit di tahun 2019 turun sebesar 6,24%. Hal ini sejalan dengan kebijakan dan rencana strategis Bank, yaitu mengelola debitur *existing* dan mengevaluasi debitur yang kreditnya berpotensi mengalami masalah sesuai dengan hasil pengukuran sistem peringatan dini atau *early warning system*.

Sementara itu, pendapatan bunga dari segmen usaha ini pada tahun 2019 adalah sebesar Rp5,5 triliun, mengalami penyesuaian sebesar 1,3% dari posisi tahun sebelumnya yang sebesar Rp5,6 triliun. Perlambatan itu akibat dari menurunnya *outstanding* kredit sebesar 6,24% sepanjang tahun 2019.

Adapun kontribusi pendapatan bunga dari segmen komersial yaitu sebanyak 36% dari total pendapatan bunga Bank tahun 2019.

To strengthen the performance of Commercial Banking, the Bank considers maintaining its portfolio quality as an important part also. Close monitoring of credit quality and portfolio soundness is performed through a variety of mechanism including early warning system (EWS), credit restructuring, sale of debtor assets/guarantees, legal actions/proceedings, and confiscation and other legal actions as required.

Commercial Banking considers the development of human resources (HR) as a part of efforts to respond to business condition and challenges. A number of HR competence enhancements have been performed, including conducting Special Asset Management (SAM) training/workshops/team building sessions in order to gain additional knowledge to manage non-performing loans.

Through SAM training, the branch offices have a common perception in the management of non-performing loans. In addition, Commercial Banking also conducts ongoing training for sales personnel.

### 2019 Performance

In 2019, total funds from Commercial Banking customers reached Rp5.4 trillion. This was a decline of 3.05% compared to the previous year which amounted to Rp5.6 trillion.

In terms of lending, the Bank recorded a decline of 6.24% in loan outstanding in 2019, which is less than the decline in sales. This is in line with the Bank's strategic plans and policies to maintain existing debtors while evaluating debtors whose loan facilities are at risk to become non-performing as indicated by the early warning system.

Meanwhile, interest income from this business segment in 2019 amounted to Rp5.5 trillion, a slight decline of 1.3% from the previous year position at Rp5.6 trillion. The decline reflects the reduction in loan outstanding by 6.24% during 2019.

Interest income from Commercial Banking segment contributed 36% to the Bank's total interest income in 2019.

## Small Medium Business (SMB)

Sepanjang tahun 2019, unit SMB menyalurkan kredit sebesar Rp4,7 triliun, lebih rendah 56,63% dari capaian 2018 yang sebesar Rp8,4 triliun. Meskipun demikian, penurunan *outstanding* kredit SMB tidak sebesar penurunan *sales*. *Outstanding* kredit SMB di tahun 2019 turun sebesar 6,19%. Penurunan ini disebabkan oleh perlambatan perekonomian yang memberikan dampak pada menurunnya kinerja dunia usaha, sehingga daya serap pembiayaan mengalami kendala.

Hal ini juga berdampak pada *Non Performing Loan* (NPL) unit SMB yang naik 0,41 poin atau sekitar 10,10% dari NPL tahun 2018, yaitu dari 4,06% menjadi 4,47%.

Sementara itu, dari sisi target, unit SMB mampu membukukan realisasi dari target penyaluran kredit sebesar 87%, dari target senilai Rp31,13 triliun. Berikut uraian target, realisasi, selisih, dan pencapaian unit SMB yang tersaji dalam tabel berikut.

## Komersial

Sepanjang tahun 2019, unit Komersial menyalurkan kredit sebesar Rp3,3 triliun, lebih rendah 45,38% dari capaian 2018 yang sebesar Rp6,1 triliun. Meskipun demikian, penurunan *outstanding* kredit Komersial tidak sebesar penurunan *sales*. *Outstanding* kredit komersial di tahun 2019 turun sebesar 6,5%. Penurunan ini disebabkan dunia usaha yang tidak agresif di tengah perlambatan pertumbuhan ekonomi.

Hal ini juga berdampak pada *Non Performing Loan* (NPL) unit komersial yang tercatat sebesar 3,78% pada 2019, naik 1,22 poin, atau sekitar 45,90% dari NPL tahun 2018 yang sebesar 2,66%.

Sementara itu, dari sisi target, unit komersial mampu membukukan realisasi dari target penyaluran kredit sebesar 87% dari target senilai Rp25,50 triliun. Berikut uraian target, realisasi, selisih, dan pencapaian unit komersial yang tersaji dalam tabel berikut.

## Small Medium Business (SMB)

Throughout 2019, the SMB unit disbursed loans amounting to Rp4.7 trillion, or 56.63% lower than Rp8.4 trillion in 2018. However, the decrease in outstanding SMB credit is not as high as the decrease in sales. SMB outstanding credit in 2019 decreased by 6.19%. Such decline was due to the economic slowdown which had an impact on the declining performance of businesses, resulting to constraints in the absorption of financing capacity.

Such condition had also made an impact on the Non-Performing Loans (NPL) of the SMB unit, which rose by 0.41 basis points, or approximately 10.10%, from 4.06% in 2018 to 4.47%.

In terms of target, the SMB unit was able to achieve 87% of the target for loan disbursement of Rp31.13 trillion. Details of targets, realization, differences, and achievements of the SMB unit are presented in the following table.

## Commercial Unit

Throughout 2019, the Commercial unit disbursed loans amounting to Rp3.3 trillion, 45.38% lower than the achievement of 2018 which amounted to Rp6.1 trillion. Nevertheless, the decline in outstanding commercial credit is not as high as a decrease in sales. Outstanding Commercial credit in 2019 decreased by 6.5%. Such decline is due to the non-aggressive business world amidst the slowing-down of economic growth.

Such condition has also affected the Commercial unit's Non Performing Loan (NPL) which was recorded at 3.78% in 2019, increasing by 1.22 basis points from the 2018 NPL of 2.66%.

In terms of target, the Commercial unit was able to achieve 87% of the targeted loan disbursement of Rp25.50 trillion. Details of targets, realization, differences, and achievements of the Commercial unit are presented in the following table.

## Mikro

Selama tahun 2019, belum stabilnya perekonomian nasional dan gencarnya pemasaran kredit pemerintah (KUR) menjadi tantangan yang serius bagi segmen kredit Mikro.

Dalam mengantisipasi kondisi tersebut, Kredit Mikro Panin tetap menjaga pertumbuhan kredit dengan fokus penyaluran Kredit Mikro kepada debitur *existing* (Program *Top Up*), eks-debitur Mikro yang mempunyai *track record* baik dan kepada debitur baru dengan tetap memperhatikan prinsip kehati-hatian.

Mikro Panin secara berkesinambungan melakukan perbaikan proses internal melalui penerapan aplikasi *Sales Activity Report*. Hal ini dilakukan agar proses pemasaran kredit dan proses *monitoring* aktivitas *team sales* dapat dilakukan secara lebih efektif dan efisien.

Untuk menjaga kualitas portofolio Kredit, Mikro Panin melakukan *monitoring* yang ketat terhadap kualitas kredit secara *realtime* menggunakan aplikasi Mobile Collection. Dengan penerapan aplikasi tersebut, proses penanganan debitur (*maintan*, *reminder* dan penagihan) dan *monitoring* aktivitas *team collection* dapat dilakukan secara lebih efektif dan efisien. Selain itu, Kredit Mikro juga melakukan restrukturisasi kredit untuk membantu debitur yang mengalami penurunan kemampuan pembayaran, penyelesaian kredit bermasalah dengan negosiasi bersama debitur dan penjualan aset.

Sepanjang tahun 2019, unit mikro menyalurkan kredit sebesar Rp433 miliar, turun 5,3% dari capaian 2018 yang sebesar Rp457 miliar. Penurunan ini disebabkan oleh perlambatan ekonomi secara nasional dan maraknya pemasaran Kredit Usaha Rakyat (KUR) dengan tingkat suku bunga yang lebih rendah yaitu sebesar 7% p.a.

Berbeda dengan SMB dan komersial, *Non Performing Loan* (NPL) unit mikro 2019 justru turun 0,15 poin atau sebesar 12,30% menjadi 1,07% dari posisi 2018 yang sebesar 1,22%.

Sementara itu, dari sisi target, unit mikro mampu membukukan realisasi dari target penyaluran kredit sebesar 95,2% dari target senilai Rp936,7 miliar. Berikut uraian target, realisasi, selisih, dan pencapaian unit Kredit Mikro yang tersaji dalam tabel berikut.

### Target, Realisasi, dan Pencapaian Unit Mikro

Target, Realization, and Achievement of Micro Unit

(Rp miliar | Rp billion)

| Uraian | Target | Realisasi<br>Realization | Pencapaian<br>Growth | Description |
|--------|--------|--------------------------|----------------------|-------------|
| Mikro  | 936,7  | 891,6                    | 95,2%                | Mikro       |

## Micro

During 2019, the unstable national economy and the aggressive marketing of government credit (People's Business Credit/KUR) have served as serious challenges for the Micro credit segment.

In anticipation of these conditions, Panin Micro Credit continues to maintain its credit growth with a focus on channeling micro credit to existing debtors (Top Up Program), ex-debtors with good track record, and also new debtors with due regard to the prudent principle.

Panin Micro Credit has continuously made improvements in its internal processes by installing the Sales Activity Report application. This is designed so that the credit marketing process and the monitoring process of the sales team activities can be conducted in a more effective and efficient manner.

To maintain the quality of credit portfolio, Panin Micro Credit conducts strict monitoring of credit quality in real-time basis using the Mobile Collection application. With the application, the process of handling debtors (maintenance, reminder and billing) and monitoring the collection team activities can be conducted more effectively and efficiently. In addition, Panin Micro Credit also conducts credit restructuring to assist debtors experiencing a decline in their ability to repay, as well as settling non-performing loans by negotiating with debtors and selling their assets.

Throughout 2019, the Panin Micro Credit unit distributed loans amounting to Rp433 billion, decreasing by 5.3% from 2018 amounting to Rp457 billion. Such decrease is due to the national economic slowdown and the emerging marketing of People's Business Credit (KUR) with lower interest rates at 7% p.a.

In contrast to SMB and Commercial unit, the Non Performing Loan (NPL) of the Panin Micro Credit unit in 2019 dropped by 0.15 basis points, or by 12.30%, to 1.07% from 1.22% in 2018.

Meanwhile, in terms of target, the Panin Micro Credit unit was able to achieve 95.2% of the targeted lending of Rp936.7 billion. Details of targets, realization, differences, and achievements of the Panin Micro Credit unit are presented in the following table.

## Rencana Strategis 2020

Pada tahun 2019, seiring dengan perlambatan pada kinerja perekonomian nasional, pertumbuhan kredit pun mengalami perlambatan dibandingkan tahun sebelumnya. Kondisi ini menjadi perhatian serius bagi segmen Perbankan Komersial.

Untuk mengantisipasi dampak dari kondisi tersebut, pada tahun 2020 Perbankan Komersial telah menyiapkan sejumlah strategi. Di antaranya adalah fokus pada debitur *existing* dengan meningkatkan kualitas relasi.

Selain itu, Bank juga akan mengawasi kualitas kredit yang disalurkan secara ketat. Tujuannya, agar kualitas kredit Bank tetap terjaga.

Terkait dengan kredit bermasalah, Bank akan fokus pada percepatan penyelesaian. Dengan demikian, secara umum kualitas kredit Bank semakin baik.

## 2020 Strategic Plan

In 2019, in line with the slowdown in national economy performance, credit growth also experienced a slowdown compared to prior year. Such condition represents a serious concern for the Commercial Banking segment.

To anticipate the impact of such conditions, in 2020 Commercial Banking has prepared a number of strategies. They include among others focusing on existing debtors by improving the quality of relations.

In addition, the Bank will also closely monitor the quality of loans being distributed. The goal is to maintain the quality of the Bank's credit.

As for the non-performing loans, the Bank will focus on accelerating the settlement process. In this way, the Bank's overall credit quality is expected to improve.

## Rencana Strategis 2020

Sebagai upaya untuk meningkatkan kinerja yang lebih baik di tahun 2020, utamanya peningkatan kredit, Bank akan senantiasa berusaha memahami kebutuhan nasabah dan juga menjaga hubungan dengan debitur-debitur Korporasi yang telah terjalin dengan baik. Strategi tersebut telah diterapkan sejak lama oleh Bank dan berhasil membawa pertumbuhan yang baik bagi kinerja kredit.

Perbankan Korporasi tetap selalu melakukan pemantauan secara cermat terhadap kondisi sektor-sektor usaha yang akan dibiayai guna meraih peluang penyaluran kredit pada sektor potensial dan meminimalisasi eksposur pada sektor yang berisiko tinggi.

Bank juga turut berperan aktif dalam mendukung perkembangan infrastruktur di Indonesia melalui penyediaan kredit sindikasi bagi proyek-proyek strategis nasional, seperti pembangunan jalan tol dan proyek kelistrikan. Partisipasi PaninBank dalam sindikasi pembiayaan proyek infrastruktur tetap memperhatikan *risk appetite*, posisi likuiditas serta permodalan dan pemilihan proyek yang dapat memperkuat bisnis inti.

Selain memberikan kredit, Perbankan Korporasi berupaya menyediakan solusi keuangan yang komprehensif untuk memenuhi berbagai kebutuhan sesuai profil debitur Korporasi. Peluang-peluang bisnis terus dikaji bersama, di antaranya dengan melakukan *cross selling* berbagai produk dan layanan keuangan PaninBank kepada nasabah Korporasi, termasuk layanan *corporate cash management* yang berperan dalam meningkatkan *fee-based income*. Meanwhile, interest income from the segment rose by 18.8% to Rp3.038 billion in 2019, from Rp2,557 billion in the previous year. Such increase was driven by the 15.07% increase in loan outstanding.

Such achievement contributed 19.83% to the total interest income of the Bank in 2019.

## 2020 Strategic Plan

To improve performance in 2020, especially in loan growth, the Bank will continuously strive to keep pace with the needs of customers as well as maintain well-established relationships with existing corporate debtors. Such strategy has been long implemented by the Bank and has been proven successful in driving loan growth.

Corporate Banking will continue to closely monitor the condition of the business sectors being financed in order to seize lending opportunities to prospective sectors while minimizing exposure in high-risk sectors.

The Bank also plays an active role in supporting infrastructure development in Indonesia through the provision of syndicated loans for national strategic projects, such as toll road construction and electricity projects. PaninBank's participation in the syndicated financing of infrastructure projects takes into account its risk appetite, liquidity and capital position, as well as selection of projects that can strengthen its core business.

In addition to loan disbursement, Corporate Banking strives to provide comprehensive financial solutions to meet the various needs of its Corporate debtors according to their respective profiles. The bank continue to review possible business opportunities, including through the cross selling of PaninBank's various financial products and services to Corporate customers, such as the corporate cash management service that play a role in increasing the Bank's fee-based income. In addition to fee-based income, Cash Management services are becoming increasingly important in increasing the amount of CASA funds, particularly through current accounts.

# INSTITUTIONAL BANKING & BUMN

Institutional and State-Owned Enterprise Banking

## Perbankan Institusional dan BUMN fokus terhadap penyaluran kredit kepada perusahaan pembiayaan (*multifinance*) yang dimiliki oleh Bank dan/atau Agen Tunggal Pemegang Merek (ATPM) otomotif. ### Strategi dan Fokus Tahun 2019

Tahun 2019 merupakan tahun yang menantang bagi Bank, termasuk bagi Perbankan Institusional dan BUMN. Perlambatan terjadi di sejumlah roda perekonomian mulai

Throughout 2019, the products and services offered in the Institutional and State-Owned Enterprise (SOE) Banking segment are divided into two categories, which are grouped based on their debtors, namely corporations (non-SOE) and SOE Group. Meanwhile, investment loans are intended to finance long-term investment projects that are strategic for national economy development.

### Strategy and Focus in 2019

The year of 2019 was a challenging year for the Bank, including for Institutional and SOE Banking. The slowdown was noted in a number of economic activities ranging from the postponement of central and regional government

## Institutional and State-Owned Enterprise Banking

dari penundaan belanja pemerintah pusat dan daerah akibat adanya pemilu serentak dan juga mengakibatkan pelaku usaha menahan investasi dan ekspansinya.

Bank juga dihadapkan pada lesunya pasar properti dan otomotif sehingga mendorong penurunan kinerja perusahaan pembiayaan. Hal-hal tersebut berdampak langsung pada melambatnya pertumbuhan permintaan kredit.

Sebagai upaya mengatasi kendala tersebut, Perbankan Institusional dan BUMN telah menetapkan sejumlah strategi dan fokus. Pada tahun 2019, Bank fokus terhadap penyaluran kredit kepada perusahaan pembiayaan (*multifinance*) yang dimiliki oleh Bank dan/atau Agen Tunggal Pemegang Merek (ATPM) otomotif. Hal itu dilakukan dalam rangka menjaga kualitas kredit.

Bank juga menyasar BUMN yang bergerak di infrastruktur jalan tol. Hal itu dilakukan dengan berpartisipasi dalam kredit sindikasi yang membiayai investasi infrastruktur jalan tol yang dikelola oleh debitur yang tergabung dalam BUMN Group.

Untuk mendukung kinerja, Bank senantiasa mengembangkan kompetensi dan kapasitas sumber daya manusia (SDM). Hal itu, antara lain dengan aktifnya SDM Perbankan Institusional dan BUMN menghadiri forum dan diskusi ekonomi, terutama kajian sektor lembaga keuangan sehingga bisa menambah wawasan yang diharapkan dapat menciptakan peluang usaha dan inovasi ke depannya.

**Kinerja Tahun 2019**

Hingga berakhirnya tahun buku 2019, kredit Perbankan Institusional dan BUMN tercatat sebesar Rp24,0 triliun, mengalami penurunan sebesar 8,75% dari realisasi tahun 2018 yang sebesar Rp26,3 triliun. Hal ini terjadi karena terjadi penurunan pada segmen kredit modal kerja.

Sementara dari jenis kredit yang disalurkan, kredit investasi mengalami pertumbuhan signifikan, yakni sebesar 139,27%, menjadi Rp2,1 triliun dari posisi tahun 2018 yang sebesar Rp881 miliar. Sedangkan kredit modal kerja mengalami penurunan 13,78% menjadi Rp21,9 triliun dari realisasi tahun 2018 yang sebesar Rp25,4 triliun.

Kenaikan penyaluran kredit investasi merupakan akibat dari mulai meningkatnya utilisasi kredit ke infrastruktur jalan tol seiring dengan progres konstruksi pembangunan jalan tol yang cukup pesat. Meskipun demikian, porsi kredit modal kerja masih lebih besar dari pada kredit investasi.

Adapun rincian penyaluran masing-masing jenis kredit tersebut terangkum dalam tabel berikut ini:

spending due to simultaneous elections which also resulted in delays for business players in conducting their investment and expansion.

The Bank is also exposed to sluggish property and automotive markets, thereby driving down the performance of multi-finance companies. These factors have a direct impact on the declining demand for loans.

To overcome such obstacles, Institutional and SOE Banking have established a number of strategies and focus. In 2019, the Bank focuses on lending to multi-finance companies owned by Banks and/or automotive sole agents (ATPM). These measures are taken in order to maintain credit quality.

The Bank also lend to SOEs engaged in toll road infrastructure. This was achieved by participating in syndicated loans that finance toll road infrastructure investment managed by debtors who are members of the SOE Group.

To support its performance, the Bank continues to develop its HR competencies and capacities. Such development is conducted by, among others, the active involvement of personnel of Institutional and SOE Banking in attending economic forums and discussions, particularly studies of the financial institution sector so as to receive insight that is expected to create business opportunities and innovations in the future.

**2019 Performance**

As of the end of fiscal year 2019, loans in the Institutional and SOE Banking are recorded at Rp24.0 trillion, a decrease of 8.75% from the realization in 2018 of Rp26.3 trillion. Such decrease was due to a decline in the working capital loan segment.

As for the types of loans disbursed, investment loans experienced significant growth at 139.27% to Rp2.1 trillion from Rp881 billion in 2018. While working capital loans decreased by 13.78% to Rp21.9 trillion from the realization in 2018 amounting to Rp25.4 trillion.

The increase in investment credit disbursement is due to the increase in the utilization of credit to the toll road infrastructure in line with the rapid progress in toll road construction. Nevertheless, the portion of working capital loans is still higher than investment loans.

The details of the distribution for each type of loans are summarized in the following table:

Besides being one of the Bank's business units, the Treasury also plays an important role in maintaining the Bank's liquidity. In discharging this function, Treasury manages market risks which include exchange rate risk, interest rate risk, and liquidity risk, which arise from the Bank's balance sheet position. Management of these risks always complies with applicable rules and regulations.

In carrying out its functions, Treasury is divided into three business divisions namely Liquidity Division (DLI), Capital Market Division (DCM), and Currency Trading and Commercial (DCC) Division. The DLI is responsible for liquidity management as well as being a profit center. The DLI also maintain the Bank's Statutory Reserves (GMW) at optimum levels throughout the fiscal year and ensures that the Bank's liquidity ratios meet the requirement in accordance with applicable regulations.

Kemudian, DLI menyelenggarakan pinjaman/penempatan antarbank, transaksi *reverse repo* dan *repo* surat berharga, memanfaatkan fasilitas penempatan dan pinjaman dana yang disediakan oleh Bank Indonesia serta melakukan penyesuaian suku bunga produk deposito berjangka.

Dalam menjalankan tugasnya, DCM secara aktif melakukan transaksi jual dan beli di pasar modal, khususnya surat-surat berharga yang diterbitkan oleh negara dan institusi atau korporasi. Jenis surat berharga tersebut tidak terbatas pada jenis konvensional saja akan tetapi juga dalam jenis syariah. Begitu pun dengan mata uang, tidak hanya IDR akan tetapi juga surat berharga yang berdenominasi USD dan EURO.

Selain itu, keunggulan Bank lainnya ialah penawaran harga jual dan harga beli yang sangat kompetitif dengan biaya penyimpanan yang sangat minim.

Selanjutnya, pada tahun 2019, DCC melanjutkan peningkatan aktivitas transaksi valuta asing dengan fokus pada produk konvensional seperti yang sudah dilakukan di tahun-tahun sebelumnya. Transaksi tersebut antara lain transaksi *spot* dan produk lindung nilai seperti *forward* dan *swap*.

Dalam rangka meningkatkan basis nasabah dan *volume* transaksi, DCC menjalin kerja sama dengan unit-unit kerja di lingkungan organisasi Bank melalui penyediaan fasilitas valuta asing sesuai kebutuhan secara otomatis kepada nasabah korporasi, komersial, eksportir, importir, serta pemilik dana yang memiliki kebutuhan valuta asing. Peningkatan layanan transaksi valas terus dilakukan oleh DCC melalui *internet banking* dan *mobile banking* sehingga dapat memberikan kuotasi harga secara *real time* di seluruh cabang di Indonesia.

Further, the DLI conducts interbank loans/placements, reverse repo and securities repo transactions, utilizes placement and loan facilities provided by Bank Indonesia and adjusts interest rates for time deposit products.

In carrying out its duties, the DCM actively conducts sale and purchase transactions in the capital market, especially securities issued by the state and institutions or corporations. The types of securities traded are not limited to conventional types but also the sharia securities. Likewise in terms of currencies, the securities is denominated not only in IDR but also in USD and EURO.

In addition, PaninBank is also a market maker that carries out functions in accordance with the government's assignment to the Bank as the primary dealer for both conventional Government Bonds and also Islamic Government Bonds.

The customer can choose various types of securities, investment period and return, and risk according to each customer's risk profile. In addition, the Bank also has another advantage namely offering very competitive trading prices with very minimal deposit fee.

Meanwhile, in 2019, the DCC continued to increase foreign exchange transaction activities with a focus on conventional products as has been done in previous years. These transactions include spot transactions and hedging products such as forwards and swaps.

In order to increase the customer base and transaction volume, DCC cooperates with work units within the Bank's organizational environment by automatically providing foreign exchange facilities as needed, to corporate, commercial, exporter, importer, and fund owners who need to have foreign exchange. The DCC continues to improve foreign exchange transaction services through internet banking and mobile banking so that it can provide real-time price quotations in all branches in Indonesia.

PaninBank is also continuously increasing transactions through branch offices in several major cities, such as Jakarta, Surabaya, Medan, Batam, Pangkal Pinang, Serang, Semarang and Bandung as an effort to add new foreign exchange customers.

## Strategi dan Fokus Tahun 2019

Pada tahun 2019, Tresuri dihadapkan pada kondisi perlambatan ekonomi dunia akibat perang dagang Amerika Serikat dengan Tiongkok. Kemudian, turunnya suku bunga oleh bank sentral di berbagai belahan dunia untuk mendorong pertumbuhan ekonomi, sehingga memicu pelemahan mata uang di masing-masing negara. Kondisi semakin berat dengan kebijakan Bank Indonesia untuk *monitoring* secara ketat pasar USD/IDR.

Mengacu pada kondisi tersebut, Tresuri memiliki fokus yakni meningkatkan *fee based income* yang diikuti dengan peningkatan kualitas sumber daya manusia (SDM). Oleh karena itu, Bank telah menyiapkan sejumlah strategi untuk mencapai fokus tersebut, baik dari segi diferensiasi produk, perluasan basis nasabah, SDM hingga pemanfaatan teknologi informasi.

Dari sisi produk, Bank meningkatkan *proprietary trading* dan mengembangkan produk aktivitas baru lindung nilai seperti *Domestic Non Delivery Forward* (DNDF), *Cross Currency Swap* (CCS) dan *Option* sebagai alternatif *hedging* bagi nasabah. Untuk memperluas basis nasabah, Bank memperluas kerja sama dengan BUMN dan korporasi.

Dalam rangka peningkatan SDM Tresuri, Bank memberi kesempatan untuk mengikuti pelatihan *technical analysis* dan *structure product*. Selain itu, Bank juga menggelar pelatihan di kantor cabang. Hal tersebut ditujukan agar semua SDM dapat memahami karakteristik produk dan risiko-risiko yang terkait dengan bisnis Tresuri, serta regulasi mengenai produk dan jasa yang ditawarkan,

Bank juga senantiasa berkomitmen untuk memenuhi persyaratan SDM sebagai pelaku transaksi Tresuri, yang ditandai dengan dimilikinya sertifikasi tresuri, sesuai dengan tingkatan masing-masing SDM. Selain itu, SDM Tresuri PaninBank juga sudah menjadi anggota asosiasi seperti yang diamanatkan oleh regulator.

Dengan berbagai peningkatan kompetensi tersebut, diharapkan seluruh SDM Tresuri termasuk tenaga pemasar dapat melakukan edukasi dan memasarkan produk kepada para nasabah dan calon nasabah. Bank juga melakukan penambahan SDM *dealer* di Divisi *Currency Trading and Commercial* sebagai upaya peningkatan pelayanan bagi nasabah.

Selain dari sisi SDM, Bank juga melakukan peningkatan layanan dengan memanfaatkan teknologi informasi untuk mendukung otomatisasi transaksi valuta asing, sehingga dapat memberikan harga yang *up to date* kepada nasabah. Otomatisasi transaksi juga membuat proses penyelesaian transaksi lebih cepat, akurat dan terukur, sehingga memudahkan pelaksanaan *monitoring*, proses yang efisien serta mitigasi

## Strategy and Focus in 2019

In 2019, Treasury has to face the world economy slowdown due to trade war between the United States and China. Then, the decline in interest rates by central banks in various parts of the world to encourage economic growth, has triggered the weakening of currencies in each country. The condition is getting increasingly severe with Bank Indonesia policy to closely monitor the USD/IDR market.

To cope with these conditions, Treasury focuses on increasing fee-based income and improving the quality of human resources (HR). To that end, the Bank has prepared a number of strategies to achieve this focus, both in terms of product differentiation, expansion of the customer base, HR, as well as the utilization of information technology.

In terms of product, the Bank enhances proprietary trading and develops new hedging products such as Domestic Non-Delivery Forward (DNDF), Cross Currency Swap (CCS) and Option as an alternative hedging for customers. To expand the customer base, the Bank is expanding cooperation with SOEs and corporations.

In order to improve the competences of Treasury personnel, the Bank provides opportunities for them to attend training in technical analysis and structured product. In addition, the Bank also held training sessions at the branch offices. The purpose is to equip all human resources with knowledge of treasury product characteristics and risks associated with the Treasury business, as well as regulations regarding the products and services offered.

The Bank is also committed to fulfilling the professional qualification of Treasury personnel conducting treasury transactions, which is marked by the possession of treasury certification in accordance with the level of each respective personnel. In addition, PaninBank Treasury personnel have also become members of the association as mandated by the regulator.

With these various competency enhancement, the Bank expects all Treasury personnel, including sales teams, to be able to educate and to market their products to customers and prospective customers. The Bank also assign additional dealer personnel in the Currency Trading and Commercial Division as an effort to improve services for customers.

Aside from the HR aspect, the Bank also improves its services by utilizing information technology to support the automation of foreign exchange transactions, so as to provide up-to-date prices to customers. Transaction automation helps accelerating the transaction settlement process, and making it more accurate and measurable, as well as making it easier to carry out monitoring, efficient process and mitigation of

risiko *fraud*. Dengan proses yang efisien, maka dapat memberi kesempatan yang lebih banyak kepada *dealer* kantor cabang untuk melakukan edukasi dan meningkatkan pemasaran kepada nasabah.

Selain itu, teknologi informasi juga dimanfaatkan oleh Bank untuk memperoleh informasi harga dan perkembangan pasar terkini di dalam negeri dan luar negeri yang diperlukan dalam menentukan strategi *trading*. Kemudian, juga untuk menyampaikan harga produk-produk Tresuri ke seluruh cabang Bank secara *real time* sehingga dapat memberikan harga yang lebih kompetitif.

## Kinerja Tahun 2019

Hingga berakhirnya tahun 2019, *fee based income* Tresuri mencapai Rp231,7 miliar, naik 16,67% dari capaian tahun 2018 yang sebesar Rp198,6 miliar. Kenaikan tersebut disebabkan naiknya Keuntungan bersih penjualan efek, sejalan dengan membaiknya harga Surat-surat Berharga pada tahun 2019 ditengah tren penurunan suku bunga, serta peningkatan transaksi valuta asing.

Jika dibandingkan dengan target yang telah ditetapkan oleh Bank, realisasi *fee based income* Tresuri tahun 2019 sebesar 189,85% dari target sebesar Rp122,0 miliar.

## 2019 Performance

As of the end of 2019, Treasury fee-based income reached Rp231.7 billion, up 16.67% from the achievement in 2018 of Rp198.6 billion. **KINERJA LABA RUGI****Pendapatan**

Sesuai dengan Visi Misi Bank, maka Bank terus memfokuskan diri untuk menggarap segmen komersial dan ritel. Segmen ini dipercaya memiliki risiko yang lebih kecil karena adanya diversifikasi dari profil masing-masing debitur. Kedua sektor ini secara konsolidasi menyumbang kontribusi lebih dari 50% atas total pendapatan. Sementara untuk segmen korporasi dan Financial Institution masing-masing menyumbang 15%-20%, sisanya dari Surat Berharga.

**PROFIT OR LOSS****Revenues**

In accordance with the Bank's Vision and Mission statements, the Bank continues to focus on working on the commercial and retail segments. This segment is believed to have a smaller risk because of the diversification of each debtor's profile. These two sectors on a consolidated basis contributed more than 50% of total revenue. While for the corporate and Financial Institution segments each contributed 15%-20%, and the rest came from Securities.

In terms of loan distribution by Economic Sector, the Bank continues to focus on lending to the Trading sector due to the flexibility of the sector. The potential for non-performing loan from this sector is considered small because of the high correlation between sales turnover and the level of loan utilization as Working Capital, making it easier for the Bank to monitor debtor performance. Bank lending to the Trading sector reached more than 18% in 2019.

## Suku Bunga Dasar Kredit

Otoritas mengamanatkan melalui Peraturan Otoritas Jasa Keuangan Nomor 32/POJK.03/2016 tentang Transparansi dan Publikasi Laporan Bank, mewajibkan seluruh bank umum untuk untuk melaporkan dan mempublikasikan Suku Bunga Dasar Kredit (SBDK). Publikasi tersebut ditujukan untuk memberikan kejelasan dan memudahkan nasabah dalam menimbang manfaat serta biaya dan risiko kredit yang ditawarkan. Selain itu, SBDK juga merupakan upaya peningkatan tata kelola perusahaan yang baik dan sebagai bentuk tanggung jawab sosial Bank terhadap konsumen serta mendorong persaingan yang sehat dalam industri perbankan.

SBDK digunakan sebagai dasar penetapan suku bunga kredit yang akan dikenakan oleh Bank kepada nasabah. Kendati demikian, sebagai catatan, SBDK belum memperhitungkan komponen estimasi premi risiko yang besarnya tergantung dari penilaian Bank terhadap risiko masing-masing debitur atau kelompok debitur. Dengan demikian, besarnya suku bunga kredit yang dikenakan kepada debitur belum tentu sama dengan SBDK.

SBDK di PaninBank, dikelompokkan berdasarkan segmentasi kredit menjadi empat kelompok, yaitu kredit korporasi, kredit ritel, kredit mikro, dan kredit konsumsi. Bank senantiasa meninjau ulang dan memperbaharui SBDK sesuai dengan pergerakan suku bunga acuan BI 7-Day Repo Rate.

## Prime Lending Rate

PaninBank has published the Prime Lending Rate (SBDK) in Rupiah as stipulated in OJK Regulation Number 32/POJK.03/2016 concerning Transparency and Publication of Bank Reports. The provisions of the legislation regarding transparency of bank product information and the use of personal data of customers are then regulated in more detail in OJK Circular Letter Number 34/SEOJK.03/2017. Information on the prime lending rate at any time can be seen in publications at every bank office and/or the Bank's website [www.panin.co.id](http://www.panin.co.id).

The Bank uses the Prime Lending Rate (SBDK) as the basis for determining the loan interest rates to be charged to customers. Prime lending rate does not take into account the estimated risk premium component, the amount of which depends on the bank's assessment of the risk of each debtor or group of debtors. Therefore, the amount of credit interest rates charged to debtors is not necessarily the same as the prime lending rate.

The bank grouped the SBDK on the basis of loan segmentation into four groups, namely corporate loan, retail loan, micro loan and consumer loan. The Bank regularly reviews and updates its prime lending rate in accordance with the BI 7-Day Repo Rate interest rate movement.

Informasi SBDK yang berlaku setiap saat dapat dilihat pada publikasi di setiap kantor dan/atau *website* PaninBank yakni [www.panin.co.id](http://www.panin.co.id)

## Kemampuan Membayar Utang

Bank terus menjaga untuk dapat memenuhi kewajiban, baik kewajiban jangka pendek dan kewajiban jangka panjang dengan berbagai upaya dan strategi yang telah disusun, salah satunya adalah dengan menjaga fundamental keuangan dalam kondisi yang solid. Kemampuan itu diukur melalui beberapa rasio, antara lain rasio likuiditas, rasio rentabilitas dan rasio solvabilitas.

### Kemampuan Membayar Utang Jangka Pendek

Bank telah menyusun rencana pendanaan darurat (*contingency funding plan*) sebagai persiapan mitigasi jika terjadi krisis. Bank terus berupaya memastikan bahwa setiap kebutuhan likuiditas dan pendanaan untuk saat ini dan untuk masa yang akan datang dapat terpenuhi, baik dalam kondisi pasar normal maupun krisis. Oleh karena itu, Bank mengelola risiko likuiditas dengan prinsip kehati-hatian dengan memastikan kecukupan dana secara tepat waktu dari berbagai sumber dana yang tersedia, termasuk memastikan ketersediaan aset likuid berkualitas tinggi.

Pada tahun 2019, Bank memilih untuk menjaga stabilitas kinerja keuangan serta melanjutkan perbaikan struktur biaya dana (*cost of fund*) dan efisiensi operasional. PaninBank melanjutkan Program Panin Super Bonanza, Panin Super Prize, dan meluncurkan Program *member-get-member* (MGM) untuk mendorong ekspansi ke pangsa pasar ritel yang lebih luas. Upaya perbaikan rasio CASA (*current account saving account*) PaninBank membuahkan hasil dengan meningkatnya CASA dari 38,12% pada tahun 2018 menjadi 39,17% pada tahun 2019. Sementara untuk posisi konsolidasian pada 2019 tercatat sebesar 37,15% dari posisi tahun sebelumnya 36,96%.

Upaya perbaikan struktur biaya dana memberikan dampak pada Rasio Kredit terhadap Simpanan Nasabah (*Loan to Deposit/LDR Ratio*) yang meningkat dari 104,15% pada 2018 menjadi 107,92% pada 2019 untuk PaninBank. Sementara itu, secara konsolidasi menjadi 115,26% pada 2019 dari 110,07% posisi tahun 2018.

Meski begitu, kenaikan tersebut masih dalam level yang wajar. Rasio pemenuhan likuiditas (*Liquidity Coverage Ratio/LCR*) baik untuk PaninBank maupun konsolidasian relatif tinggi yang mana pada tahun 2019 masing-masing mencapai 149,59% dan 130,61%. Sementara itu, pemenuhan Rasio Pendanaan Stabil Bersih (*Net Stable Funding Ratio/NSFR*) juga tinggi, yaitu masing-masing tercatat 137,41% dan 129,52%.

Manajemen senantiasa melakukan pemantauan terhadap parameter risiko likuiditas di antaranya *maturity gap* pada posisi likuiditas, analisis berkala *behavioral liquidity*, *stress testing*, *buffer liquidity* dan mengimplementasikan perhitungan *Liquidity Coverage Ratio* (LCR) dari OJK.

## Debt Paying Ability

The Bank ensures at all time its ability to fulfill all obligations, both long-term and short-term obligations, through a variety of strategies and measures, including by maintaining solid financial fundamentals. This ability is measured through several ratios, including liquidity ratios, solvency ratios, and profitability ratios.

### Short-term Debt Paying Ability

The Bank has prepared a contingency funding plan as a mitigation measure in the event of a crisis. The Bank always strives to ensure that all current and future liquidity and funding needs can be fulfilled, both in normal and crisis market conditions. The Bank manages liquidity risk prudently by ensuring sufficient funds in fulfilling timely liabilities from various available sources of funds, including ensuring the availability of high quality liquid assets.

In 2019, the Bank opted to maintain financial stability and continue with the strategy to improve the structure of the cost of funds as well as operational efficiency. PaninBank continued with the Panin Super Bonanza and Panin Super Prize programs, and launched a Member-get-Member (MGM) program to expand penetration into the retail market. The strategy succeeded in making the CASA ratio increased from 38.12% in 2018 to 39.17% in 2019. In a consolidated basis, the respective positions were 37.15% in 2019 and 36.96% in the previous year.

Initiatives to improve the cost of fund structure have led to Loan to Deposit Ratio (LDR) increasing from 104.15% in 2018 to 107.92% in 2019 for PaninBank. In a consolidated basis, LDR increased to 115.26% in 2019, from 110.07% in 2018.

However, the increase in LDR was still within acceptable levels. The Liquidity Coverage Ratio (LCR), for PaninBank only and in a consolidated basis, were relatively high in 2019, at 149.59% and 130.61%, respectively. Meanwhile, the Net Stable Funding Ratio (NSFR) were also high at 137.41% and 129.52% respectively.

Management always monitors the parameters of liquidity risk, including the maturity gap in the position liquidity, periodic analysis of behavioral liquidity, stress testing, buffer liquidity, and implementing the calculation of Liquidity Coverage Ratio (LCR) from the Financial Services Authority (OJK).

### Long-Term Debt Paying Ability (Solvability)

The company measures solvability through the capital ratio that is maintained at optimal levels. The position of the capital adequacy ratio (CAR) was recorded at 23.49% at the end

Minimum/KPMM (Capital Adequacy Ratio/CAR) PaninBank tercatat sebesar 23,49% pada akhir tahun 2018 dan meningkat menjadi 24,07% pada akhir tahun 2019. Rasio tersebut secara konsolidasian juga meningkat dari 23,33% pada tahun 2018 menjadi 23,41% pada tahun 2019.

Angka tersebut lebih tinggi dibandingkan dengan KPMM bank umum pada akhir Desember 2019, yang berada pada level 23,40%. KPMM PaninBank juga lebih tinggi dari prasyarat sebesar 18,5% untuk bank yang masuk kategori sistemik (*Domestically Systemic Important Bank/DSIB*).

Dengan tingkat permodalan tersebut, Bank memiliki kapabilitas untuk memitigasi risiko pasar, risiko kredit, maupun risiko operasional. Kondisi tersebut juga menunjukkan bahwa Bank telah mengelola dengan baik modal Bank dan mempunyai kecukupan modal untuk melindungi dari risiko solvabilitas.

### Rentabilitas

Dalam upaya perbaikan struktur biaya dana, PaninBank berhasil menekan dampaknya terhadap Margin Bunga Bersih (*Net Interest Margin/NIM*). NIM PaninBank tercatat sebesar 4,63% pada tahun 2019 atau sedikit lebih tinggi dari tahun sebelumnya yang sebesar 4,61%. Sementara itu, untuk konsolidasian mengalami penurunan, yaitu dari 4,84% pada tahun 2018 menjadi 4,83% pada tahun 2019.

Meskipun begitu, optimalisasi biaya dana berimbas pada Laba terhadap Aset (*Return on Asset/ROA*) dan Laba terhadap Ekuitas (*Return on Equity*) tahun 2019 yang masing-masing sebesar 2,09% dan 9,15% untuk PaninBank serta 2,08% dan 8,90% untuk konsolidasian.

Sebagai perbandingan, kedua rasio tersebut pada tahun sebelumnya tercatat masing-masing 2,25% dan 10,10% untuk PaninBank serta 2,16% dan 9,23% untuk konsolidasian. Bank berhasil memperbaiki efisiensi sebagaimana tercermin dari Rasio Beban Operasional Terhadap Pendapatan Operasional (BOPO) yang turun dari 78,27% pada tahun 2018 menjadi 77,96% posisi tahun 2019.

### Kolektibilitas Kredit

Di tengah perekonomian yang kurang kondusif, Bank terus mengedepankan prinsip kehati-hatian dalam penyaluran kredit. Kredit macet (*Non Performing Loan/NPL*) dijaga pada level di bawah 5% sesuai ketentuan regulator dengan *risk appetite* di kisaran 3%. NPL, baik untuk PaninBank maupun secara konsolidasi tercatat sebesar 3,02% pada akhir tahun 2019.

Bank juga mengimplementasikan berbagai model yang dibangun sesuai dengan standar regulasi Indonesia maupun *best practice* internasional. Bank melakukan pengembangan model secara mandiri maupun bekerja sama dengan pihak ketiga. Implementasi tersebut mencakup model *rating* seperti *Internal Credit Risk Rating* (ICRR) dan model *scoring*. Selain

of 2018, and increased to 24.07% by the end of 2019. On a consolidated basis, the ratio also increased from 23.33% in 2018 to 23.41% in 2019.

This number is higher compared to the average CAR of commercial banks as at end of December 2019, which stood at 23.40%. The Bank's CAR is also higher than the prerequisite of up to 18.5% for banks that are included in the systemic (*Domestically Systemic Important Bank/DSIB*) category.

The Bank's capital structure has the capability to offset market risk, credit risk and operating risk. This means that the Bank has managed the Bank's capital well, and has sufficient capital to protect it from solvency risk.

### Profitability

With efforts to improve the structure of its cost of funds, PaninBank successfully reduced the impact on the Bank's Net Interest margin (NIM). The Bank's NIM was 4.63% in 2019, slightly higher than the previous year at 4.61%. On a consolidated basis, NIM declined from 4.84% in 2018 to 4.83% in 2019.

However, the optimization of cost of funds have an impact on the Bank's Return on Asset (ROA) and Return on Equity (ROE) in 2019, which were 2.09% and 9.15%, respectively, for PaninBank only, and 2.08% and 8.90%, respectively, on a consolidated basis.

In comparison, the two ratios in the previous year were 2.25% and 10.10%, respectively, for PaninBank only and 2.16% and 9.23%, respectively, on a consolidated basis. The Bank has been successful in improving efficiency as shown in the ratio of operating expenses to operating income (BOPO), which declined from 78.27%.

### Loan Collectibility

In the midst of economic conditions that are not yet conducive, the Bank continues to prioritize the principle of prudence in lending. Non-Performing Loans (NPLs) are maintained at levels below 5% in accordance with regulators with a Risk Appetite of around 3%. NPL, for PaninBank only and on a consolidated basis, was recorded at 3.02% at the end of 2019.

The Bank implements various models that are built in accordance with the regulatory standards in Indonesia as well as international best practices. The Bank develops the model independently and cooperates with third parties. The implementation includes rating models such as *Internal Credit Risk Rating* (ICRR) and scoring models. In addition,

itu, Bank secara berkala melakukan upaya yang diperlukan untuk menyempurnakan model tersebut.

Pengelolaan risiko kredit yang lebih spesifik juga dilakukan oleh Bank atas portofolio kredit maupun eksposur risiko kredit lain yang bermasalah. Upaya yang dilakukan di antaranya adalah dengan merestrukturisasi fasilitas kredit yang bermasalah, pembentukan pencadangan untuk menutup potensi kerugian, hingga pelaksanaan hapus buku. Proses pengelolaan kredit bermasalah telah diatur secara tersendiri dalam kebijakan yang bersifat khusus, termasuk pembentukan unit kerja khusus yang menanganinya.

the Bank also makes the periodical necessary efforts to perfect the model.

More specific management of credit risk is also carried out on the credit portfolio and other problematic credit risk exposures. Efforts include the restructuring of non-performing loan facilities, the establishment of reserves to cover potential losses, and the implementation of write-offs. The process of managing non-performing loans has been regulated separately in specific policies, including the establishment of special work units that handle them.

## TARGET, REALISASI DAN PROYEKSI

### Target dan Realisasi

Tekanan ekonomi sepanjang sembilan bulan pertama tahun 2019 berimbas pada kinerja perbankan. Kebijakan Bank Indonesia dan Otoritas Jasa Keuangan belum mampu mendorong penyaluran kredit secara signifikan.

Kondisi eksternal tersebut ikut mempengaruhi pencapaian kinerja PaninBank pada tahun 2019 yang secara umum masih belum sesuai ekspektasi. Meski begitu, Bank berhasil menjaga fundamental keuangan tetap solid dengan fokus pada permodalan yang kuat dan tercapainya *bottom line* Laba Bersih Rp3 triliun.

## TARGET, ACHIEVEMENT AND PROJECTION

### Target and Achievement

Economic pressure during the first nine-month period of 2019 have impacted on the Bank's performance. Policies by Bank Indonesia and the Financial Services Authority did not significantly help bank lending.

These external conditions are factors that affected the achievements of PaninBank in 2019 which in general is not up to expectations. However, the Bank successfully maintain a solid financial fundamental with a robust capital structure with a bottom line of Rp3 trillion.

**TINJAUAN KINERJA KEUANGAN**  
Overview of Financial Performance

Desember 2019 tersebut telah menyebar ke seluruh dunia. *Bloomberg Economic* memperkirakan dampak ekonomi dapat mencakup antara lain resesi di AS, kawasan Euro dan Jepang, pertumbuhan paling lambat di Tiongkok, hingga *output* yang hilang senilai USD2,7 triliun atau setara dengan seluruh produk domestik bruto (PDB) AS.

*Organisation for Economic Co-operation and Development* (OECD) memangkas ekspektasinya untuk pertumbuhan global menjadi 2,4% dari 2,9% dan memberikan peringatan kemungkinan bisa terkoreksi hingga ke level 1,5%. *International Monetary Fund* (IMF) juga menurunkan proyeksinya atas pertumbuhan ekonomi global, yang akan tumbuh kurang dari 2,9%, lebih rendah dari proyeksi sebelumnya yakni 3,3% dengan mempertimbangkan tensi perselisihan dagang AS dan Tiongkok.

Karena itu, kondisi ekonomi tahun depan tidak akan mudah, baik bagi Pemerintah maupun pelaku perbankan. Meskipun begitu, PaninBank akan tetap mengupayakan kinerja berjalan secara optimal, baik dalam penghimpunan dana pihak ketiga (DPK) maupun penyaluran kredit guna menopang pertumbuhan ekonomi Indonesia.

Target bisnis Bank tahun 2020 tetap berlandaskan pada upaya menjaga *bottom line* laba bersih Rp3 triliun. Indikator-indikator fundamental diarahkan pada kemampuan mitigasi risiko yang kuat di tengah prospek ekonomi yang cenderung masih spekulatif. Penyaluran kredit diproyeksikan tumbuh 3%-5%. Sementara itu, penghimpunan DPK tumbuh 6%-8%, dan aset tumbuh 3%-5%.

Untuk mencapai target-target tersebut, Bank terus mengupayakan tingkat efisiensi yang optimal, antara lain dengan mengevaluasi pos biaya yang kurang produktif dan mendorong penguatan jaringan kantor. Dengan perbaikan efisiensi, Bank optimistis dapat mewujudkan pertumbuhan laba bersih setelah pajak yang sama seperti tahun sebelumnya pada tahun 2020.

December 2019 have subsequently spread all over the world. According to *Bloomberg Economic*, the impact may include economic recession in the US, the Euro zone and Japan, the lowest growth ever in China, and lost output valued at USD2.7 trillion, or equivalent to the entire gross domestic product (GDP) of the US.

The Organization for Economic Cooperation and Development (OECD) revised down its expectation for global growth to 2.4%, from previously 2.9%, with a warning of the possibility of further downward correction to 1.5%. The International Monetary Fund (IM) also revised downward its projection for global economic growth to less than 2.9%, down from the previous projection of 3.3%, with consideration for the trade war tensions between China and the US.

Therefore, economic conditions next year will not be easy, both for the Government and players in the banking sector. Nevertheless, PaninBank will continue to strive to run optimally, both in terms of third party funds (DPK) and lending to support Indonesia's economic growth.

The Bank's business target for 2020 remains based on efforts to maintain a bottom line of Rp3 trillion in net profit. Fundamental indicators are directed at a strong risk mitigation ability amid economic prospects that tend to remain speculative. Lending is projected to grow by 3%-5%, with growth of third party funds growth and assets predicted at 6%-8% and 3%-5%, respectively.

To achieve these targets, the Bank continues to strive for optimal levels of efficiency, among others by evaluating cost items that are less productive and encouraging the strengthening of office networks. With efficiency improvements, the Bank is optimistic that in 2020, it can realize the same level of growth in net profit after tax as in the previous year.

## PROSPEK USAHA

Industri perbankan nasional masih sangat menarik untuk dikembangkan. Selain ekonomi Indonesia yang masih berpotensi terus tumbuh dengan demografi penduduk yang besar, tingkat margin bunga bersih perbankan Indonesia juga relatif masih tinggi. Kondisi tersebut tidak hanya menarik bagi investor dalam negeri akan tetapi juga investor asing. Hal tersebut ditandai oleh gencarnya aksi akuisisi bank oleh asing akhir-akhir ini.

Akses masyarakat terhadap sistem keuangan juga terus meningkat sebagaimana tercermin dari tingkat inklusi dan literasi keuangan. Data OJK dalam Survei Nasional Literasi Keuangan (SNLIK) tahun 2019 menyebutkan indeks literasi keuangan mencapai 38,03% dan indeks inklusi keuangan 76,19%. Dibandingkan dengan hasil survei yang sama di tahun 2016, angka tersebut meningkat dengan capaian masing-masing indeks sebesar 29,7% dan 67,8%.

Bisnis perbankan berkaitan erat dengan kondisi ekonomi. Bank Indonesia telah merevisi proyeksi pertumbuhan kredit tahun 2020 menjadi 9%-11% dari sebelumnya 10%-12%. Pertumbuhan ekonomi yang terdampak dari virus COVID-19 menjadi alasannya karena memberikan *supply shock* terhadap perekonomian. Skenario terburuk, hasil simulasi Bloomberg Economic menunjukkan ekonomi Indonesia bisa berkontraksi mendekati kondisi seperti krisis moneter 1998.

Namun, kondisi perekonomian Indonesia saat ini berbeda dengan saat krisis 1998. Berbagai indikator mencerminkan fondasi ekonomi yang lebih kokoh. Protokol penanganan krisis juga sudah terbangun dengan baik. Langkah-langkah antisipatif yang sudah dilakukan, baik dari pemerintah, otoritas moneter, maupun otoritas keuangan diharapkan dapat menahan ekonomi dari perlambatan yang lebih dalam.

Oleh karena itu PaninBank tetap optimistis dalam memandang prospek usaha. Bank akan mengoptimalkan penyaluran kredit, antara lain melalui sektor UMKM. Sektor UMKM merupakan segmen yang potensial dan menarik karena perputaran aset (*asset conversion cycle*) yang cepat serta tidak terdampak secara langsung oleh risiko perubahan

## BUSINESS PROSPECTS

The national banking industry continues to be attractive to be developed. Apart from the economy that continues to grow with a large population demographics, Indonesian banking sector's net interest margin level is also still relatively high. Not surprisingly, bank acquisitions by foreign investors have lately intensified.

Public access to the financial system also continues to be growing as reflected in the level of inclusion and literacy. The Financial Services Authority (OJK) Survey for 2019 shows the Financial Literacy Index and Financial Inclusion Index of 38.03% and 76.19%, respectively. These were higher compared to the results in the previous survey in 2016 of 29.7% and 67.8%, respectively.

The banking business is closely linked with economic conditions. Bank Indonesia has revised downwards its loan growth projections for 2020 to 9%-11% from a previous of 10%-12%. Economic growth is affected by the Coronavirus pandemic that brings a supply shock effect to the economy. In the worst scenario, simulations by Bloomberg Economic shows that Indonesia's economy may experience contractions similar to the condition during the 1988 monetary crisis.

However, the current condition of the Indonesian economy is different from the time of the 1998 crisis. Various indicators reflect a stronger economic foundation. The crisis management protocol has also been well developed. Anticipatory steps that have been taken, both from the government as well as the monetary and financial authorities, are expected to defend the economy from a higher slowdown.

Therefore, PaninBank remains optimistic about the business prospects. PaninBank will optimize loan disbursements through, among others, the MSME sector. The MSME sector is a potential and attractive segment. A number of conditions that makes loans in this segment attractive is the fast asset conversion cycle and is not directly affected by the risks

valuta asing. Kemudian, bahan baku industri pada kelompok ini umumnya tidak diimpor langsung oleh pelaku usaha akan tetapi melalui importir. Persediaan bahan baku bersifat jangka pendek guna keperluan produksi dan sesuai kapasitasnya.

Bank memiliki jaringan SMART Center dan Micro Center yang sudah berpengalaman melayani sektor UMKM. PaninBank merupakan salah satu bank yang aktif menyalurkan pembiayaan kepada sektor UMKM. Saat ini porsi pembiayaan UMKM PaninBank telah mencapai 22,8% dari total kredit yang diberikan dan telah memenuhi ketentuan Bank Indonesia sebesar 20% dari total kredit.

Atas kinerja tersebut, PaninBank mendapatkan penghargaan Bank Pendukung UMKM Terbaik Kelompok Bank BUKU 3 dan 4 dari Bank Indonesia pada tahun 2019.

Konsekuensi pajak penghasilan tersebut lebih terkait secara langsung dengan transaksi atau peristiwa masa lalu yang menghasilkan laba yang dapat didistribusikan daripada dengan distribusi kepada pemilik. Oleh karena itu, entitas mengakui konsekuensi pajak penghasilan tersebut dalam laba rugi, penghasilan komprehensif lain atau ekuitas sesuai dengan pengakuan awal entitas atas transaksi atau peristiwa masa lalu tersebut.                                | Penerapan penyesuaian atas PSAK tersebut tidak memiliki pengaruh signifikan atas pengungkapan atau jumlah yang dicatat di dalam laporan keuangan konsolidasian pada tahun berjalan dan tahun sebelumnya. |
| PSAK 46 (improvement) Income Taxes                                                         | The income tax consequences of dividends (as defined in PSAK 71: Financial Instruments) arise when the entity recognizes the liability to pay dividends. The income tax consequences are more directly related to the prior transactions or events that generated the distributable profits, rather than the distribution to owners of the entity. Therefore, the entity recognizes the income tax consequences in profit or loss, other comprehensive income or equity according to original recognition by the entity of such prior transactions or events.                                                                                             | The implementation of the amendments to the PSAK does not have a significant effect on the disclosures or amounts recorded in the consolidated financial statements for the current and previous years.  |
| PSAK 66 (Penyesuaian): Pengaturan Bersama                                                  | Mengklarifikasi bahwa ketika pihak yang berpartisipasi dalam, tetapi tidak memiliki pengendalian bersama atas, suatu operasi bersama yang merupakan suatu bisnis memperoleh pengendalian bersama atas operasi bersama tersebut, entitas tidak mengukur kembali kepentingan yang dimiliki sebelumnya dalam operasi bersama.                                                                                                                                                                                                                                                                                                                                | Penerapan penyesuaian atas PSAK tersebut tidak memiliki pengaruh signifikan atas pengungkapan atau jumlah yang dicatat di dalam laporan keuangan konsolidasian pada tahun berjalan dan tahun sebelumnya. |
| PSAK 66 (improvement) Joint Arrangements                                                   | Clarifying that when a party that participates in, but does not have joint control of, a joint operation that is a business obtains joint control of such a joint operation, the entity does not remeasure its PHI in the joint operation.                                                                                                                                                                                                                                                                                                                                                                                                                | The implementation of the amendments to the PSAK does not have a significant effect on the disclosures or amounts recorded in the consolidated financial statements for the current and previous years.  |

| ISAK 33: Transaksi Valuta Asing dan Imbalan di Muka             | Mengklarifikasi bagaimana menentukan tanggal transaksi dengan tujuan untuk menentukan kurs yang digunakan dalam pengakuan awal aset, beban atau penghasilan terkait, bila imbalan dari pos tersebut telah dibayar atau diterima dimuka dalam valuta asing yang mengakibatkan pengakuan atas aset nonmoneter atau liabilitas nonmoneter. Interpretasi menetapkan bahwa tanggal transaksi adalah tanggal dimana entitas pertama kali mengakui aset nonmoneter atau liabilitas nonmoneter yang timbul dari pembayaran atau penerimaan imbalan dimuka. Jika terdapat beberapa pembayaran atau penerimaan dimuka, interpretasi ini mensyaratkan entitas menentukan tanggal transaksi untuk setiap pembayaran atau penerimaan imbalan dimuka.                                     | Penerapan penyesuaian atas PSAK tersebut tidak memiliki pengaruh signifikan atas pengungkapan atau jumlah yang dicatat di dalam laporan keuangan konsolidasian pada tahun berjalan dan tahun sebelumnya. |
| ISAK 33 Foreign Currency Transactions and Advance Consideration | Clarifying how to determine the 'date of transaction' for the purpose of determining the exchange rate to use on initial recognition of an asset, expense or income, when consideration for that item has been paid or received in advance in a foreign currency which resulted in the recognition of a non-monetary asset or non-monetary liability. The interpretation specifies that the date of transaction is the date on which the entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration. If there are multiple payments or receipts in advance, the interpretation requires an entity to determine the date of transaction for each payment or receipt of advance consideration. | The implementation of the amendments to the PSAK does not have a significant effect on the disclosures or amounts recorded in the consolidated financial statements for the current and previous years.  |
| ISAK 34: Ketidakpastian dalam Perlakuan Pajak Penghasilan       | Mengklarifikasi bagaimana persyaratan pengakuan dan pengukuran dalam PSAK 46: "Pajak Penghasilan" diterapkan ketika terdapat ketidakpastian atas perlakuan pajak penghasilan. Dalam keadaan tersebut, entitas mengakui dan mengukur aset atau liabilitas pajak kini atau aset atau liabilitas pajak tangguhan dengan menerapkan persyaratan dalam PSAK 46 berdasarkan laba kena pajak (Rugi pajak), dasar pengenaan pajak, rugi pajak yang belum digunakan, kredit pajak yang belum digunakan dan tarif pajak yang ditentukan.                                                                                                                                                                                                                                              | Penerapan penyesuaian atas PSAK tersebut tidak memiliki pengaruh signifikan atas pengungkapan atau jumlah yang dicatat di dalam laporan keuangan konsolidasian pada tahun berjalan dan tahun sebelumnya. |
| ISAK 34: Uncertainty over Income Tax Treatments                 | Clarifying how the requirements for recognition and measurement in PSAK 46: "Income Tax" are applied when there is uncertainty over the income tax treatment. Under these circumstances, the entity recognizes and measures current tax assets or liabilities or assets on deferred tax liabilities by applying the requirements in PSAK 46 based on taxable income (tax loss), tax base, unused tax loss, tax credit that has not been used and specified tax rate.                                                                                                                                                                                                                                                                                                        | The implementation of the amendments to the PSAK does not have a significant effect on the disclosures or amounts recorded in the consolidated financial statements for the current and previous years.  |

# TATA KELOLA PERUSAHAAN

Good Corporate Governance

## Penerapan tata kelola perusahaan yang baik di lingkungan PaninBank dan entitas anak tidak hanya mengacu pada regulasi sebagai wujud kepatuhan Bank, tetapi juga praktik bisnis terbaik demi terciptanya kesinambungan usaha dalam jangka panjang.

The implementation of good corporate governance within PaninBank and its subsidiaries does not only refer to regulations as a form of Bank compliance, but also best business practices for the sake of long-term business sustainability.

### TUJUAN PENERAPAN GCG

*Good Corporate Governance* (GCG) merupakan prinsip-prinsip yang diterapkan oleh perusahaan untuk memaksimalkan nilai perusahaan, meningkatkan kinerja dan kontribusi perusahaan, serta menjaga keberlanjutan perusahaan secara jangka panjang.

PaninBank menyadari, penerapan GCG dalam era persaingan global saat ini, sudah menjadi kebutuhan yang tidak dapat tergantikan bagi Bank dalam menjalankan roda bisnisnya. Penerapan GCG telah menjadi pondasi yang kokoh dan bekal yang cukup untuk menjadi Bank yang tangguh dan terus berkembang. Karena itu, PaninBank berkomitmen untuk menjadikan GCG sebagai sebuah kebutuhan yang harus selalu diterapkan disetiap proses yang dijalankan Bank.

Implementasi prinsip-prinsip Tata Kelola yang dilakukan secara konsisten akan memberikan manfaat bagi PaninBank baik secara langsung maupun tidak langsung baik dalam jangka panjang maupun jangka pendek untuk:

### GCG IMPLEMENTATION OBJECTIVE

Good corporate governance (GCG) is the principles applied by companies to maximize value, improve performance and contribution, and maintain the sustainability of the companies in the long term.

PaninBank realizes that the implementation of GCG in the current era of global competition has become an irreplaceable need for the Bank in running its business. The implementation of GCG has become a solid and sufficient foundation to be a strong and growing Bank. Therefore, PaninBank is committed to making GCG a necessity that must always be applied in every process carried out by the Bank.

The consistent implementation of the Governance principles will benefit PaninBank both directly and indirectly in the long term and short term to:

1. Menciptakan landasan bagi PaninBank guna bertumbuh dan berkembang untuk jangka panjang.
2. Meningkatkan daya saing PaninBank.
3. Mengangkat Citra PaninBank.
4. Meningkatkan kepercayaan investor kepada PaninBank.

PaninBank memiliki pandangan bahwa peningkatan implementasi Tata Kelola Perusahaan akan berbanding lurus dengan peningkatan kinerja PaninBank secara keseluruhan. Hal ini ditunjukkan antara lain dari berbagai kinerja PaninBank yang dicapai pada periode 2019 dimana kinerja keuangan PaninBank pada periode Tahun 2019 adalah sebagai berikut:

1. Laba Perseroan mencapai Rp3,07 triliun.
2. Aset tumbuh mencapai Rp190,25 triliun.
3. Kredit yang disalurkan mencapai Rp151,47 triliun.
4. Dana Pihak Ketiga sebesar Rp131,40 triliun.
5. Total Ekuitas sebesar Rp44,40 triliun.
6. *Non Performing Loan* (NPL) Netto 1,12%.

Kunci keberhasilan dan kesinambungan penerapan Tata Kelola Perusahaan atau GCG di Perusahaan adalah berfungsinya organ-organ Perseroan yaitu Rapat Umum Pemegang Saham (RUPS), Dewan Komisaris, Direksi dan Komite-komite secara efektif. Selanjutnya organ-organ ini yang merupakan organ utama Tata Kelola akan sangat terbantu bilamana terdapat organ-organ pendukung Tata Kelola yang juga berfungsi secara efektif. Untuk mendukung penerapan Tata Kelola tersebut, maka diperlukan suatu Pedoman Tata Kelola Perusahaan (*Code of Corporate Governance*) yang telah digunakan oleh PaninBank sebagai arahan pelaksanaan GCG di PaninBank.

PaninBank menyadari perlu adanya penerapan prinsip-prinsip Tata Kelola Perusahaan yang Baik atau GCG dalam setiap jenjang organisasi dan aspek pengelolaan kegiatan usaha PaninBank sesuai dengan peraturan dan perundang-undangan yang berlaku, serta standar praktik yang berlaku umum di industri perbankan. Dengan mengedepankan penerapan Tata Kelola, PaninBank diharapkan dapat terhindar dari dampak negatif krisis perekonomian global, meningkatkan efisiensi Perseroan, kepercayaan dan keyakinan seluruh *stakeholder*.

Selain itu, penerapan GCG di PaninBank juga merujuk pada beberapa regulasi yang ditetapkan Bank Indonesia (BI) maupun Otoritas Jasa keuangan (OJK) dan standar internasional berdasarkan prinsip OECD dan ASEAN CG Scorecard, antara lain meliputi:

1. Beberapa Undang-undang Republik Indonesia, khususnya mengenai Pasar Modal, Perbankan dan Perseroan Terbatas;
2. Berbagai Peraturan Otoritas Jasa Keuangan (POJK), khususnya mengenai Penerapan dan Pedoman Tata Kelola, Laporan Tahunan, dan lain-lain;
3. *Roadmap* Tata Kelola Perusahaan Indonesia yang disampaikan melalui siaran pers OJK tanggal 4 Februari 2014;

The implementation of the Board of Directors' meeting through electronic means must be recorded, and minutes of meeting will be made. The policy of using electronic documents as company documents is determined by the Board of Directors by fulfilling the minimum requirements for the implementation of electronic systems at PaninBank in accordance with the provisions of legislation concerning electronic information and transactions.

### Risalah Rapat

1. Risalah Rapat harus dibuat untuk setiap Rapat Direksi dan ditandatangani oleh Ketua Rapat bersama-sama dengan seorang anggota Direksi lain yang hadir dan ditunjuk oleh Ketua Rapat Direksi yang bersangkutan untuk memastikan kelengkapan dan kebenaran risalah tersebut.
2. Dokumen Risalah Rapat Direksi merupakan bukti sah mengenai keputusan yang diambil dalam rapat tersebut, baik untuk keperluan anggota Direksi, pemegang saham atau pihak ketiga.
3. Dokumen Risalah Rapat Direksi bersifat rahasia. Arsip dokumen ini dipelihara/disimpan oleh *Corporate Secretary*. Putusan hasil Rapat Direksi yang memerlukan tindak lanjut divisi terkait harus segera diteruskan kepada divisi yang bersangkutan oleh *Corporate Secretary*.
4. Frekuensi dari Rapat Direksi dan kehadiran dari anggota Direksi ikut dilaporkan dalam laporan tahunan PaninBank.

### Perbedaan Pendapat

Pada dasarnya keputusan Rapat Direksi berdasarkan musyawarah mufakat, atau suara terbanyak. Bilamana ada perselisihan mengenai hal-hal yang dicantumkan dalam Berita Acara Rapat Direksi, maka hal tersebut harus diputuskan dalam Rapat Direksi dan keputusannya harus disetujui oleh lebih dari 50% (lima puluh persen) dari jumlah semua anggota Direksi yang sedang menjabat yang hadir.

Namun dalam hal terdapat Direktur yang tidak menyetujui keputusan rapat, yang bersangkutan dapat menyatakan/membuat pernyataan tidak setuju dan dicatat dalam berita acara rapat Direksi. Tujuannya adalah apabila keputusan tersebut suatu saat ternyata menyebabkan masalah bagi PaninBank, maka yang bersangkutan tidak turut dipersalahkan. Selain itu, anggota Direksi yang tidak menyetujui putusan rapat Direksi dapat mengajukan banding kepada Dewan Komisaris yang didahului dengan pembahasan atau meminta pendapat kepada komite yang terkait.

### Pengambilan Keputusan

Mekanisme pengambilan keputusan Direksi dapat dilakukan dengan beberapa cara, yaitu melalui rapat Direksi, keputusan Direktur maupun *circular approval*. Seluruh keputusan yang diambil Direksi wajib didokumentasikan dan dipelihara oleh *Corporate Secretary*. Berikut adalah mekanisme pengambilan keputusan di PaninBank:

### Minutes of Meetings

1. Minutes of meetings must be made for each member of the Board of Directors' meeting and signed by the chairman of the meeting together with another member of the Board of Directors who is present and appointed by the Chairperson of the relevant Board of Directors' meeting to ascertain the completeness and correctness of the minutes.
2. Documents on minutes of the Board of Directors' meeting constitute valid evidence regarding decisions taken at the meeting for the needs of members of the Board of Directors, shareholders, and the third parties.
3. Documents on minutes of meetings of the Board of Directors are confidential. These document archives are maintained/stored by the Corporate Secretary. The decision of the results of the Board of Directors' meeting requiring follow-up of the relevant divisions must be immediately forwarded to the relevant divisions by the Corporate Secretary.
4. The frequency of the Board of Directors' meetings and the attendance of members of the Board of Directors are also reported in PaninBank's annual report.

### Dissent

Basically, the decision of the Board of Directors' meeting is based on consensus agreement, or the most votes. If there is a dispute regarding matters that are included in the Minutes of the Board of Directors' Meeting, then this must be decided at the Board of Directors' meeting and the decision must be approved by more than 50% (fifty percent) of the total serving members of the Board of Directors present.

However, in the event that there is a Director who does not approve the meeting decision, the concerned person can declare/make a statement of disagreement and be recorded in the minutes of the Board of Directors' meeting. The aim is that if the decision turns out to cause a problem for PaninBank one day, then the person concerned will not be blamed. In addition, members of the Board of Directors who do not approve the decision of the Board of Directors' meeting can submit an appeal to the Board of Commissioners which is preceded by a discussion or a request for opinions to the relevant committee.

### Decision Making

The decision making mechanism of the Board of Directors can be carried out in several ways, namely through the Board of Directors' meeting, Director's decision, and circular approval. All decisions taken by the Board of Directors must be documented and maintained by the Corporate Secretary. Following are the decision-making mechanisms at PaninBank:

## FUNGSI KEPATUHAN

### Compliance Functions

Kompleksitas kegiatan usaha Perseroan semakin meningkat sejalan dengan perkembangan teknologi informasi, globalisasi dan integrasi pasar keuangan. Kompleksitas kegiatan usaha Perseroan tersebut memberikan dampak yang sangat besar terhadap eksposur risiko yang dihadapi oleh Perseroan, dimana salah satu risiko yang dihadapi Perseroan adalah risiko kepatuhan.

Risiko kepatuhan merupakan risiko yang timbul akibat Perseroan tidak mematuhi dan/atau tidak melaksanakan peraturan perundang-undangan dan ketentuan yang berlaku. Untuk memitigasi risiko kegiatan usaha Perseroan diperlukan berbagai upaya baik yang bersifat preventif (*ex-ante*) maupun kuratif (*ex-post*). Upaya yang bersifat *ex-ante* dapat ditempuh dengan mematuhi berbagai kaidah perbankan yang berlaku untuk mengurangi atau memperkecil risiko kegiatan usaha Perseroan.

Tindakan-tindakan preventif yaitu dengan meyakini bahwa seluruh kegiatan usaha, kebijakan, ketentuan, sistem, dan prosedur bank telah patuh terhadap ketentuan dan peraturan perundang-undangan yang berlaku. Diharapkan dengan tindakan preventif tersebut, maka bank dapat menghindari atau mengurangi dampak apabila terdapat suatu kejadian risiko (*risk event*). Untuk mewujudkan hal-hal sebagaimana dimaksud di atas, diperlukan peningkatan peran dan Fungsi Kepatuhan serta satuan kerja kepatuhan yang ada pada Perseroan sehingga potensi risiko kegiatan usaha Perseroan dapat diantisipasi lebih dini.

Satuan Kerja Kepatuhan bertanggung jawab untuk melaksanakan fungsi kepatuhan dan mengkoordinasi peningkatan dan penumbuhkembangan budaya kepatuhan di Perseroan. Sebagaimana yang telah tertuang dalam Piagam Kepatuhan PaninBank, kepatuhan terhadap ketentuan dan peraturan perundang-undangan merupakan suatu kewajiban seluruh organ dan karyawan Perseroan sehingga tercipta sebuah Budaya Kepatuhan.

Berdasarkan Peraturan Otoritas Jasa Keuangan No. 46/POJK.03/2017 tanggal 12 Juli 2017 tentang Pelaksanaan Fungsi Kepatuhan Bank Umum, secara struktur organisasi, PaninBank memiliki seorang Direktur Kepatuhan, dimana dalam menjalankan tugasnya Direktur Kepatuhan dibantu oleh Satuan Kerja Kepatuhan yang dikepalai oleh seorang Kepala Biro (Kepala Satuan Kerja Kepatuhan).

The complexity of the Bank's business activities is increasing along with the development of information technology, globalization and financial market integration. The complexity of the business activities has a huge impact on the risk exposure faced by the Bank, and one of them is compliance risk.

Compliance risk is a risk arising from the Bank's failure in complying with and/or not implementing the applicable laws and regulations. Mitigating the risk arising from the Bank's business activities needs various preventive (*ex-ante*) and curative (*ex-post*) measures. *Ex-ante* measures can be pursued by adhering to various applicable banking rules to reduce or minimize the risk of bank business activities.

Preventive actions, namely by ensuring that all business activities, policies, provisions, systems and procedures of the bank have complied with the applicable laws and regulations. It is expected that with these preventive actions, the bank will be able to eliminate or minimize the impact of the risk events. To realize the things referred to above, it is necessary to increase the role and Compliance Function and the Compliance Unit in the Bank so that the potential risk of business activities can be anticipated earlier.

The Compliance Unit is responsible for implementing the compliance function and coordinating the improvement and development of a culture of compliance at the Company. As stated in the PaninBank Compliance Charter, compliance with regulations and legislation is an obligation of all organs and employees of the Company to create a culture of compliance.

Conflict of interest is a condition that can lead to conflict between the interests of the Bank and the interests of individuals, members of the Board of Commissioners, Directors, and employees of the Bank which causes it to be unable to act independently and objectively.

Dalam menjalankan tugas dan kewajibannya, tiap individu Perseroan harus senantiasa mendahulukan kepentingan Bank di atas kepentingan pribadi, keluarga, maupun pihak lainnya. Di samping itu, setiap individu yang memiliki wewenang untuk mengambil keputusan harus membuat pernyataan bahwa individu yang bersangkutan tidak memiliki benturan kepentingan terhadap setiap keputusan yang telah dibuat olehnya.

Penanganan Benturan Kepentingan dilaksanakan sebagai berikut:

Dewan Komisaris dan Direksi wajib untuk membuat pernyataan, secara tahunan, mengenai ada atau tidak adanya benturan kepentingan dan tidak terdapat intervensi pemilik Perseroan pada setiap keputusan yang telah diambil dan seluruh proses telah sesuai dengan peraturan dan kebijakan Perseroan. Apabila Dewan Komisaris dan Direksi memiliki benturan kepentingan, Dewan Komisaris dan Direksi wajib menyatakan bahwa seluruh keputusan yang pernah diambilnya tetap obyektif, independen, dan tidak merugikan Perseroan.
